VOL. 23 No. 34 | Lancaster Farming, Saturday, June 24, 1978 | $6.00 Per Year

Top poultrymen named

By DIETER KRIEG

LANCASTER -- The Pennsylvania Poultry Federation on Thursday night named two Lancaster Countians and an egg producer from Butler County as the Federations outstanding members.

Chosen as Broiler Industryman of the Year was Dale M. Weaver, executive vice president of Victor F. Weaver, Inc., New Holland.

Leroy Zimmerman, an independent turkey grower from East Earl, was named Turkey Industryman of the Year. He owns Zimmerman Turkey Farms and is a former president of PPF's turkey division.

Chosen as Egg Industryman of the Year was W. Robert Park of Valencia.

The awards announcements came at the conclusion of a day-long conference held here at the

(Turn to Page 26)

Two Lancaster County poultrymen and their wives were honored by the Pennsylvania Poultry Federation on Thursday night. They were Mr. and Mrs. Leroy Zimmerman of East Earl and Mr. and Mrs. Dale M. Weaver of Leola.

Top dairymen chosen

ANCASTER — A Lancaster County dairy farm team has been named as one of three top winners in competition sponsored by individual cooperatives of the Pennmarva Dairymen's Federation, Inc. Judging took place during a two-day session sponsored Tuesday this week at the Host Farm Resort, east of here.

Steven and Victoria Graybeal, Peach Bottom R1, were named the Outstanding Young Cooperators for the Maryland and Virginia Milk Producers Association, Inc. The Lancaster County couple farms 900 acres and milks 270 grade cows. Their 1977 DHIA rolling herd average is 14,973 pounds of milk and 571 pounds of butterfat.

Winners of similar competition of the other Pennmarva cooperatives were Betty and James Stonesifer of 1120 Baust Church Road, Union Bridge, Md. and

Ag districts considered

HARRISBURG – Rep. John W. Wenger, R-Lancaster, has hailed House passage of a measure he co-sponsored to allow for the establishment of agricultural districts in Pennsylvania.

Wenger said the measure, like Bill 2145, would protect agricultural land from condemnation or unreasonable restrictions by county and municipal governments.

"Farm land is one of our most precious natural resources and agriculture is one of our most vital industries. Therefore, it is important that the Legislature takes every step possible to protect and preserve agricultural land. This is the intent of HB 2145," Wenger said.

Specifically, the legislation provides that an agricultural district may be created when a person or group of persons who owns at least 500 acres of land, or at least 10 per cent of the land proposed for such a district, submits a proposal

(Turn to Page 22)

Mr. and Mrs. Steven Graybeal, Peach Bottom; and Mr. and Mrs. Larry Kulp of Martinsburg finished first and third, respectively, in a dairymen's contest held in Lancaster this week.

Stoltzfus wears dairy crown

By SALLY BAIR
Feature Writer

LANCASTER – Joyce L. Stoltzfus, Gap R2, was named the 1978 Lancaster County Dairy Princess at a banquet at the Farm and Home Center Saturday night. It was an eventful day for 17-year-old Joyce who had graduated from Lancaster Mennonite High School that afternoon. Joyce is the daughter of Mr. and Mrs. Nathan E. Stoltzfus of Con-Noll Farm.

Retiring Dairy Princess Twila Brubaker, Manheim R2, crowned her successor and presented her with a bouquet of red roses. At her final appearance, she expressed her gratitude to those who helped throughout her reign, and gave her last presentation with "Hardy" and "Hardly" who had been her faithful companions for a year.

First alternate in the contest was LuAnn Brenneman, 17, the daughter of Mr. and Mrs. Elvin Brenneman, who was also named Miss Congeniality, an award voted on by the contestants themselves.

Second alternate was

Hay season looks good so far

By KENDACE BORRY

BLEITZ — Most of the first cutting of alfalfa seems to be done the Lancaster Farming way according to farmers questioned in to this week. And that cutting looks good, for the most part farmers agreed.

The main problem with the hay crop so far this year seems to be trying to get it made in the sunny weather. With the frequent rainy days, some farmers complained that their hay might be too wet to ever get a good cure.

"I've been real lucky" one Lancaster County farmer related. "I got my alfalfa in during that stretch of beautiful weather and it looks good, real good. Now my neighbor wasn't so lucky. Some of his crop is still out in the field."

Other farmers echoed his words as the main complaint any farmer may have had about his hay was the high moisture content, and there weren't too many of them

Slaughter steer prices lower

By KENDACE BORRY

LANCASTER — The prices on slaughter steers were lower this week at the Lancaster Stockyards, although the slaughter market for other cattle continued steady to slightly lower.

On Monday, June 19, prices compared to the previous Wednesday were steady to 50 cents lower for slaughter steers, with instances of $1.00 lower. High choice and prime 3-4, 1075 to 1400 lbs. brought $56.50 to 58.35. The choice, mainly 2, 1000 to 1275 lbs. slaughter steers brought $56.75 to 58.10.

Monday's prices on slaughter heifers were 50 cents to $1.00 lower, cows were 50 to 75 cents higher, and and bullocks were steady to $1 higher. Bulls were firm to $1 higher.

Compared to Monday, Wednesday's slaughter steers were $1.50 to 2.00 lower. High choice and prime 3-4 slaughter steers weighing 1075 to 1385 lbs. brought 54.50 to 56.00, with a few bringing $56.10 to 57.00.

Delmarva Poultry

June 21, 1978

Ready-to-cook movement fair though unaggressive in most quarters for current needs. Slaughter schedules moderate with occasional plant not operating because of light weights. Todays LTL asking prices mostly 51 on plant and 52 on US Grade A. Advance interest good at unconfirmed prices. Live supplies adequate at weights often lighter than desired. Undertone fully steady to firm.

Current broiler/fryer negotiated prices for immediate includes mostly multipe-drop shipments to New York City from Delmarva.

Range: US Grade A 51-54; Plant Grade 51-52½; Premium X US Grade A 59.00; Premium X Plant Grade 57.00.

Wtd. Avg: US Grade A 52.46; Plant Grade 51.56; Premium X US Grade A 59.00; Premium X Plant Grade 57.00.

X-includes special services, selected competitive brands, etc.

Eastern Pa. & N.J. Poultry

June 21, 1978

Prices light type hens held unchanged. Farm offerings generally fairly heavy for a good processor interest. Offerings of heavy type hens fully adequate for a fair at best call.

Prices paid at farm:

Light type hens 7-9½, mostly 9-9¼. FOB Plant 11-11¾, mostly 11. Heavy type hens: TFEWR.

Philadelphia Eggs

June 21, 1978

EGGS: Federal-state.

Prices unchanged to higher on large and extra large, unchanged on mediums. Cartoning demand fair. Offerings adequate on large, barely adequate on extra large, ample on mediums. Undertone steady.

Prices to Retailers: Sales to volume buyers, consumer grades white eggs in cartons, delivered: store door.

A Extra Large 49-54
A Large 48-52
A Medium 39-42

PACMA Eggs

PACMA-FACTS

The following market is supplied by PACMA-FACTS, a direct marketing organization affiliated with the Pennsylvania Farmers' Association. Participating poultrymen are members of PACMA, which employs a fowl marketing agent, The Farmers' Agricultural Cooperative Trading Society (FACT) - to sell members' fowl. PACMA works directly with the PFA poultrymen in the program.

Farm point prices prevailing for fowl to be marketed by members during the week of June 19 were 11½ plant, and 9½ farm.

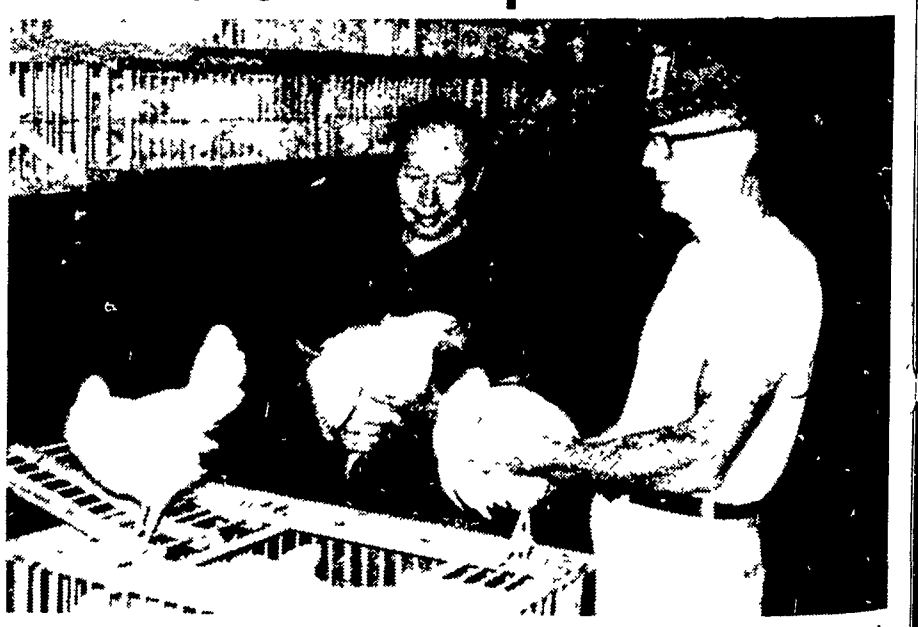
DANVILLE LIVESTOCK MARKET
OLD ROUTE 11
DANVILLE, PA 17821
717-275-2880

Market your hogs the auction way.

SALE EVERY MONDAY 2 P.M.
Melvin M. Lehman (Owner)

Do you like to shop around for pullets?



On what do you base your decisions? The quoted 20 week old price?

Here's a few pertinent questions to ask yourself about your last delivery:

1. Did the quoted price include delivery?
2. Were the birds fed to optimum body weight?
3. How many pounds of feed did they consume to reach 50% production?
4. At what age did they reach 50% large eggs?

Once you know these facts you are ready to do some intelligent buying.

HUBBARD WHITE MT BROILERS

From mother to market, we formulate feeds and feeding programs with your profit in mind.

Does pork production represent a sizeable part of your income? Are you ready to devote an hour or so of your time *planning* for a more profitable future?

If your answer to both questions is yes, you owe it to yourself to read what we have to say.

Unlike many other feed companies, we develop feeding and management programs for each individual operation.

It all starts with a Pennfield man reviewing your operation with you. Your goals. Your records. Whether you farrow and finish your own pigs or buy feeder pigs. Your management practices. The health and overall condition of your herd. And other factors that have an effect on your profit potential.

With the aid of computers, we then design programs that can improve your profits by reducing expenses, improving performance, or both.

For example, many producers who switched from a competitive program to a Pennfield program have cut their feed costs and their hogs go to market sooner. In effect, the Pennfield program is putting more money in their pockets.

There is no cost—or obligation—for this unique service. But you must take the first step by writing or phoning us. Do it today.

Pennfield Feeds, 711 Rohrerstown Rd., Lancaster, PA 17604. Local calls: Lancaster 299-2561, Red Lion 244-4511. In 717 and 215 areas dial toll free 800-732-0467.

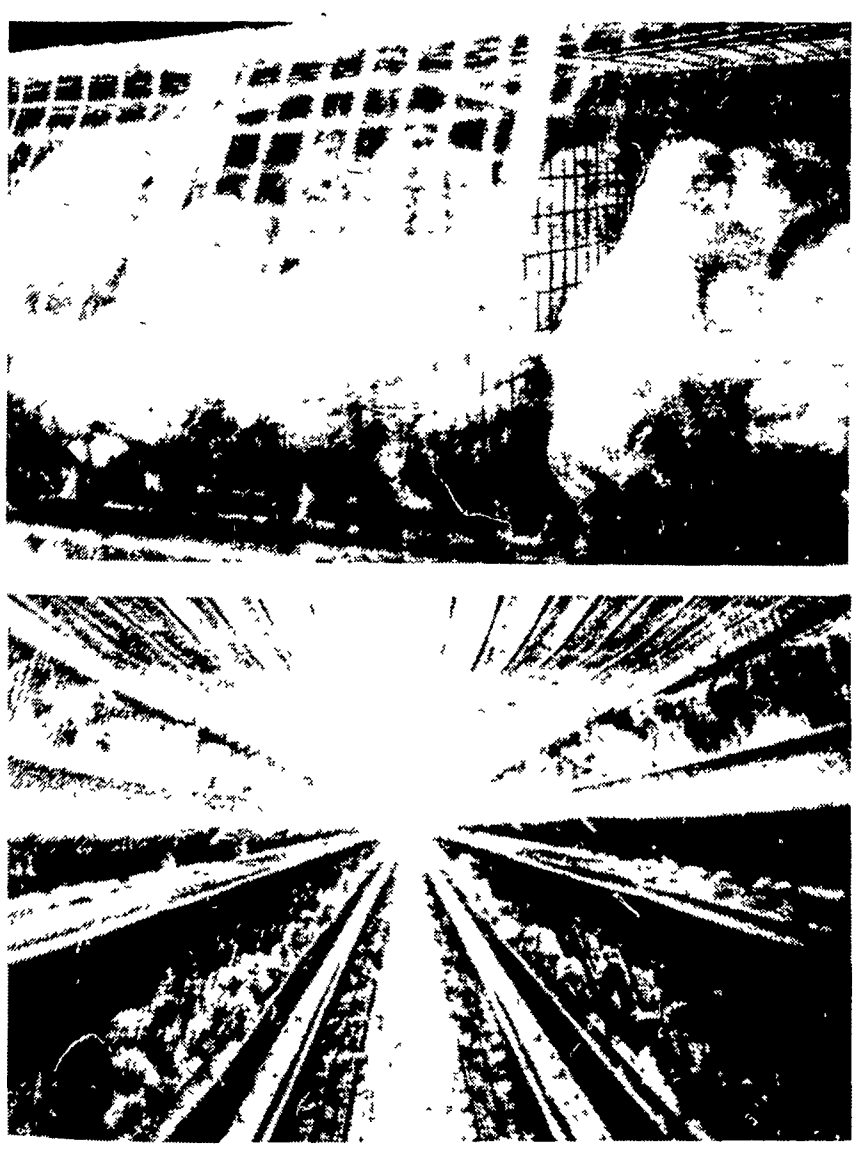
COWS: Utility and Commercial 1-3 36.00-39.00.



Purina Bio-Mittent Lighting Program

Early poultry experimental results indicated that layers did not have to have a constant or continuous amount of light during the light hours. It was demonstrated that if the lights were programmed in certain specific patterns, nearly equal production rates to a constant lighting program could be achieved.

The challenge to Purina researchers was to develop an intermittent lighting program that not only would give equal production rates, but would also improve feed efficiency. After four years of testing and modification, the Purina Bio-Mittent lighting program is now ready for both pullets and layers.

Tests show that Bio-Mittent lighting provides equal production rates to that acheived with a normal constant day length. However, in addition it can provide certain economics in electrical savings and feed efficiency. These are improvements that cannot be achieved on a program of constant daylight but are possible to have when the Bio-Mittent lighting program is used.

If you feel we may be of service, please call us at 768-3301 or 1-442-4183. We can only help.

THE OLD FARMER'S ALMANAC

JUNE 26-JULY 2, 1978

Sweet indolent days now

If you're starting vacation, watch out for sunburn Joe Louis KO'd by Jersey Joe Wolcott June 28, 1948 Last quarter of the moon June 27 Average length of days for the week, 15 hours, 15 minutes Alaska statehood voted in Senate June 30, 1958 *A hero is no braver than an ordinary man, but he is brave five minutes longer*

Ask the Old Farmer: In the year 1757, when town and church were closely interwoven, a town meeting in Massachusetts appropriated "four pounds" for "doring ye meetinghous and for a suppolidge" What was the latter? D W, Boston

In general, a reserve fund for maintenance

Home Hints Keep lipstick in the refrigerator during hot weather and it won't melt

OLD FARMER'S WEATHER FORECASTS

New England: Partly cloudy with showers, weekend sunny

Greater New York-New Jersey: Week begins mild with frequent showers, then sunny and seasonal at midweek, weekend sunny, warm

Middle Atlantic Coastal: Rainy and cool to start, then sunny and cool at midweek, weekend hot, humid

Piedmont & Southeast Coastal: Hot with scattered showers to start, then sunny and hot, weekend mostly clear and hot

Florida: Cooler with heavy rain, thunderstorms on weekend

Upstate N.Y.-Toronto & Montreal: Cool and rainy to start, gradual clearing for midweek, light showers and hot east for weekend

Greater Ohio Valley: Rainy and cool turning clear and seasonal, sunny, hot with scattered showers for weekend

Deep South: Mild with heavy rain to start, then clear and cool at midweek, clear and seasonal for weekend

Chicago & Southern Great Lakes: Rainy and very cool to start, then partial clearing, warmer, week's end seasonal with more rain

Northern Great Plains-Great Lakes: Partly sunny and seasonal with squalls west, clearing and hot for weekend

Central Great Plains: Hot with showers central, intermittent rain end of week

Texas-Oklahoma: Rain, then clear and not by midweek, few showers and cooler for weekend

Rocky Mountain: Hot and showery northwest and east to start, then cloudy and cool at midweek, remainder of week is sunny, hot

Southwest Desert: Partly cloudy with showers south and east, clear and hot with few showers east for weekend

Pacific Northwest: Becoming warmer with light rain north, weekend sunny and hot

California: Sunny south, clearing north, end of week cloudy and cool

Babcock's B-300V:

The layer that's never been beaten in Pennsylvania Random Sample Testing.

What characteristic do you look for in the layer you buy? High production numbers or efficient feed conversion? Large eggs or low mortality?

Why not pick the layer with the balanced performance that means profit for Pennsylvania egg producers — the Babcock B-300V.

In her very first year of testing, Babcock's B-300V swept the 20th Pennsylvania Random Sample Test, with the highest IOFCC for both divisions - cage **and** floor.

Test results below confirm field reports we've been receiving on the B-300V's outstanding performance - top egg production, great livability, competitive feed conversion, legendary resistance to stress, **plus** strong, beautiful shells.

STRAIN[3]	IOFCC[1]	HEN-HOUSED PRODUCTION[1]	% LARGE & X LARGE[1]	LBS. FEED/ LBS. EGGS[1]	% MORTALITY[1]	BODY WT. LBS[1]	SHELL BREAKING STRENGTH LBS.[2]
BABCOCK B-300V	6.41	265.9	99.0	2.35	2.05	4.1	9.6
HISEX	6.24	263.6	96.9	2.49	5.60	4.1	8.5
DEKALB XL-LINK	5.91	264.5	95.5	2.51	2.55	4.2	8.7
SHAVER SX-288	5.90	259.3	100.0	2.44	4.10	4.7	8.9
HUBBARD	5.23	244.5	93.4	2.46	6.60	4.4	NA

[1] Combined results, cage and floor, 20th Pennsylvania Random Sample Test.

[2] Multiple Performance Testing . . . ask your Babcock representative for test results.

[3] Hyline and H&N were not entered in Pennsylvania R.S.T.

If you're looking for profitability in the layer you buy, you're looking for the Businessman's Bird. Babcock's B-300V... first choice of poultry businessmen wherever eggs are produced at a profit.

EDITORIAL COMMENTS By DIETER KRIEG, EDITOR

Food advertising battle shaping up

Farmers are getting hurt by deceptive and false advertising claims made by manufacturers of artificial and imitation food products which compete with farm products. Several farm organizations are now mounting campaigns to bring unfair advertising practices to a halt. But they need your support.

Among those most concerned are such organizations as the National Dairy Council, the National Livestock and Meat Board, the American Egg Board, and United Egg Producers. Also in the forefront of the battle is the National Commission on Egg Nutrition, an independent organization which aims for truth in egg nutrition research.

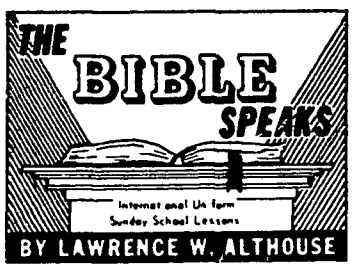
The National Commission on Egg Nutrition, (NCEN) filed a complaint last month with the Federal Trade Commission requesting action against Miles Laboratories for an advertising campaign about eggs and heart disease. The National Livestock and Meat Board (NLMB) has filed a similar complaint.

Recently, the NLMB requested the FTC to order four food manufacturers to cease and desist from "false, deceptive, and misleading" advertising which claims health benefits for their meat substitute and vegetable oil products. Named in the complaint were Miles Laboratories, makers of Morningstar Farms meat substitute products; Standard Brands, Inc., makers of Fleischmann's margarine and Egg Beaters; Best Foods Division of CPC International, Inc., makers of Mazola corn oil and margarine; and PVO International, Inc., makers of Saffola margarine and vegetable oil products. In addition to requesting a cease and desist order, the Meat Board has asked the FTC to seek a temporary injunction prohibiting the advertising pending issuance and adjudication of a formal complaint, according to a National Dairy Council publication.

The nation's egg industry has been battling Standard Brands for many months. The battle takes place not only on supermarket shelves where the farmer's eggs face competition from Standard Brands' Egg Beaters, but in board and court rooms as well. This Fall, the American Egg Board and United Egg Producers hope to take their case to court. They're optimistic of standing a good chance of winning. We hope they do. If they do, it'll be a tremendous victory for all farmers.

But these kind of battles cost money and time. As usual, it is the cooperative organizations who are leading the fight. Farmers — whether they be dairymen, poultrymen, or cattlemen — are urged to consider the challenges involved. There is a lot of stake.

A little time and money invested now to protect the integrity of your markets could pay big dividends in years to come. This battle against unfair advertising is one with which every farmer should become involved. Unfair advertising should be stopped dead in its tracks as soon as possible.



THE QUIET REVOLUTION

Lesson for June 25, 1978

Background Scripture:
Acts 17.
Devotional Reading:
Acts 17:23-34.

A black African leader was interviewed by a newsman. Asked what had influenced him most as a revolutionary leader, he replied without hesitation: "The Christian missionary school I attended."

Many Christians were shocked to think that their contributions to the missions had in any way influenced this man to become a revolutionary. Ironically this story broke in the summer of 1976 while Americans were celebrating their own revolutionary heritage.

World Upside Down

Yet there is no question but that Christianity has been a revolutionary force from its very beginning. Testimony to this is found in Acts 17 when Paul and Silas are working in Thessalonica. Encountering the two missionaries in the synagogue, some of the Jews of Thessalonica drag some of the Christians before the town authorities, charging: **"These men who have turned the world upside down, have come here also"** (17:6).

Wherever Paul and Silas went – as well as other Christian missionaries – they were upsetting people and turning communities "upside down." No matter how you slice it, the Good News of Jesus Christ is a revolutionary message and force! No community was ever the same again. These men upset the peaceful balance of communities by challenging their religions, their business practices, and their moral standards. Governmental authorities looked upon these people as politically subversive and many were treated as such.

Jesus, The Other King

One of the reasons they were regarded so suspiciously by civil authorities was their insistance upon calling Jesus their Lord. Political leaders saw this as a threat to the authority of the Roman Caesar and his empire. Thus, in Thessalonica the Jews accused the Christians of saying that "there is another king, Jesus."

Well, of course, we do regard Jesus as Lord and King. Yet, Jesus is a different kind of king. He seeks no political or temporal kingdom and his sovereignty is spiritual. To be sure, his Lordship often has consequences that are political, social and economic in nature, but that is not the focus of his sovereignty in men's hearts.

This also means that although his Good News is revolutionary and throws the world into ferment, still his revolution is not that of the sword or any other kind of violence. If there is force in his revolution, it is moral force, the power of love and loyalty. The violence it often experiences – as Paul and Silas experienced it in Thessalonica and elsewhere – is simply the sinful response of people who are threatened by it. People often react violently, failing to realize that violence has never been able to stop it.

When people take Christ into their lives and into their communities, they cannot help but experience a quiet revolution in all that he touches and turns upside down.

NOW IS THE TIME By Max Smith, Lancaster County Agricultural Agent

Phone 394-6851

TO CONTROL FLIES

Recent weather conditions have favored the development of a larger fly population; extra moisture presents ideal conditions for maggots to develop into flies. We suggest that livestock operators use residual insecticies on their buildings to cut down the house fly problem; materials such as Cygon, Korlan, and Rabon can be used. Be sure to follow directions about amounts and presence of livestock.

One of the most important practices in keeping down the number of flies is to clean up the place and eliminate fly breeding areas. Manure packs and other filth are good fly breeding places. Cygon and Korlan sprays or applications on the surface of manure piles or packs will stop fly maggot development. Good sanitation along with the proper use of insecticides can keep flies under control.

TO RENOVATE OLD STRAWBERRY BEDS

If the old plants are to be kept for another season, they should be thinned out and fertilized after the current crop is picked. This can be done by hand or by use of a cultivator to narrow the rows. A complete fertilizer application, and especically nitrogen, will encourage new growth and additional runner plants.

Most strawberry plants will give their best yields the first year after the planting year; however, with good care they can be profitable for a year or so longer. The allow them to grow into a solid mass of plants is not a good practice. New plantings should be fertilized when planted and again during mid-summer. The earlier that new runner plants are rooted, the better they will yield next spring.

TO SHEAR PINE TREES

In this part of the state June and July would be the time to shape pine trees. This is true of ornamental plantings as well as those being grown for Christmas trees. The shearing should be done when most of the new growth has developed. Shearing is done to improve the shape of the tree, and in many cases to keep the size under control to fit the landscape.

Spruce and fir trees should not be sheared until late fall and winter. Most pine trees will become thicker and more attractive when pruned at this time of the year. This work should not be done on a tree before it is at least 3 to 4 feet high.

TO SPRAY ALFALFA FOR LEAF HOPPERS

One of the most destructive insects on alfalfa in this part of the state is the potato leaf hopper. This insect usually attacks new growth and will stunt the plants and cause them to turn yellow.

Growers who have finished the first cutting should make plans to spray the field with Cygon, Malathion, or Methoxychlor when the next growth is 2 to 4 inches high. Prevention is much better than to try and correct the problem after stunting is noticed.

Second and third cuttings of alfalfa are usually top quality and very valuable for feeding or for selling purposes. Growers are urged to make every effort to get maximum yields. The Leaf Hoppers will decrease yields if not controlled.

The 1978 Agronomy Guide will give additional details

Farm Calendar

Saturday, June 24

"Farmers breakfast" at Willow Valley Restaurant, Willow Street. Speaker is Mel Graham, brother of Billy Graham. Sponsored by Teen Haven, 9 a.m.

Sunday, June 25

Ephrata Area Young Farmers baseball trip, meet at 11 a.m. at Ephrata Junior High School.

Cecil County Farm Visitation Day, 1 p.m. to 5 p.m.

Dairy goat picnic and workshop at the Richard Weaner farm, just north of Gettysburg on Business Route 15. 11 a.m.

Monday, June 26

State horticulture tour to orchards in Berks and Lehigh Counties Continues tomorrow. Call your Extension Service office for details.

Monthly meeting of the Hunterdon County Horse and Pony Association, at the Extension Center, 8 p.m.

PennAg grain meeting, 6:30 p.m. at the Continental Inn, Route 30, east of Lancaster.

4-H Leadership Congress, today through Thursday at Penn State University.

Tuesday, June 27

Thomasville 4-H Club meets at 7:30 p.m. at the 4-H Center near Bair. Fun Night, games and ice cream.

Northeast Dairy Day, 9 a.m. to 3 p.m. at Langdonhurst Farm, Copake, N.Y.

Ciba-Geigy field day at Mervin M. Hess Pavilion, 10 a.m. to dark. Pavilion located west of Manheim along Colebrook Road. Tours will leave from there to check corn, soybean, potato, and other plots.

Wednesday, June 28

Regular monthly meeting of the board of directors of the Berks County Conservation District. 2 p.m. at the Ag Center, west of Reading.

Thursday, June 29

Southcentral Cattlemen's meeting, Dover Fire Hall.

Friday, June 30

Lebanon County dairy princess pageant, Lebanon Municipal Building Auditorium, 7:30 p.m.

180 pto hp	**155** pto hp	**135** pto hp	**121** pto hp	**108** pto hp	**93** pto hp

If you need big tractor power to get your field work done **now,** then **now** is the time to see your Case Dealer Nobody offers a greater selection of big two-wheel drive tractors than Case within this horsepower range many offer less

That s important to you, because it means you pay for the power you need, not settle for a little more or a little less than your farming operation requires This means more efficiency, lower cost

All six Case Agri Kings have large displacement Case built engines (401 to 504 cubes) with high torque and long lived moderate speed design

But on an Agri King, power is just the beginning Five are available with a 12-speed range power shift That means three on-the-go speed choices in each of four ranges that help keep you going without stopping and shifting in varying field conditions

Case hydraulics mean you can handle all the equipment your power can pull Lift capacity on our three-point hitch ranges up to 7925 lbs Up to four remotes available

The quiet roll protected (ROPS*) Case cab is available on all models Hot, cold, dusty or windy, this cab helps keep you comfortable, relaxed, working at peak efficiency Our 'Easy-Rider' seat adjusts seven ways to fit you just right

All these features will work for you when you step into a Case Agri King Features that show Case is doing something about giving you the power for big production that you need **now.**

Don't wait! See your Case Dealer today and select the power and performance combination only Case can offer

For peak production periods ask your participating Case Dealer about his Rental Program or the Case Lower Payment Lease Plan

Indiana Livestock

Indiana, Pa.
June 22, 1978

CATTLE 153. Compared with last Thursday's market, slaughter cows unevenly steady. Few Good 48.00-50.75, few standard 44.00-47.25. Slaughter heifers few good 46.00-48.00, few standard 40.00-44.25, few utility 37.25-38.50. Utility & Commercial slaughter cows 38.00-42.00, few 43.75. Cutters 36.50-40.00. Canner & L. Cutter 34.00-38.25, bullocks few good 45.75-49.50, few Yield Grade #1, 1200-1700 lbs. 47.00-49.75.

FEEDER CATTLE: Steers good 615-650 lbs. 50.00-57.00, Med. 300-535 lbs. 38.00-45.00. Medium & Good 570-700 lbs. heifers 40.00-44.50, Medium & Good 500-735 lbs. bulls 41.00-46.50.

CALVES 146. Vealers grading good & choice 1.00-2.50 lower, standard 2.50-4.00 lower. Choice 65.00-70.00, good 58.00-66.50, standard & good 110-130 lbs. 90-110 lbs. 52.00-62.00, 70-90 lbs. 46.00-53.50, few Utility 55-125 lbs. 35.00-41.00.

FARM CALVES: Holstein bulls 90-120 lbs. 63.50-84.00, Holstein heifers 80-110 lbs. 66.00-75.50. A few beef cross bulls and heifers, 80-120 lbs. 54.00-70.00.

HOGS 70. Barrows and gilts mostly $1.00 lower. US No. 1-2 200-235 lbs. barrows & gilts 48.50-49.25, No. 1-3 190-250 lbs. 46.75-48.25, few No. 2-4 265-300 lbs. 44.00-46.50, No. 1-3 130-170 lbs. 40.00-45.00. SOWS few US No. 1-3 400-550 lbs. sows 41.50-44.00, few No. 2-3 525-600 lbs. 38.00-40.00. BOARS 32.50-33.50.

FEEDER PIGS 14. US No. 1-3 35-50 lbs. feeder pigs 31.50-39.50 per head.

SHEEP 50. Spring slaughter lambs choice 70-85 lbs. 55.50-57.00, Good 90-115 lbs. 48.00-54.00, Utility 50 lbs. at 46.00. Slaughter ewes 12.00-14.50.

Omaha Cattle

Thursday, June 22, 1978

Compared with previous Wednesday: slaughter steers and heifers were 3.50-4.50 lower through this Wednesday, largely 4.00 lower; instances 5.00 off on good and choice heifers. Few steers and heifers Thursday 5.00-6.00 lower. Cows closed .50-1.00 lower and bulls 1.00 off.

Four day receipts 14,000 as compared 15,300 previous week and 17,600 a year ago. Fed cattle prices again declined sharply despite moderate marketings locally. Slaughter continued at the curtailed rate of recent weeks. The overall finish of the steer supply was fairly attractive with a rather liberal percentage of choice and several loads choice and prime. Much of the heifer supply was good to average-choice. Steers made up approximately 51 percent and heifers 31 percent of receipts. Cows a short 10 percent and feeders 6 percent.

STEERS: At midweek, load Choice 3 and two loads Choice and Prime 3-4 1280-1460 lbs. 55.00, scattered loads 1125-1300 lbs. 54.50, the week's high Monday and Tuesday 56.00, but load 1250 lbs. Thursday 53.00. Choice 2-4 1000-1300 lbs. closed Wednesday 52.00-54.00, largely 52.50-54.00, but few loads 1075-1175 lbs. Thursday 51.00-52.25. Mixed Good and Choice 2-3 975-1250 lbs. Wednesday 50.50-52.50. Good 48.00-51.00. Few Standard and Good 45.00-48.00, some Good and Choice 1425 lb. Holsteins 49.00 Wednesday.

Average of LS-214, detailed quotations, for Choice 900-1100 lb. steers this week 52.80; Choice 1100-1300 lbs. 53.40. Average weight steers first three days 1134 lbs. as compared 1154 lbs. previous week. Average weight heifers first three days 977 lbs. as compared 989 lbs. previous week.

HEIFERS: Choice 2-4 900-1050 lbs. at midweek 50.50-52.50, few loads 975-1050 lbs. with end of Prime early Wednesday 53.00-53.50. The week's high on Choice and Prime Monday and Tuesday 54.50, but 51.00 on Thursday. Also Thursday, part load Choice 3 900 lbs. 49.00, part load Mixed Good and Choice 2-3 875 lbs. 47.00. Choice 2-3 850-925 lbs. 49.00-51.00 at midweek. Mixed Good and Choice 2-3 850-1050 lbs. Wednesday 48.00-50.00. Few Good 45.00-49.00.

COWS: Utility and Commercial 2-4 closed 36.00-37.50, few 38.00-38.50. Cutter 35.00-36.00. Canner and Low-Cutter 31.50-35.00.

BULLS: Early, 1-2 1100-1800 lbs. 44.00-48.00, individual 1 49.00. Few late sales 1-2 1100-1800 lbs. 43.00-46.00.

FEEDERS: Few loads Choice 1000-1075 lb. fleshy steers late 50.50-52.00.

Oklahoma Cattle

June 22, 1978

Thursday Feeder Cattle Auction estimated receipts 5,500, same day last week 6,339.

Moderately active, feeder steers under 700 lb. near steady, feeder steers over 700 lb. .50 to 1.00 lower; feeder heifers steady to weak; majority receipts choice 450-800 lb. feeder steers and 400-650 lb. feeder heifers; moderate attendance buyers.

FEEDER STEERS: Choice 400-500 lb. 62.00-64.00; 500-600 lb. 57.75-62.50; 600-700 lb. 55.00-58.75, small lot 601 lb. at 59.60; 700-800 lb. 53.00-55.00; few 800-985 lb. 51.75-54.75; Mixed Good and Choice 300-500 lb. 57.75-59.25; 500-700 lb. 52.00-54.50; 700-920 lb. 50.50-52.50; Good 500-700 lb. 49.75-52.50, small lot 491 lb. 56.25; 700-930 lb. 48.75-50.50; few Good 470-925 lb. Holstein steers 44.25-49.75.

FEEDER HEIFERS: Choice 300-500 lb. 55.00-56.50; 500-600 lb. 53.00-54.00, part load 518 lb. at 56.00; 600-700 lb. 50.75-52.50; Mixed Good and Choice 300-600 lb. 50.00-52.50; 600-700 lb. 49.50-50.50; Good 300-500 lb. 48.50-50.75; 500-700 lb. 46.00-49.00.

FOR THE WEEK: Compared to late last week, feeder steers under 700 lb. .50 to 1.00 lower, feeder steers over 700 lb. 1.00-2.00 lower; feeder heifers .50 to 1.00 lower; slaughter cows closed steady to .50 lower, late sales Utility and Commercial 2-3 35.00-38.75, Cutter 1-3 32.00-35.75; bulls closed .50 to 1.00 lower, late sales YG 1-2 1000-2000 lb. 42.50-48.00; salable receipts near 14,300 head, compared to 15,675 head last week and 22,548 head the same week a year ago. Cows and bulls near 19 percent of cattle receipts, feeders near 81 percent of the total.

US No. 1-2 200-230 lbs. barrows & gilts 50.00-52.50, No. 1-3 195-240 lbs. 48.00-51.25, No. 2-3 190-250 lbs. 47.00-49.00, few No. 2-4 250-300 lbs. 43.00-47.75, few No. 1-3 130-185 lbs. 40.00-48.10. SOWS steady. US No. 1-3 300-550 lbs. sows 39.00-46.00, few No. 2-3 400-600 lbs. 35.00-40.00. BOARS 30.00-40.00 few down. to 23.00.

FEEDER PIGS 1613. Compared to 1584 last week and 1938 a year ago. Steady. US No. 1-3 25-35 lbs. feeder pigs 22.00-40.00 per head, No. 1-3 35-50 lbs. 35.00-50.00.

GRADED FEEDER PIGS 2785. Compared to 2864 last week and 3181 a year ago. All prices per hundredweight. Steady to weak.

US 1-2 25-40 lb. 85.00-110.00; 40-50 lbs. 90.00-110.00; 50-65 lb. 75.00-96.00; 2-3 25-40 lb. 75.00-95.00; 40-60 lb. 60.00-90.00.

SHEEP 984. Compared to 744 last week and 948 a year ago. Spring slaughter lambs 4.00-6.00 lower. Choice 60-110 lbs. 50.00-62.50, good 60-100 lbs. 45.00-55.00. Slaughter ewes 10.00-26.00.

St. Louis Cattle

National Stockyards June 22, 1978

Receipts this week	4,700
Week ago	5,300
Year ago	5,800

Compared last weeks close, slaughter steers 3.00-4.00 lower, most decline on high choice and prime. Slaughter heifers 3.00-3.50 lower. Cows steady. Bulls weak. Sharp downturns in slaughter steers and heifer prices early in the week apparently were the result of recent sharp declines in the wholesale carcass trade and live buyers attempting to adjust their live costs accordingly. Slaughter supply mainly choice and mixed choice and prime 2-4 1050-1300 lb. steers, about 25 per cent heifers and 15 per cent cows.

SLAUGHTER STEERS: Mixed Choice and prime 2-4 1050-1300 lbs. 55.00-55.75, small lot 56.00. Choice 2-4 950-1350 lbs. 53.00-55.50, mostly 53.00-55.00. Mixed good and choice 2-3 900-1150 lbs. 52.00-53.50. Good 2-3 900-1100 lbs. 49.00-52.00. Few lots good and choice 2-3 1100-1150 lb. holsteins 49.00-50.00. Few standard and good 2-3 1050-1500 lb. holsteins 46.00-48.00.

SLAUGHTER HEIFERS: Couple loads mixed choice and prime 2-4 900-950 lbs. 53.50-54.00. Choice 2-4 800-1000 lbs. 51.50-53.50. Mixed good and choice 2-3 700-950 lbs. 50.00-52.00. Few good 2-3 700-900 lbs. 48.00-50.00.

COWS: Utility and commercial 2-4 36.00-39.00. Boning utility 1-2 39.00-40.00. Cutter 1-2 34.00-38.00. Canner and low cutter 1-2 30.00-34.00.

BULLS: Yield grade 1-2 1050-1700 lbs. 44.00-47.00, individual yield grade 1 1600 lbs. 48.00. Few yield grade 1-2 900-1000 lbs. 41.00-43.00.

FEEDERS: Including around 800 at Thursday's auction. Feeder steers and heifers 1.00-3.00 lower, large share fully 2.00 lower. Demand moderate at best for bulk of offerings. Supply mainly choice and mixed good and choice 500-650 lb. steers and 400-600 lb. heifers.

FEEDER STEERS: Few lots Choice 360-460 lbs. 60.00-60.25; 500-650 lbs. 54.75-59.50, load 800 lbs. 55.50; few lots 900-1000 lbs. 48.00-51.25. Few lots mixed Good and Choice 300-400 lbs. 54.25-57.25. Few Good 375-425 lbs. 52.25-54.25. Few lots Standard 550-970 lb. Holsteins 44.00-46.75.

FEEDER HEIFERS: Few lots choice 300-500 lbs. 51.00-52.25; 500-600 lbs. 49.75-51.75. Mixed good and choice 300-500 lbs. 47.00-50.75. Few good 300-500 lbs. 45.00-48.00.

Small lot good 4-5 year old stock cows with calves at side 345.00 per pair.

ANNOUNCING

QUEEN ROAD REFRIGERATION

IS NOW AN AUTHORIZED DISTRIBUTOR FOR

VM Diesel

"THE DIESEL WITH A DIFFERENCE"

Cuts your power costs because it's way ahead of its time on all points.

AVCO-VM diesel engines are world-proven money-savers. They deliver maximum power efficiency immediately, under any sudden load or climate variation. Their higher power to weight ratios mean NO REDUCTION IN HORSEPOWER to qualify for pollution standards.

They're stingy on fuel, too. Many users report fuel consumption CUT IN HALF — and more — compared with gasoline engines. In some installations, our diesels are delivering more than TWICE the hours of operation per gallon of fuel.

Faultless performance is the norm, rather than the exception. A choice of 27 premium quality air-cooled Avco-VM's (5 to 670-hp) means there's one that's right for your application.

Modular, unitized construction means fewer specialized parts, lower weight per hp, lower maintenance costs, 70% parts interchangeability — and they'll fit the tightest space.

24 HOUR SERVICE

Life on the farm By Dieter Krieg

The large barn doors were swung open and warm, bright sunshine touched the cool, dirt floor of the shed. The songs of birds erased the silence; dust danced in the shaft of sunlight, and the pleasant scent of hard clay became less pronounced. It was time for an awakening

The big machine had been in hibernation for nearly a full year and was covered with dust, pigeon droppings and cobwebs. There was no burst of energy when the key was turned to "awaken" this mammoth of the farm machinery kingdom. A squirt of ether into the "nostrils" sparked life into it and before long the engine was coughing and sputtering, filling the top portion of the shed with grey-blue smoke.

Like a big, sleepy bear crawling out of it's cave in the Spring, the combine advanced slowly towards the open doorway and the warm, bright sunshine - being careful not to scrape the sides of the exit. It rested outside beneath a tree for several minutes, flexing its "muscles" while its owner checked for proper belt tension, control responses, etc.

After a big drink at the gas pump and a thorough going over with a grease gun and oil can, the big monster was ready to go to work. Soon, with engine roaring, the combine will paddle its way across the sea of wheat, hungrily devouring the crop. It fills its belly with grain and eliminates straw from the rear

The waves of grain will gradually disappear and then only the stubble remains. Thank God, however, there'll be more next year to add beauty to the countryside, provide the population with bread, and give rise to a special inner joy to a farm lover like me.

Livestock market and auction news

Valley Livestock

Valley Stockyards
Athens, Pa.
Monday, June 19

Reported receipts of 294 calves, 108 cows, 104 hogs, 36 heifers, 9 sheep, 18 lambs, 29 bulls, and 2 steers. Cattle market stronger and calf market strong.

Veals 62.00-85.50; bobs, 90 to 110 lbs. 59.00-67.00; bobs, 80 lbs. and down 48.00-59.00; grassers and feeders 30.00-44.50; lambs 42.00-60.00; sheep 18.00-20.00; hogs, 200 to 250 lbs. 44.00-50.00; sows 35.00-37.00; boars 32.00-38.50; pigs 13.00-38.00; heifers 40.50-54.90; steers, good 45.00-46.00; bulls 42.50-53.25; cows, good 39.50-43.50; cows, medium 33.00-39.25; cows, poor or small 22.00-33.00; ponies 11.00-20.00; goats 12.00-25.00.

Ocean Disposal

SEE YOU AT THE BUCK!

Figure it for yourself.

You get better feed conversion and lower cost of gain with corn-soy and Vigortone.

If you're feeding hogs from birth-to-market, corn-soy and Vigortone will make you more money. Your figures will prove it.

Start out with more uniform litters at less cost with Vigortone's Sow Prep No. 4A. When feeding less than four lbs. of feed, use Sow Prep No. 54. You'll have big savings over self-feeding programs.

Then, save 50% on your pre-starter rations with Vigortone's Creep Wean No. 3. This highly potent pre-mix contains vitamins, minerals and amino acids that assure fast growth right through weaning. Your baby pigs will really go for this highly palatable pre-starter because you grind and mix it yourself — fresh.

Add your choice of antibiotic to your pre-starter, or use Creep Wean No. 3C with Mecadox.* It controls swine dysentery and bacterial swine enteritis.

At 45 pounds, put your pigs on Vigortone 16% starter ration. Your cost of gain will be lower, because you again prepare it yourself using homegrown feedstuffs and Vigortone.

Keep your pigs on corn-soy and Vigortone right on through growing and finishing. Your hogs are assured the essential balance and levels of amino acids, major minerals, trace minerals, and vitamins.

Make more money this year by lowering your feed costs from birth-to-market. Feed Vigortone fortified corn-soy rations.

Now is the time to compare

See your Vigortone dealer soon. He's ready to compare the performance of Vigortone's low-cost swine feeding programs with any other you name.

Winners named in livestock competition

YORK – The Junior Livestock Field Day was held at Penn State on June 17. The program started out with a Judging Contest with 23 counties represented and approximately 165 members participating in the contest. James Caudill, Airville R2, was high individual with a score of 387 out of 400; second place was Lisa Dobrosky, Glen Rock R2, with 375; Diane Krouse, Lehigh County was third with 371; Chris Sunday, York R1, was tied for fourth place with 369; and Brian Utz, Hanover R2, was tenth with 363.

In the Swine Derby, Steve Trosle, Red Lion R2, placed fourth. In the Beef Showmanship Contest, David Wise, Spring Grove R2, was second in the first group of showmen 14 years and up. In the second group of Senior Showmen, Terri Lehigh was second, East Berlin R2; and Chris Klinedinst, Wrightsville R1, was third. In the third group of Senior Showmen, Leroy Bowles, Red Lion R2, was second. First Place Senior Showman was Dale Reigns, Mercer County; second was Bob Hess, Lancaster County; third was Terri Lehigh, East Berlin R2; David Wise, Spring Grove R2, was fourth; Leroy Bowles, Red Lion R5 was fifth. In the first group of the Junior Division, Chris Shive, Seven Valleys R1, was third; and Jim Caldwell, Windsor R1, was fifth. Second group in the Junior Division, Bob Livingston, Dover, was first; Tammy Eisenhour, Wellsville R1, was third; and Bill Wise, Spring Grove R2 was fourth.

The top five Junior Showman was Chad Cash, Centre County; second place went to Bob Livingston, Dover; and third place was Tammy Eisenhour, Wellsville R1; Chris Shive, Seven Valleys R1, was fourth.

In the sheep Showman contest, Susan Janney, Brodbecks R1, was first in the Jr. Division; Mark Ebaugh, Delta R2, was second; and Shane Sidenstricker, York was third. In the Senior Division, Laurie Dobrosky, Glen Rock R2 was first; Jon Janney, Brodbecks R1 was second; and Charla Janney, Brodbecks R1 was fifth. The champion sheep showman was Laurie Dobrosky, Glen Rock R2; and reserve champion showman was Jonathan Janney, Brodbecks R1. The rest of the program was on mini-workshops on the different phases of livestock management.

Ayrshire breeder award given

BRANDON, Vt. – The Ayrshire Breeders' Association announced that Harold R. Kulp, Pottstown, qualified for his second Constructive Breeders Award during 1977. The award is presented each year.

In winning this award, the Kulp Ayrshire Herd maintained a mature equivalent production average of 14437 pounds of milk and 564 pounds of butterfat, and had an average classification score of '84.0' on 19 head of cattle. Twenty-six Ayrshire Breeders nationwide qualified for this prestigious award in 1977.

The Constructive Breeders Award is presented by the Ayrshire Breeders' Association to honor Ayrshire Breeders enrolled on the Official DHIR testing program and who regularly have their herds classified for type. To qualify, the majority of the Registered Ayrshires in the herd must be bred by the owner and they must maintain a high level of type and production.

On June 3 33 heifers were gathered for the first shipment of animals to Heifer Project International. Clarence Keener, Sr., who heads the project in the area, is pictured, here, looking over this year's first group. The animals are destined for Tanzania, and were rounded up on the farm of Clarence Keener, Jr., near Manheim.

MEDICINE AND MANAGEMENT

By CARL TROOP, VMD

Metric system will be costly to farmer

Since the heading of this column is Medicine and Management we are going to take the liberty in this one to journey from the world of medicine to a critical situation which is affecting the management and profitability of every farm in this country.

There is, at the present time, a determined effort by a certain segment of the population to introduce the metric system to the citizens of this country.

Why, I need to ask, are we abandoning a system which has served us quite sufficieny.

Now I do understand all of the arguements for the advantages of the metric system and it's effect with world trade and all of that. And if we had had this system of measurement all along I am sure that few of us would find fault with it. But the fact is we are not using it and are using a system which few of us in the real working world ever had any concern about being inadequate for any reason.

The metric system has always been there, it is not something new. Indeed, in medicine and the measurement of drugs the metric system is used and serving them well.

But how many of us have stopped long enough to consider the consequences. Just about everything the farmer purchases is measured in the old English system. All the equipment used is produced in shops tooled in this system. All production records are recorded, all computers programmed, all tools produced using these measurements. Can you imagine the expense of retooling the entire farm equipment industry to produce bolts, tolerances, etc. in the metric system? The cost would be astronomical. And guess who is going to end up paying for it. Crop records, production records for generations have been recorded and stored, now a way will need to be found for comparison with future measurements. Computers will have to be reprogrammed, entire record keeping systems revamped and the cost, of course, will be passed on.

And won't it be fun for every farmer to now need to keep two complete sets of tools to cope with all the new metric and old English nuts and bolts they are going to have to fight with. No wonder the tool industry isn't putting up any fuss. The list goes on and on. One only has to stop and think for a little while to realize how all these changes are going to affect not only costs, but gross inefficiency for some time to come. And for what benefit?

There is already a movement on in this country to stop this monstrosity enacted upon us by our legislature apparently against the wishes of the majority of the people. But you have to be heard from. Write your congressman. Let him know why you are opposed. Point out the effect this is going to have on the cost and efficiency. Inflation is bad enough without adding artificial costs on top which are not necessary. It is not yet too late. But that time is rapidly approaching.

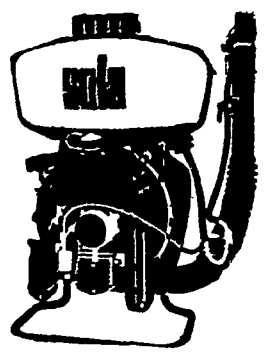
MISTBLOWERS AND SPRAYERS

ARE IDEAL FOR SPRAYING CROPS, ORCHARDS, VINEYARDS, TOBACCO AND CHRISTMAS TREES

SEVERAL MODELS TO CHOOSE FROM



SOLO 410/423

3 HP & 5 HP Models Available

spraying distance up to 35 ft.

adaptable for dust, liquid, granuals

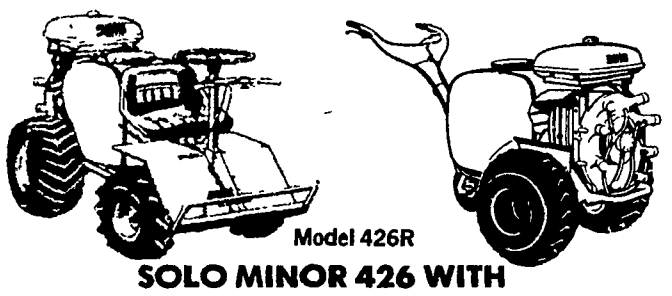
SOLO 451 / SOLO 452

- 451 Model features standard centrifugal pump.
- 452 Model features a 285 psi heavy-duty piston-activated diaphragm pump in lieu of the standard centrifugal pump. Outlet for high pressure hose.

- Only 20 H.P. tractor required.
- MINOR herbicide boom, ULV and dusting attachments can be used.
- Air Velocity = 200 mph.
- Reach - 21 ft. (451); 27 ft. (452).
- Net weight, empty: 155 lbs. (451); 165 lbs. (452).

MIST BLOWERS

SELF PROPELLED RIDING OR WALK-IN FRONT MODELS



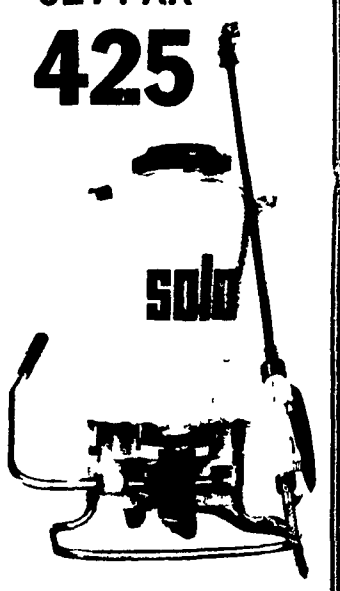
Model 426R

SOLO MINOR 426 WITH 120 LITRE/32 GAL. TANK

- Engine - Air cooled SOLO 209 two-strike 21 cc. 12½ H.P.
- Transmission - Two speeds each forward and reverse.
- Tires - 4:00-12AS all-terrain cleats (standard) or optional 21x12.3 Rear, 6x6/AM Front ATV flotation, wheels which are interchangeable with standard wheels.
- Air Velocity: = 200 mph.
- Air Volume - 89,000 cu. ft./h.
- Reach - 20 ft. to both sides or up.

Optional Flotation Tires For All-Terrain Operation.

JET PAK **425**



8 lb. hand sprayer for gardens, patios, nurseries, forestry work, lawn grooming, mosquito control, disinfecting, whitewashing. Jet Pak 425 is light weight, low priced, maintenance free, has high impact plastic tank and padded carrying straps.

Farmers invited to join egg co-ops

By DIETER KRIEG

BIRD-IN-HAND – Egg producers from Lancaster County and surrounding areas were invited to join a regional and national egg producers' cooperative on Tuesday evening. More than 140 egg farmers from the area attended a 4-hour meeting here that was designed to give eggmen a thorough glimpse of what egg organizations can and could do for them.

"We're amazed at how many of you people showed up here tonight; we didn't expect half this many," noted one of the dozen or so speakers who were on the program. The good turnout was taken as a sign that area egg producers felt a need to consider joining an egg cooperative. The response both during and after the meeting was regarded as generally favorable. Several eggmen in the audience questioned cooperative programs and resulting discussions seemed to spur additional interest.

The two organizations which sponsored the area meeting were the Northeast Egg Marketing Association (NEMA) and United Egg Producers, (UEP). NEMA is one of five regional egg organizations which make up UEP. Membership in the regional group automatically includes membership on the national level. Both devote their time to marketing, promotion, public and governmental relations, and numerous other activities aimed at the common good of the industry. UEP was recently named the outstanding marketing organization among farmer cooperatives.

Among the officials who invited southeastern Pennsylvania egg producers to join NEMA and UEP were, left to right, Bill Rent, general manager of NEMA; Harry Muller, president of UEP; Greg Murch UEP marketing director; Christine Bushway, AEB promotions coordinator; Charles O'Reilly, NEMA regional manager; and Al Wenger, Dutchland Farms, who will be NEMA president in October.

UEP represents 35 per cent of the egg producers in the United States and 65 per cent of the nation's egg production.

Donald Horn, vice president of Pennfield Corporation, Lancaster, and a NEMA-UEP member, welcomed the group, noting that he was well pleased with the "extremely good attendance." In giving a brief introduction on the purpose of NEMA and UEP, Horn emphasized that the cooperatives' primary objective is to work for the highest possible price in relation to current supply and demand situations. He added, however, that this does not guarantee a profit. Someone in the audience got up and reasoned "We can't have the freedom to prosper without having the freedom to lose. We can't have one without the other."

Audience particiapation during the lengthy meeting was strong. Several among the group who were NEMA - UEP members spoke in behalf of the organization. A few questioned programs and purposes of both UEP and NEMA. Nonetheless, all were invited, and even strongly encouraged to join the organizations.

One gentleman questioned the value of advertising and promotion, claiming that although it would increase sales, production would also increase and the overall economic situation wouldn't improve. "What we've got to do is control production," said someone else. While that isn't likely to happen since producers want to keep the right to expand as they see fit, UEP marketing director Greg Murch explained that promotion and advertising programs would lead to a healthy industry.

Al Wenger of Dutchland Farms, Elizabethtown, is a NEMA member and president-elect. According to him, the pressures facing individual egg producers are such that each could succomb. "The rope can hang us all individually, but there isn't a rope strong enough to hang us all together," he exclaimed. "We've got to protect our industry for ourselves and our families."

Wenger also noted that NEMA and UEP came to Lancaster because the organizations have recognized the importance of the egg industry in this area. With poultry houses going up rapidly, NEMA and UEP directors

"PUSH BUTTON" DRYING

U S Patent Number 3563399

SHIVVERS CIRCU-LATOR

Circu-Lator tranforms your drying bin into a totally automated Continuous Flow System with drying capacities of 1,600 to 6,000 bushels of corn per day (25% - 15%) depending upon bin and fan size. It dries high moisture grain (30% and above) with ease, and operates around the clock without babysitting.

With the Circu-Lator, your entire bin becomes a surge tank — fill it as fast as you harvest. When adjacent storage bins are full, the Circu-Lator becomes a high capacity Recirculating Batch Dryer which may be rapidly filled to the eaves.

Check into the Circu-Lator. See why the Best Continuous Flow System is also the simplest and least expensive.

Financing arranged through ASCS, Production Credit, leasing companies or your local bank.

REVERSE CAGE 83,000 LAYER SYSTEM

IN MANHEIM - MOUNT JOY AREA

WATCH NEXT WEEK'S ISSUE FOR MORE DETAILS.

Their main crop is ringneck pheasants

Posed at the edge of the brooder house door, these young pheasants can't seem to make up their minds whether they should stay in the safety of their home or venture into the great outdoors.

By KENDACE BORRY

MOUNT JOY — Living on a farm of 13 acres, Edward Sweigart and his wife Daisy, who are located near Mount Joy in Lancaster County, decided many years ago to take up a different kind of farming. Their crop is ringneck pheasants and they raise close to 10,000 of the birds a year.

On a pheasant farm, things start to get busy around the end of April for that's when the hen birds start to lay their eggs. From then through mid-July, they will continue to lay, and the first chicks are born May 15.

Five hundred hens and 50 cockbirds are selected each Fall for use in the egg hatching operation. Kept only one year, a new selection of young birds will take place during the Autumn months and these will be the parent stock of the next year's crop of young pheasants.

The pheasant eggs are gathered by hand from the egg laying cages which are modelled after chicken laying houses. Then they are taken to the incubator where they are kept for 21 days. From there they move to the hatchery, where for three days they remain, until they hatch.

Because of the capacity of his egg incubator, Sweigart tries to hatch all his pheasant eggs. He stated that approximately 60 to 65 per cent of his eggs hatch live birds.

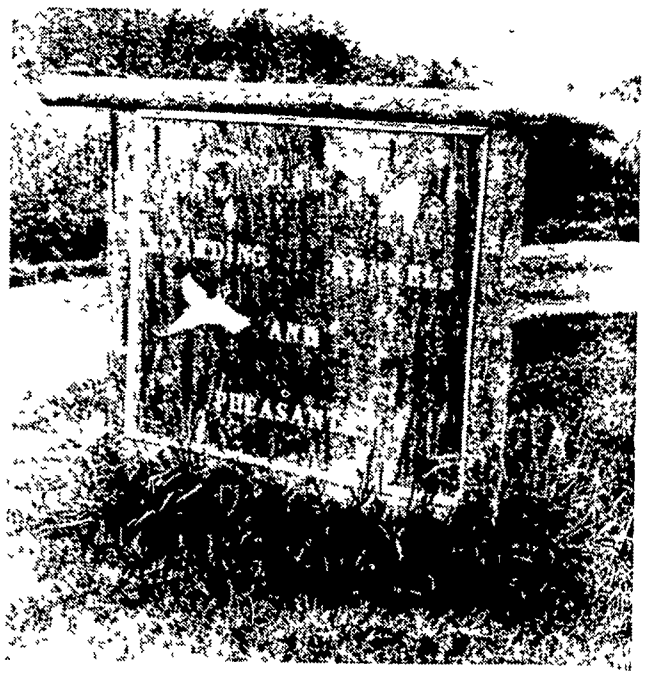
After hatching, the young birds are taken to the brooder houses where the temperature is kept at 100°F. for the first week, and then dropped five degrees each week thereafter to harden the young birds off. After four weeks, the birds receive no heat at all.

When the birds are three weeks old, Sweigart starts to leave them ouside in wire enclosed pens which allow them to return to their brooder houses, giving them the choice of either their natural environment or the safety of the shelter.

But when these young pheasants are first allowed out, they need special care. Each night and before any rainstorm they must be driven back into their shelters. The wetness and chill of the night and storms can greatly harm unprotected pheasants, wiping out the majority of the flock within a short time.

By age six weeks, the pheasants, which are now beginning to resemble the parent birds, are given free choice to roam in and out. And at eight weeks of age, they are driven out into the growing pens, where they will live until the time comes for them to be sold and delivered to their new homes.

(Turn to Page 23)



Named after its owners, the D. & E. Pheasantry sells its pheasants both live and dressed. The owners also run a boarding kennel for pets.

Hay season looks good so far

(Continued from Page 1)

o were complaining about t

The rain was praised, ough, too, for helping ke the hay crop a good . "This wet Spring sure ped my hay crop," a thern Lebanon County mer said. "I got my first ting of alfalfa in about three weeks ago, and now the rain we had this week is sure bringing my second crop along nicely. It won't be too long before I'm ready to cut it again."

Dick McDonald, market specialist for the Pa. Dept. of Agriculture, who works with hay prices, related that he thought hay prices will depend a lot on what kind of season it will be.

"So far I'd say it's been a real good hay season, with some nice hay harvested" he noted. "This rain that we've been having sure should help the second cutting, too. I think most of the first cutting of alfalfa is in in southern Pa., but there still is a lot out in the northern part of the the state."

"There seems to be a fair number of loads of hay running through the markets right now," he added. "But most of the better alfalfa will come off in the second, third, and fourth cuttings so we'll just have to wait and see what it looks like. I know hay buyers want lower prices but whether they'll get them next Winter or not is hard to say now."

At the different hay markets around the Lancaster Farming area, new hay was reported sold.

During the week of June 19, the regional hay market which reports the prices for southeastern and south-central Pa. reported that new crop alfalfa was bringing $50 to $65 per ton. New crop timothy was priced at $45 to 50 and new mixed hay brought $50 to 60.

Norman Kolb, from the New Holland Sales Stables, reported that good new hay has been bringing as high as $100 per ton. But he also added that hay with a high moisture content was only bringing $40 per ton or less. An average price for the new hay he thought would be between $65 and 90 per ton.

If not affected by the rain, he thought first cutting hay looked good, and he said the second crop seems to be shaping up the same way, calling it "fair" at the moment. He too said that future hay prices will just depend on what type of hay season 1978 will turn into.

"People bringing in this hay with a high moisture content can't sell that for horses," Kolb related. "It's just not good for horses and I hate to see it go for that, but now cows aren't as particular so you'll see a lot of dairies using that kind of a hay."

Prices at New Holland this week ranged from $50 to 86 for alfalfa; $27 to 92 for mixed hay; and $40 to 111 for timothy; but these prices included both loads of new and old hay.

Robert Frame, representing the Vintage Sales Stables, summed up the new hay as "some of it good, and some of it not good".

"The prices for hay have fallen, " he related, "and those who have been selling the hay are spoiled by the past high prices. They don't want to sell it now. If the weather continues as it is and we have a good season for making hay, I don't think we'll see the high prices next year that we had last Winter. There should be more hay available."

Prices for the new hay at the Vintage Sale Stables ranged from $52 to 72 per ton.

Certain Odds

At a well-known gambler's funeral, the preacher observed "Johnny's not dead, he only sleeps." One of the deceased's partners then mumbled· "I'll lay you one-to-five that he's dead."

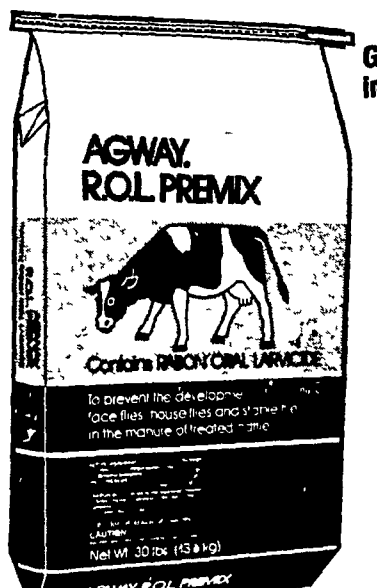
Fly Control You Can Count On

R.O.L. PREMIX (with Rabon®)



Good fly control can increase milk production and improve weight gain. That means added profits.

R O L Premix can give you the fly control you need R O L controls horn flies face flies house flies and stable flies R O L is the first oral larvacide cleared for feeding to lactating dairy cattle With R O L there s no withdrawal time required for beef

Follow these Agway recommendations for maximum benefit:

- blend R O L with grain or protein supplement and feed as part of the regular ration
- begin feeding R O L on April 15 in the southern part of Pennsylvania, Maryland and New Jersey and continue throughout the fly season
- practice good housekeeping and manure management
- use supplemental fly control to kill flies which breed in untreated areas

Feed R O L. Premix - for fly control all season long See your Agway Salesperson for details Always read and follow label directions

Larry and Yvonne Mummert of East Berlin R2.

Mummert, a 1962 graduate of Spring Grove High School, won the coveted honor for Inter-State Milk Producers Cooperative. The Stonesifers captured the title among contestants who are members of Maryland Cooperative Milk Producers, Inc.

Graybeal, a 1963 graduate of Solanco High School, was a runner-up in last year's contest. He, his wife, as well as the other winning couples will attend the National Milk Producers Federation meeting in Seattle this November. There were 15 couples entered in the contest which the Graybeals won. Placing second were Douglas and Evelyn Perrow of Spout Spring, Va. Third were Larry and Mary Ann Kulp of Martinsburg, Pa., and fourth were G. Edward and Mary Jo Fiedler of Bel Air, Md.

In the MCMP contest, Jay and Illona Hull, Jr. of Westminster, Md. placed second while Denise and Richard Burns of Jefferson, W.Va. placed third. Twelve couples were entered in the MCMP contest.

Inter-State's finalists included, in order, Robert and Penny Black of Altoona, Thomas and Dale Smith of Allentown, N.J., James and Barbara Long of Peach Bottom, and Donald and Sherry Ann Hoffer of Lebanon. There were 22 couples entered in the Inter-State contest.

All of the entrants were honored during ceremonies held here at the resort motel and restaurant. The two-day Pennmarva convention featured several guest speakers, including Donald Shriver of Ohio who encouraged the several hundred guests to follow the example of Californians in letting their legislators know what they think of government regulations.

Slaughter steer prices lower

(Continued from Page 1)

Choice, mainly 2, weighing 1100 to 1225 lbs. brought $54.75 to 55.75.

According to the Lancaster Weekly Livestock Market, which is dated June 23, and bases its reports on markets held in Lancasster County for the first three days of the week, prices compared to last week's close for slaughter steers were down, $1.50 to 2.00 lower.

The report relates that high choice and prime 3-4 slaughter steers weighing 1100 to 1325 lbs. brought $54.50 to 57.00; with a few in the early part of the week bringing $57.00 to 58.35. Choice steers, 2-4, weighing 1000 to 1375 lbs. brought $53.00 to 56.00, with sales on Monday and Tuesday mainly $55.50 to 57.50.

The Lancaster Weekly Livestock Market states that slaughter heifers were steady, cows were fully steady, bullocks were steady to $1.00 higher, and bulls were $1.00 to 1.50 higher.

For a more complete check on the prices of slaughter steers this week, check the market listings which start on page 2.

On the Futures market, cattle prices were also lower this week. Chicago cattle prices for August were quoted at 49.60, as of closing bids on June 22, down from 52.15 last week.

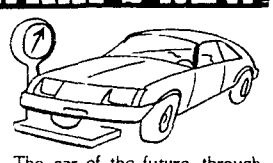
One commodity specialist stated that he believed that lower prices are due to farmers who have accumulated a lot of cattle and have now decided to sell them, some panicking when the price began to drop. They decided to sell their cattle now rather than take the chance of getting a big loss later.

One commodity specialist foresees higher prices in the future for he thinks the packers are empty, right now refusing to pay the high prices that the cattle are bringing.

One day soon, he thought the prices will go up again, as the packers will have to buy the meat needed.

Looking further ahead to the future, he predicts that prices for the slaughter steers will continue to rise, due to the national supply. There just aren't going to be enough cattle around and it isn't possible to replace them as quickly as they will be needed, he related.

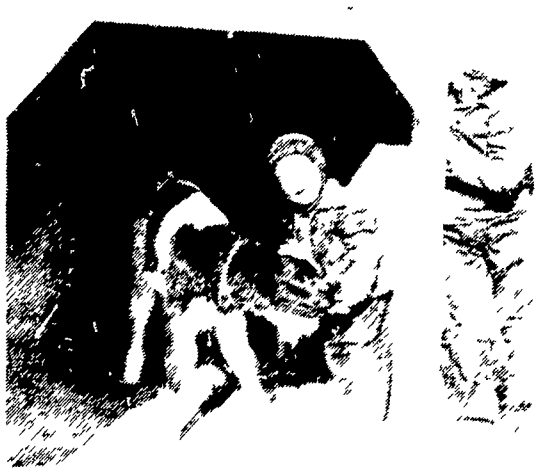
WHAT'S NEW



The car of the future through greater use of high strength super plastics will be lighter than ever According to a fiber glass industry spokesman first production parts made of new super plastics material should be on the road by 1980 offering a weight savings of 50 per cent or more per part This will mean cars no longer will need heavy springs heavy shock absorbers and similar items which add to total weight and costs

Auto makers believe lighter materials will help them meet federal regulations requiring a fleet average fuel economy of 27 5 miles per gallon by 1985

CUSTOM BUILT CALF HUTS
MADE TO ORDER



Build a separate pen in front of each calf Space each pen and calf far enough apart from the next unit to keep each calf separated from its neighbor This isolation of each unit is very important It helps prevent the spread of infectious diseases

Straw or other suitable bedding is used for the floor The calf is a proven design that provides a dry, draft-free shelter for the animal The result a much healthier calf!

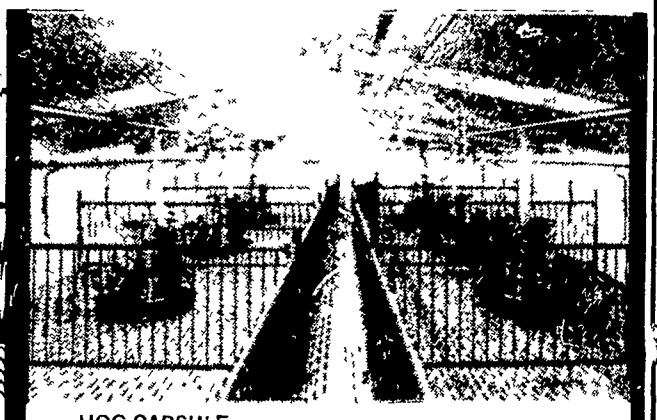
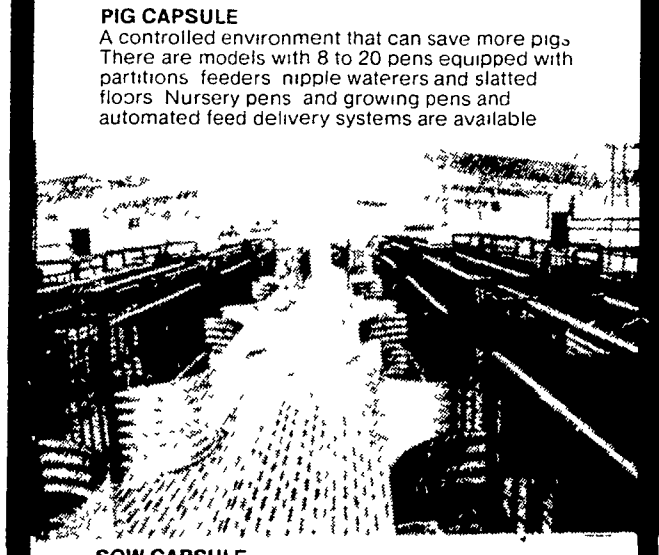
Make plans for a swine confinement building that is right for your operation.

What an AG Best Capsule will do for you.
• Provide uniform air distribution. No drafts • Provide 2 environments within one environment for sows and pigs • Reduce feed wastage and cost • Reduce your labor and time • Reduce stress to a minimum • Provide comfort for the operator • Provide heavy insulation for less energy use • Provide all the tools needed for good management.
There are many Pig Capsule models for farrowing, growing and finishing. So plan on a building that is made right to do the right job for you

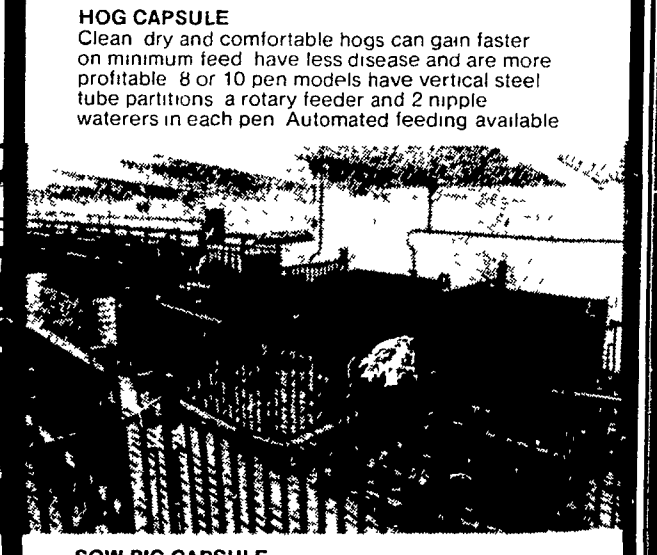
PIG CAPSULE
A controlled environment that can save more pigs There are models with 8 to 20 pens equipped with partitions feeders nipple waterers and slatted floors Nursery pens and growing pens and automated feed delivery systems are available



HOG CAPSULE
Clean dry and comfortable hogs can gain faster on minimum feed have less disease and are more profitable 8 or 10 pen models have vertical steel tube partitions a rotary feeder and 2 nipple waterers in each pen Automated feeding available

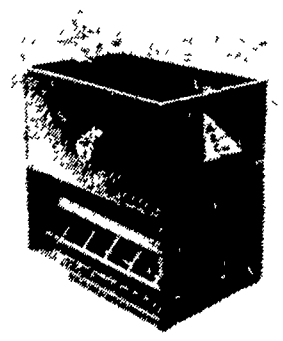


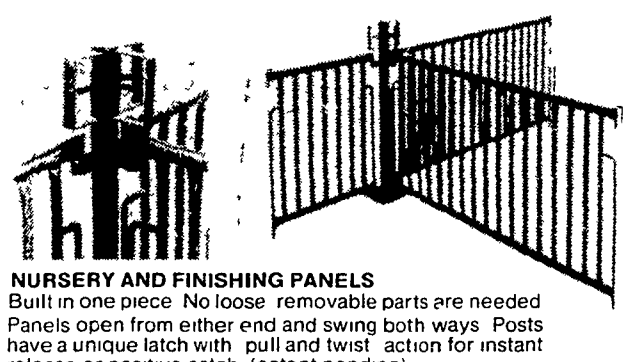
SOW CAPSULE
A healthy environment that helps wean more pigs per litter and cuts down on the labor needed to do the job There are models with 4 to 24 farrowing stalls that have built-in feeders watering cups and easily adjustable side panels



SOW-PIG CAPSULE
A good farrowing system for medium or small operations A farrowing building is combined with pig nursery pens You have choices of models from 4 farrowing stalls with 2 nursery pens to 16 stalls and 8 pens

The Ag Best nursery feeder has an expanded throat that helps eliminate packing and bridging An easy top adjustment regulates feed flow A step-back feeder design keeps manure from dropping in the trough Five partitioned feeding spaces on each side Capacity is 11 bushels Construction is 14-gauge welded steel





NURSERY AND FINISHING PANELS
Built in one piece No loose removable parts are needed Panels open from either end and swing both ways Posts have a unique latch with pull and twist action for instant release or positive catch (patent pending)

Ag districts considered

(Continued from Page 1)

to the county commissioners.

The proposal would then be submitted to the county planning commission and to the agricultural district advisory committee for evaluation of the land's suitability for becoming an agricultural district. Factors such as the viability of active farming in the area, the presence of other viable farm lands, the nature of other land uses in the area and county developmental patterns and needs would be considered in the evaluation.

The legislation requires public hearings on the proposal and also requires that the county commissioners take action on the proposal within 180 days of the date it was submitted.

Once created, an agricultural district would be subject to review every eight years, with a public hearing required 120 days prior to the end of the eighth year.

Wenger said that an agricultural district would be exempt from local ordinance, such as prohibitions against noise or odors, which would interfere with farming activities. Local laws could be enforced only in the interest of public health and safety.

Wenger further explained that condemnation of land within an established agricultural district would require the approval of the governing bodies of all municipalities in the district, the county commissioners and the agricultural district advisory committee.

"Essentially, this meaure would guarantee the same type of protection from local restrictions that agricultural lands are currently accorded from State restrictions," Wenger said.

"I am pleased that the House recognizes the importance of preserving our existing farmlands and farming operations, and I hope the Senate will give this measure swift consideration and approval."

The legislator said the special agricultural district advisory committee would consist of the Director of the Office of State Planning and Development, the Secretary of Agriculture, the Secretary of Environmental Resources, the Secretary of Transportation and two active farmers appointed by the Governor, with the advise and consent of the majority of the Senate, for a four-year term. According to the legislation, the Cabinet officer-members may assign designees to serve in their place.

Noah Wenger

Milk production up

HARRISBURG – Pennsylvania Secretary of Agriculture Kent Shelhamer reported that milk production in the commonwealth during April 1978 totaled 671 million pounds or 311 million quarts.

In a report compiled by the Pennsylvania Crop reporting Service, Shelhamer said, "Production was up one per cent from April 1977. The average production per cow was 960 pounds or 447 quarts this past April, up nearly two per cent from a year ago." There were 699,000 milk cows in April 1978 compared to 703,000 milk cows a year earlier.

Butter production in Pennsylvania totaled 3,690,000 pounds in April, up from 2,940,000 pounds produced a year ago. Ice cream production at 5,510,000 pounds was down from 6,060,000 a year ago.

United States milk production during April 1978 totaled 10,686 million pounds or 4,970 million quarts, down one per cent from a year earlier. US production per cow averaged 982 pounds or 457 quarts, up one per cent from April a year ago. Milk cows on farms totaled 10,883,000 head, down one per cent from a year earlier.

DEALER INQUIRIES INVITED

Every month is dairy month with us.

In June a lot of people pay tribute to dairy farmers. It's National Dairy Month

At National Central Bank, we feel you deserve credit a lot more often than that. Managing a successful dairy operation requires working capital all year round. So we're here to help you meet your capital requirements whenever you need us.

The total annual dairy output of our six county area is over $220,000,000. This represents more than a quarter of the yearly production for Pennsylvania. Now that's a record you can point to with pride, and we're proud to be able to help—anyway, anytime. At National Central Bank, every month is dairy month.

Contact your local office for complete details on National Central Agri-Finance Programs.

Their main crop is ringneck pheasants

(Continued from Page 18)

A mature pheasant is 18 eeks old but Sweigart lated that the pheasants e sold more by how they ok than by their age.

"If you have an 18-week- d bird that has broken athers, you can't sell it and pect full market value," explained. "So you are ry careful how you handle e birds."

He added that when the birds are young and handled quite a bit, that they aren't too wild. But as they are allowed out into their natural environment, their wild ways return, and they become aware of their natural enemies such as the hawks they see flying over the pens.

There are really two basic ways to market pheasants—as live birds to stock sports areas and as dressed meat. The Sweigarts utilize both markets.

"We advertise in sportsman papers," Sweigart related. "Prices are sent out in February for that year. And usually the first birds leave the farm around September 20."

"Your biggest birds will go to regulated shooting grounds," he continued. "They like to place their orders month by month and take what birds they need. Sportsman clubs usually like to buy the birds when they are 12 weeks old, and let the bird mature its last six weeks out in the wild, getting use to its natural environment."

The raising of pheasants is classified as a high risk business, Sweigart noted. "We pheasant farmers have an advisor at Penn State, Herb Jordon, who has a seminar on pheasant farming every year."

The reasons behind the high risk rating are varied. Pheasants are harder to raise than a normal poultry bird. There are many predators which endanger the flock, including the racoon, fox, skunk, and oppossum. There are also problems with two-legged predators, Sweigart added, telling how people will often let pheasants deliberatley escape from pens prior to hunting season.

Winter can be hard on the pheasant farm, also. Snow will stick to the fences covering the pens, and sometimes this will cause the pen to collapse on the pheasants underneath, killing them.

Besides this, the poultry netting that is used for the pheasant pens will only last for eight years before it has to be replaced. "It's a big investment with quick depreciation," Sweigart stated.

One aspect of his pheasant farm that Sweigart is very proud of is the way he has designed his pheasant runs so that they are all interconnected.

"I can move my pheasants from any area on the farm to another without having to crate them," he explained. "Every run and all the brooder houses are connected by a series of fenced-in runs that allows just a few people to move the birds with very little fuss."

His pheasant runs vary in length from 200 feet long to 500 feet long, and are all 24 feet wide. Sweigart stated that a mature pheasant needs 25 square feet of room to live.

He feeds his pheasants a turkey feed, starting them on a 28 per cent protein and then moving them over to an 18 per cent protein grower. The birds are started on automatic feeders and waterers at ten days of age.

The biggest concern facing Sweigart as a pheasant farmer is finding a market for his birds. He would like to build up his dressed bird market, noting that he sold 700 birds in this fashion last year, mostly through farm markets and local restaurants.

"Pheasants are very good eating, and I'd reccommend them highly to anyone," he said.

He and his wife also eat pheasant eggs, stating that they use them in all phases of cooking, except for hard boiling, since the shell is so thick. In fact, they say they like them better than chicken eggs, for they have a sweeter taste.

A mature pheasant live is worth around 4.50. Dressed birds sell for around 2.65 per pound with the wholesale price slightly lower.

Concern grows over foreign farm ownership

WASHINGTON, D.C. – Congress was told Tuesday that the need for reliable data on foreign investment in American farmland is "urgent."

The American Farm Bureau Federation asked a House subcommittee to recommend the immediate appropriation of the administration's request for $450,000 to fund a special study on the problem. Farm Bureau warned it is imperative that completion of the research not be further delayed.

Congress approved an International Investment Survey in 1976, but no funds were requested by the administration until this year.

Results of a survey by the General Accounting Office, released last week, were inconclusive due to the limited data on foreign ownership now available in federal, state and local government agencies.

Farm Bureau reported that public debate on the subject has been dominated by rumors and sensational stories of wealthy foreigners gobbling up U.S. farmland. The committee was told, "Hard facts are difficult to find. Foreign investors remain hidden in a maze of financial devices, including trusts, partnerships and offshore corporations."

The statement said, "Enlightened public policy at the state and local levels will not be possible until reliable data regarding foreign investment has been gathered and analyzed."

The AFBF statement followed the release of a report a week earlier by U.S. Senator Herman Talmadge, chairman of the Senate Committee on Agriculture, Nutrition, and Forestry. He released a General Accounting Office (GAO) report on purchases of U.S. farmland by foreign interests. He said that these purchases "are of national concern and raise serious questions of national policy."

The Georgia Senator, who asked the GAO in January to make the study, also announced that his Committee will "enlarge and intensify" the investigation of alien ownership of American farmland.

He outlined a six-point program for gathering additional data and information in order that the Agriculture Committee can "develop the fullest and clearest picture possible of the problem of foreign land ownership."

"This will provide a sound and rational basis for whatever legislative action might be needed to deal with this problem," Talmadge said.

The 65-page GAO study found that, although 25 states have legislation restricting alien farmland ownership, "state laws do not significantly inhibit foreign ownership of land." The agency said very little data on foreign land ownership now exists in Federal, state or local government agenices.

However, a spot check by GAO of 25 counties in five states turned up information indicating foreign ownership of 44,700 acres, 0.3 per cent of the total farmland in those counties. These states are California, Georgia, Kansas, Missouri and Oklahoma.

The percentage of foreign-owned land in the counties surveyed ranged from 1.5 per cent in Georgia to zero per cent in Oklahoma. In one Georgia county (Johnson), the GAO found indications that 6.3 per cent of all farmland was foreign-owned.

The GAO recommended that Congress consider legislation providing for a nation-wide registration system for foreign land owners similar to the alien registration system now used by the Immigration and Naturalization Service. The agency said this would place the reporting burden on the landowners and would require relatively little involvement by state and local governments.

In a statement releasing the GAO study, Talmadge said:

"This report, while necessarily inconclusive and tentative on some vital points, clearly confirms and underscores the concern and fears that many people have of growing foreign ownership and control of this country's greatest natural resource. When six per cent of the agricultural land of a single county in my state goes under foreign ownership, I say we have a problem."

To expand his Committee's investigation, Talmadge initiated the following actions:

(1) Asked GAO to continue its investigation and specifically to focus on nine states representing the various agricultural regions of the United States. He asked for land transfer data from several counties in each of the states in order to make "reasonable projections" of the extent of foreign land ownership nationally.

(2) Requested that the USDA Extension Service Directors in all 50 states ask local county extension agents to report any knowledge they may have of farmland purchased by foreigners.

(3) Requested the Administrator of the Agricultural Stabilization and Conservation Service of USDA to have each county ASCS office review its records to attempt to

USDA issues loan and purchase rates for several grains

WASHINGTON, D.C. – The board of directors of the Commodity Credit Corporation (CCC) has ratified the previously announced 1978-crop national average loan and purchase rates per bushel of $1.63 for barley, $2 for corn, $1.03 for oats, $1.70 for rye, $2.25 for wheat and $3.39 per hundredweight for sorghum.

At the same time, Secretary of Agriculture Bob Bergland announced he would continue to review the $2.25 per bushel wheat loan rate to determine whether it should be increased. However, with the wheat harvest underway, the secretary said action by the CCC board was essential in order for loans to be available to farmers in early harvest areas. Should the national average loan rate be increased, producers with 1978 wheat loans would have the option of having them adjusted to reflect the increase.

Following the CCC's action, Ray Fitzgerald, administrator of the U.S. Department of Agriculture's Agricultural Stabilization and Conservation Service (ASCS), announced 1978-crop county loan and purchase rates for wheat, sorghum, barley, and oats, and the state loan rates for rye.

WHEAT

The rates are based on the national loan rate for No. 1 grade wheat of $2.25 per bushel, unchanged from 1977. The major change from 1977 is the area-to-area adjustments made to reflect the shifts in production patterns and increases in the rail freight rates. The net effect of these rate adjustments is a reduction of two cents per bushel from 1977 levels in Colorado, Kansas, Nebraska and Wyoming; three cents per bushel in all states east of the Mississippi, Arkansas and Louisiana; two to three cents in Missouri and one cent in Iowa. Minor adjustments were made to individual county rates to improve county-to-county loan rate relationships.

SORGHUM

The rates are for sorghum grading No. 2 or better and are based on the national loan rate of $3.30 per hundredweight, unchanged from 1977. Adjustments were required to reflect shifts in production from states with higher loan rates. The following states or counties will receive a two-cent increase: Texas, Oklahoma, Baca county, Colorado and New Mexico counties bordering the Texas Panhandle. County loan rates in all other states or counties will reflect a one cent increase.

BARLEY

Rates are for barley grading No. 2 or better and are based on the national loan rate of $1.63 per bushel, unchanged from 1977. The schedule of discounts for barley grading below No. 2 is unchanged from 1977. To offset changes in area-to-area price relationships occuring as a result of freight rate changes, increases from 1977 county loan rates were made as follows: two cents per bushel in Minnesota and eastern North Dakota and one cent per bushel in South Dakota and western North Dakota.

OATS

Rates reflect the national rate of $1.03, unchanged from 1977. County rates are also unchanged with the exception of a one-cent per bushel increase in Illinois, Indina, Michigan, New York, Ohio, Oklahoma and Pennsyvania. This was done to bring loan rates more into line with the prices received by farmers in these states. No change was made in the schedule of discounts and premiums.

RYE

Rates are for rye grading U.S. No. 2 or better, or U.S. No. 3 on the factor of text weight only are based on the national loan rate of $1.70 per bushel. The schedule of discounts have not been changed from those in effect for 1977.

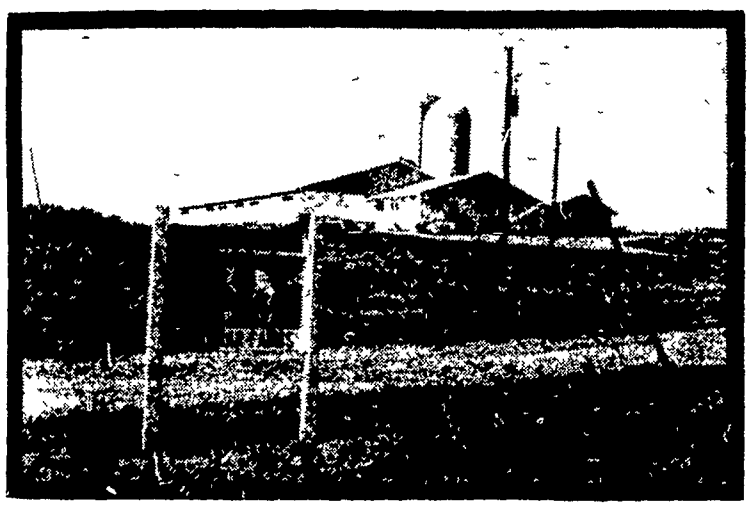
Copies of the rates issued will be available from appropriate state ASCS offices and from the chief, Program Development branch, Price Support and Loan division, room 3747, USDA-ASCS, P.O. Box 2415, Washington, D.C. 20013.

AGRI-KING
KEY TO PROFIT

IT WORKS

Silo King On Baled Hay

Harold and Wayne Lesher of Way-Har Farms in Berks County tell of their experience in using **Silo King** on baled hay.



The Lesher Brothers Dairy Set-Up.

Harold on his way to auction with a load of their top quality hay.

"We feel that hay is the best cash crop (return per acre) a farmer can raise in this area today. We had 400 acres of hay last year and we baled over 26,000 bales plus filling our 20x50 silo twice with haylage. We baled very little rained on hay, but we did bale a lot that was not fit to bale because of weather conditions. By using **Silo King** we were able to bale the hay at a higher moisture level which helped us to beat the weather and save more nutrition."

"We feed over 200 head of dairy livestock and sell the remainder of the hay. Last year we sold over 200 tons, and to our surprise we found very little mold in any of the hay; and it also kept its color."

"We have used **Silo King** 5 our of the past 6 years. We became sold on **Silo King** after trying another preservative for one year. The **Silo King** works and it is easy to apply by using the Gandy Applicator on our baler."

Dividend declared

STRASBURG – The board of directors of The First National Bank of Strasburg declared a semi-annual dividend of 50 cents per share payable June 30, 1978 to shareholders of record June 20, 1978. The bank operates seven offices in Lancaster County and is the county's oldest national bank.

Top poultrymen named

(Continued from Page 1)

Host Farm Resort. The entire day had been devoted to lectures and seminars which touched upon nearly every aspect of the broiler, egg and turkey industries. A festive mood prevailed Thursday night as the Federation concluded the meetings with a banquet, special entertainment and the award presentations. More than 200 people were in attendance.

All three of this year's Industryman of the Year Award recipients are active in the Pennsylvania Poultry Federation. Weaver, a former PPF treasurer and member of the Federation's board of directors, was cited for his "staunch leadership in helping to develop and maintain a strong and successful state poultry industry organization." The Victor Weaver firm is one of the largest of its kind in the country.

Zimmerman was cited for "diligently keeping Pennsylvania turkey growers informed and organized. His birds are also widely recognized for quality, and it was noted that in 1963 he won all seven championships at the Pennsylvania Farm Show in Harrisburg.

The awards were presented by last year's winners of the respective honors. Gene Bailey, broiler division manager for Pennfield Corporation, Lancaster, had the honors in the broiler division; Robert Shelly, president of Producers Pride, Inc. of Worcester, bestowed the egg award, and Glenn Kime, turkeyman from Gardners, handled the third plaque. Kime was named president of the Pennsylvania Poultry Federation during a business meeting on Thursday. The Adams Countian succeeds Melvin Mitchell of the Victor F. Weaver Company. He, too, received special recognition for his services for the past year. The ceremonies were presided over by PPF executive director John D. Hoffman.

The conference, which lasted from 8 a.m. to 9:30 p.m., featured a full slate of topics, including product promotion, mechanical handling of broilers, turkey processing, egg shell nutrition, cholesterol research, food safety, pollution management, marketing, diseases, a price outlook, and more.

W. Robert Park of Valencia, Butler County, was named Egg Industryman of the Year by the Pennsylvania Poultry Federation. His wife, left, shares the honor with him.

In the price outlook, John Pederson of Poultry and Egg Fax, Stone Mountain, Ga., predicted a strong year for both the broiler and turkey producers, while expressing caution for egg producers.

Noting that a number of economic developments, such as Russian grain purchases and presidential directives have a psychological as well as monetary effect on the industry, Pederson said much of the industry's future will depend on the trend in feed prices. He speculated that corn prices have probably reached their peak for 1978 and will decline in about October. Soybeans are also expected to be available at relatively favorable cost. This is one reason he sees the next six to 12 months as being "excellent" for the broiler and turkey industries. Another reason is that competing meats are in comparatively short supply and rising in price. Beef, especially, has risen sharply and consumers may offer resistance to buying beef.

Pederson sees turkey and broiler growers in a favorable position as long as hog prices stay in the $44-46 per hundredweight range and cattle prices hover at around $50 per hundredweight or better.

Pederson has especially strong price projections for turkeys because prices and supplies are already being committed now for the Thanksgiving and Christmas seasons.

There are some noteworthy changes taking place in both the broiler and turkey industries, according to Pederson. He predicts that the 20-pound turkey which many families put on their dinner table will become a thing of the past. It will be the exception in years to come as more and more consumers express a preference for processed turkey meat. "There is no end for growth in this area because turkey meat is so versatile and tremendous advances have been made in processing, preparation, packaging, and storage," Pederson explained.

An additional reason for the bright outlook for turkeymen is that there was a low carryover of last year's crop.

According to surveys and studies, cut-up broilers are gaining a larger share of the market each year, compared to whole birds. Thirty-eight per cent of production went as cut-up birds last year, compared to just 15 per cent in 1962.

Opinions sought on future of national forests

WASHINGTON, D.C. – Agriculture Secretary Bob Bergland has urged everyone interested in the nation's public lands to help the Forest Service decide the future uses of over 62 million acres of roadless and undeveloped areas within the 187-million-acre National Forest System.

Secretary Bergland indicated his interest in the public's opinions at a press conference to announce the release of a draft environmental statement containing the results of an inventory and analysis of cover 2,000 areas for possible allocation to wilderness, non-wilderness, or further planning for all uses. The acreage involved in this Roadless Area Review and Evaluation – called RARE II – is equal to that of the state of Oregon.

The draft RARE II statement, Secretary Bergland pointed out, contains 20 alternatives for allocation of acreage but does not set forth a proposed action or a preferred alternative. Public response, he said, will be an important factor in the development of a final environmental statement, to be issued in late December this year.

Forest Service Chief John R. McGuire said that before the agency can recommend an alternative which it believes is truly "in the public interest" it needs to review public comments on possible uses of individual areas.

Chief McGuire cautioned readers of the draft statement not to assume that the 10 alternatives presented are the only outcomes possible. "Many other combinations of wilderness proposals, non-wilderness decision, and 'further planning' allocations are as logical as those we've presented, and we encourage those who comment on the RARE II statement to offer alternatives behond those we've suggested – particularly on a state-by-state basis," he said.

"For example," the Chief noted, "while most of the alternatives displayed in the RARE II draft statement would allocate the majority of the 62 million acres to non-wilderness uses, other laternatives allocatıng the majority of the land to wilderness can easily be prepared and supported, using data provided on each roadless area in the 21-volume report."

"We want the public to look freely at the full range of possibilities rather than concentrating on one of our 'pre-packaged' alternatives, which are in no way intended to limit consideration of other alternative combinations the public may suggest," McGuire emphasized.

Pamphlets describing national forest wilderness management and the roadless area review are available from the Forest Service, P.O. Box 2417, Washington, D.C. 20013 and the regional offices.

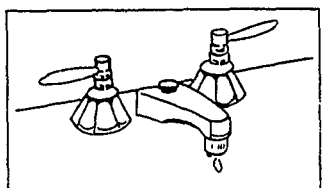
CONSUMER GUIDELINES



Depending on type, your toilet uses three to seven gallons of water per flushing Less frequent flushing — or, water saving devices — in the toilet can help reduce your water bill Also, check faucets for drips A mere 60 drips a minute can waste up to 2,200 gallons of water per year

Increase Your Alfalfa Yields?

Look at these test results:

First cutting. Nothing was added to normal fertility program

Second cutting 3 gallons 9-18-9 or 10-20-10 plus one gallon MEDINA. Each cutting then had the same treatment, only at the half-gallon rate on MEDINA.

RESULTS:

1st cutting	485 bales
2nd cutting	600 bales
3rd cutting	650 bales
4th cutting	738 bales
5th cutting	730 bales

Sixth was not cut due to wet fall in 1977. It is most unusual for the later cuttings to be better than the first two.

Average increase over 1st cutting was 193½ bales per cutting — over a 40% increase

The 9 18 9 used in this test was Na Chures Other 9 18-9 or 10 20 10 should perform in a similar manner

Every alfalfa grower knows that normally the first two cuttings are the highest yielding **We changed that** – Perhaps you can too. Be sure to apply the MEDINA and fertilizer (water may be added) within 5 days after cutting – 3 to 5 days are best 10-20-10 or similar fertilizer should work equally well Try this program on your hay.

MEDINA may be mixed with all insecticides and fungicides and with liquid and dry fertilizer.

New Free 16-page booklet:

"The Merrill Lynch Guide to Hedging"

If you are a dealer, producer or processor to whom the cost of basic raw materials is an important factor—you should be familiar with the "advance-pricing" advantages and techniques of hedging in commodity futures.

This exclusive Guide gives you a broad, in-depth background in how to use commodity hedging to protect yourself against widely fluctuating prices.

We believe you will find the Guide both an excellent introductory briefing aid and valuable source of reference on some of the finer points of hedging.

For instance, it demonstrates, by specific example, how producers may lock into satisfactory prices. How dealers may fix their costs at predetermined levels. How processors of raw materials may assure themselves a regular flow of supplies—while protecting their inventory against price declines. And much more. For your Free copy, just mail the coupon below.

Foreman outlines her food policy standards

Carol Tucker Foreman

WASHINGTON, D.C. – Addressing the annual Conference of the American Council on Consumer Interests in Chicago this Spring, Assistant Secretary of Agriculture Carol Foreman outlined her views on six elements that should be contained in a new food policy.

According to Foreman, the first element would be based on a determination of nutritional needs. Determination of these needs would require an increased commitment to human nutrition research, including the relationship of diet to disease. Recent studies have linked various nutrition factors to cancer, stated Foreman, prompting the need for additional research in this area. In addition to research on nutritional requirements, a determination of levels and types of production necessary to meet those requirements will be needed.

The second element would be the role the U.S. plays in meeting international food and nutrition needs. The third element would be to stimulate and sustain production adequate to meet domestic/international nutritional needs and American trade needs. She cited the creation of a domestic wheat and feed grain reserve as an example.

The fourth element would be the assurance of the availability of food at reasonable prices. The government would not encourage industry practices or government regulations that add unnecessary costs. One way to encourage good nutritional food values would be to require that food advertisers give equal time to nutrition messages. Another would be the availability of government-issued comparative nutritional price information at point-of-purchase, and/or through the electronic and print media.

Assurance of safe, high quality food would then be the fifth element. Evidence has linked salt and fat with high blood pressure and cancer, and the new food policy should be able to deal with these problems. There are no trade-offs of safety for savings, she stated. "A cheap food supply purchased at the expense of health protection is no bargain."

The sixth element would deal with those unable to afford an adequate diet. Various programs such as WIC, School Lunch and Breakfast, Food Stamps, and other child nutrition programs would be upgraded, emphasizing healthy, appetizing diets.

In conclusion, Foreman acknowledged consumers' fears about higher food prices and lower producer profits due to government intervention in the name of health and nutrition as reasonable concerns. "But we cannot ignore our basic responsibility to safeguard the nutrition and health of our citizens" she announced.

Foreman also announced interim regulations for nutritional education and training program in schools and child care institutions. These interim regulations are the final phase of regulations that initiate the new program. The interim regulations require states that participate in the program to assess their nutritional education and training needs, identify and locate children in need of nutritional education, assess teachers' needs for nutritional education training, and assess the training needs of food service personnel.

The purpose of this program is to help children, teachers, and food service personnel become informed, knowledgeable consumers by teaching them the relationship between nutrition, good food, and health. Interim regulations were issued so that the states could begin operations immediately. Final regulations will be published following consideration of the comments received on the interim regulations

Farmers

(Continued from Page 17)

believe that the area's independent egg producers may want to consider joining the organizations.

"Lancaster County egg producers are by and large independent," Wenger continued, "and they've not only survived – they've flourished. The only place that's happening is here in southeastern Pennsylvania," he observed.

"We can't fight battles independently. There isn't one egg producer in the country who is big enough to fill an export order or sue Standard Brands, but together we can do it," Wenger emphasized in his sales pitch.

The president-to-be's reference to a court suit against Standard Brands stands out as one of the major battlegrounds currently facing egg proudcers. UEP and related organizations are taking the giant food concern to court over allegations that Standard Brands' is making unfair advertising claims with their "Egg Beaters," an imitation egg product. The case has drawn widespread attention and will in all likelihood stand as a landmark decision once it's resolved. Money to help finance the court battle is being solicited by NEMA, UEP and related organizations.

UEP and NEMA organizers clearly gave their all Tuesday night when they explained their programs and goals to area farmers. They came with their top executives and managerial personnel, several of whom had traveled from either Georgia or New Hampshire. Decatur, Ga. is home base for UEP, while Durham, N.H. is headquarters for NEMA.

Christine Bushway, coordinator of promotions for the American Egg Board in the Northeast, as well as a full-time employee of NEMA, was one of the people who came from afar to help explain NEMA and UEP programs and objectives. Pointing out that the nation's egg producers represent a $3 billion industry, she noted that egg production and marketing are in an unhealthy situation despite that immense economic value. The reason for concern, she said, is that per capita egg consumption has been dropping steadily since 1945. She noted that 33 years ago 402 eggs were eaten per person per year, while last year that figure stood at 276. UEP and NEMA are working feverishly to help boost that figure. Statistics show that some progress is being made in that regard. The decline in egg consumption has been slowed, and audience response from television, radio, magazine and newspaper advertising is regarded as being extremely favorable.

Ms. Bushway, whose territory includes the entire Northeast (from Maryland and Delaware north to Maine), told the eggmen that all advertising and promotion is done on a zero-based budget.

Also on the program were NEMA's general manager, Bill Rent; UEP president Harry Muller, UEP marketing director Greg Murch, NEMA's mid-Atlantic manager, Charles O'Reilly, and a number of others with close ties to the organizations.

Rent noted that UEP, which celebrated its 10th birthday this Spring, is continually active in promotion, with the main purpose being "the greatest return on investment."

O'Reilly, who lives in Hightstown, N.J., proclaimed: "When you join NEMA, you don't march alone." He pointed out that three Pennsylvanians are on NEMA's 15-member board of directors

Muller began his speech by saying: "We as egg producers represent an extremely important part of agriculture." Noting that today's society is heavily involved with pressure groups, he encouraged egg producers to join NEMA and UEP so that the egg producers' interests and voice would not be lost in Washington, D.C. or within the population in general.

"UEP does a lot of things – we're an action team," said Murch during his presentation. Included among UEP's activities, as outlined by Murch, are communications in the form of a newsletter to members, a governmental relations staff, a legislative network for producer input in Congress, a team for statistical and economic analysis, marketing and export programs, a legal division, and an insurance plan.

Pennfield Corporation vice president Donald Horn explained that NEMA and UEP are farmer cooperatives. "If you aren't an egg producer, you can't join," he told the group of about 140 people. "But if you're an egg producer, you should consider membership to help improve the egg industry. We're egg producers working together to help solve problems, look for better ways, new ideas, and methods. We can't do it ourselves, that's why we'd like you to join. It's not an inexpensive investment, but the rewards can be substantial," he concluded.

Numerous egg producers in the audience who already are NEMA members spoke up to lend support to previous remarks by others. Among them was Adams Countian Tom Trone. In a short but dramatic testimonial, he reached into his pockets for several handsful of change and tossed the coins out into the audience. "NEMA means more money and more profit for everybody," he shouted to the surprised crowd. Jim Wolfe, a York Countian, said: "United we stand, divided we fall – this would hold true to our industry."

Jay Greider, Mount Joy, said he is convinced of NEMA's value because he has seen the organization in action as both a member and former director. "Any industry needs a voice in Washington and out in the public," he explained. "We have got to stand up and fight for our industry; we have to fight our battles. Only an egg organization can talk for the egg people," he concluded.

Dick Moyer, Union County, summed it up by saying: "We have got to get our heads together and get something done. We must produce eggs intelligently and profitably. We think nothing of spending a quarter to half million dollars for a new chicken house. Now I challenge you to invest in marketing as well. We as farmers have a miserable record as egg marketers."

Not everyone was convinced that NEMA and UEP could do the job of lifting the egg industry to greater respectability and glory. But most of those in attendance listened attentively and many took part in discussions. That was taken as an optimistic sign by NEMA and UEP people.

For more information about the organizations, interested readers are asked to contact either NEMA, Box MM, Durham, N.H. 0384, or Charles O'Reilly, 136 Harron Avenue, Hightstown, N.J. 08520.

Christine Bushway sells eggs for everybody

By DIETER KRIEG

BIRD-IN-HAND — The nation's egg industry is worth $3 billion, but it isn't in a healthy state, according to Christine Bushway, marketing and promotions coordinator for the American Egg Board (AEB). She "sells" eggs for everybody.

Speaking here Tuesday evening before a crowd of approximately 140 southeastern Pennsylvania egg producers, Miss Bushway noted that per capita egg consumption has dropped steadily since 1945. Thirty-three years ago the average American ate 402 eggs per year, compared to just 267 in 1977.

The American Egg Board and related trade associations are attempting to do something about that. A lot has already been done and the results are very favorable, according to Miss Bushway, a young woman who is enthusiastic about the egg business.

The drop in per capita egg consumption is of concern to Christine Bushway, who is working hard to reverse the trend.

As coordinator of promotional and marketing programs for the AEB, Miss Bushway utilizes her varied talents on television, radio, the printed page, and at public meetings such as the one held here in Lancaster County this week. The occasion for her visit was to help introduce local egg producers to two egg producers' cooperatives - United Egg Producers and the Northeast Egg Marketing Association.

United Egg Producers (AEB) is a national egg farmers' cooperative composed of five regional cooperatives, one of which is the Northeast Egg Marketing Association (NEMA).

NEMA, with headquarters in Durham, N.H., blankets 11 states - from Maryland and Delaware all the way to Maine. Aside from her duties with the AEB, Miss Bushway is also a full-time employee of NEMA. Her job takes her all across the country "selling" eggs.

While in Lancaster this week, Miss Bushway detailed some of her work, all of which is done for the good of the industry. She, as well as others who were present at the meeting, are hoping that area egg producers might consider joining NEMA and UEP.

"Because Pennsylvania is the fourth largest egg producing state in the country, you should be very concerned with promotion. I urge you to do just that," she proclaimed.

Compared to other regions of the country, particularly the South and Midwest, the Northeast is not significantly involved in egg promotion, she said. Noting than many midwestern and southern states haved a home economist specializing in egg nutrition and promotion, she felt that Pennsylvania was large and important enough to have a home economist specializing in eggs. Currently Miss Bushway takes on that responsibility, among others. She covers 11 states, rather than just one.

All promotional work at the American Egg Board, NEMA and UEP is done on a zero-based budget, Miss Bushway explained. On occasion, the organizations are given free air time on television and radio. Examples include appearances on talk and interview programs or public service spots. Another example of free publicity are interviews with newspaper and magazine people.

"We've had good response to TV campaigns and lots of requests for information," Miss Bushway revealed during her visit to the Garden Spot. Response to NEMA programs has even come from such unusal stunts like preparing omelets on a radio program. Even though listeners could not watch the actual preparation and cooking, the sizzling of omelets was enough to turn the audience on, Miss Bushway said.

One of the big attractions in egg publicity circles is Howard Helmer, the international "Omelet King." He draws crowds wherever he goes, Miss Bushway confirmed, and the result is that people become more interested in featuring eggs in their diets. That's the chief purpose of NEMA, UEP and the AEB.

The challenge is not small. One of the major issues confronting the industry is the cholesterol controversy. A large segment of the population has been programmed by questionable food advertising into thinking that eggs and other products are detrimental to good health because of their cholesterol content. One of Miss Bushway's main tasks is to inform the public that there are two sides to the cholesterol issue. This has included the distribution of information to the medical profession.

The National Committee on Egg Nutrition (NCEN) is one of the foremost fact-finding organizations when it comes to cholesterol research. It funds numerous research projects around the country which are aimed at finding the truth about cholesterol and nutrition. Miss Bushway had high praise for the organization, which is chaired by Lancaster County's own Hendrik Wentink, assistant to the president of Pennfield Corporation.

"NCEN is constantly monitoring anything on egg nutrition. They're doing an excellent job," she praised.

Another phase of Mis Bushway's work involves working with educational programs in the nation's schools. The American Egg Board is making teachers' kits available to home economics instructors. They cost just five dollars per kit because of a subsidy from the AEB. Response to the program has been extremely good and Miss Bushway encourages local producers to consider purchasing a few of the educational kits. Included are a film strip and egg preparation suggestions.

Eggs have traditionally been a breakfast food, said Miss Bushway. But with changing lifestyles and competing breakfast menus, eggs are losing ground on the consumer's breakfast table. Cereals and "instant" breakfasts are cutting into the egg consumption figures. Furthermore, many people are skipping breakfast. This represents a challenge to egg producers. Coupled with the cholesterol controversy, the growing variety of food choices for breakfast is putting a strain on egg utilization.

Noting that one out of three meals is eaten away from home, the AEB, UEP and NEMA see the restaurant trade as a prime target for boosting egg consumption. To do so, the organizations have mounted a full-scale drive designed to create interest among the nation's restauranteurs. Working with a full-color slide presentation and related items which were jointly developed by the Pennsylvania Egg Marketing Association and the AEB, Miss Bushway and others are distributing these materials to retaurant managers across the country. As with other AEB programs, the response has been very favorable. What's more, the trend of reduced per capita egg consumption is slowing down.

"There's little we can do about changing lifestyles, but there is a lot we can do about egg advertising and furnishing complete information about cholesterol," Miss Bushway proclaimed. She regsards the "Incredible Edible Egg" campaign as being highly successful.

Newspapers across the country have run full color, full page advertisements which tell consumers more about eggs while also offering new recipes.

The American Egg Board isn't conceding anything. They're pushing to increase egg consumption at breakfast time and they're going all out to tell people that eggs fit the budget and meal during any time of day and at any place.

One of the most astounding statements made by Miss Bushway during her visit to Lancaster County was the allegation that doctors were never required to take a single course in nutrition until just a year ago. Despite this fact, doctors have for years been making influential statements to their patients as well as news media representatives. The result has been that people have been misinformed. "The AEB is trying to get to the truth," she exclaimed.

Summing up her remarks, she told the eggmen that "it's your product that we're trying to sell."

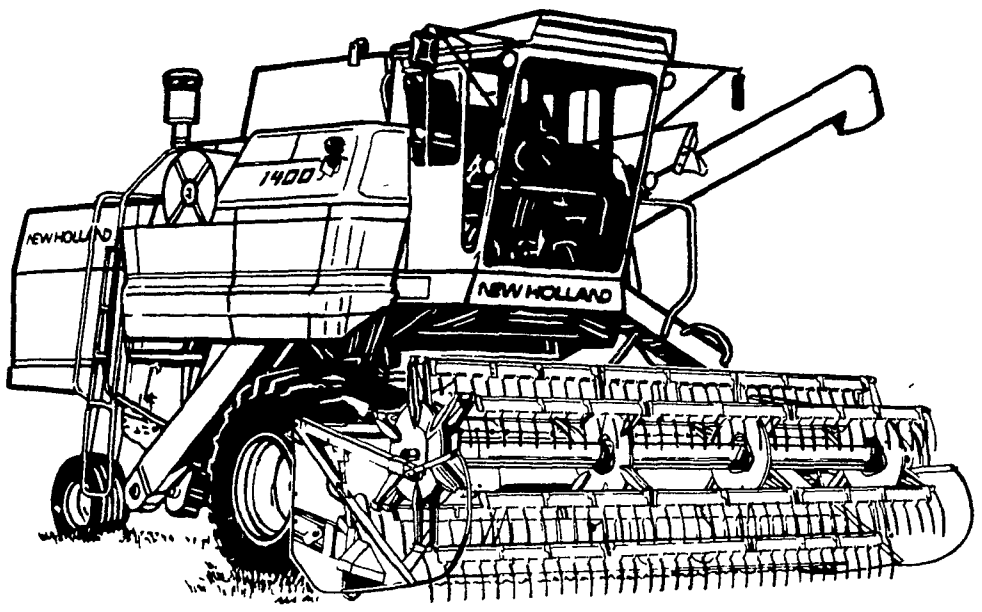
SPERRY NEW HOLLAND GIVES YOU A CHOICE:

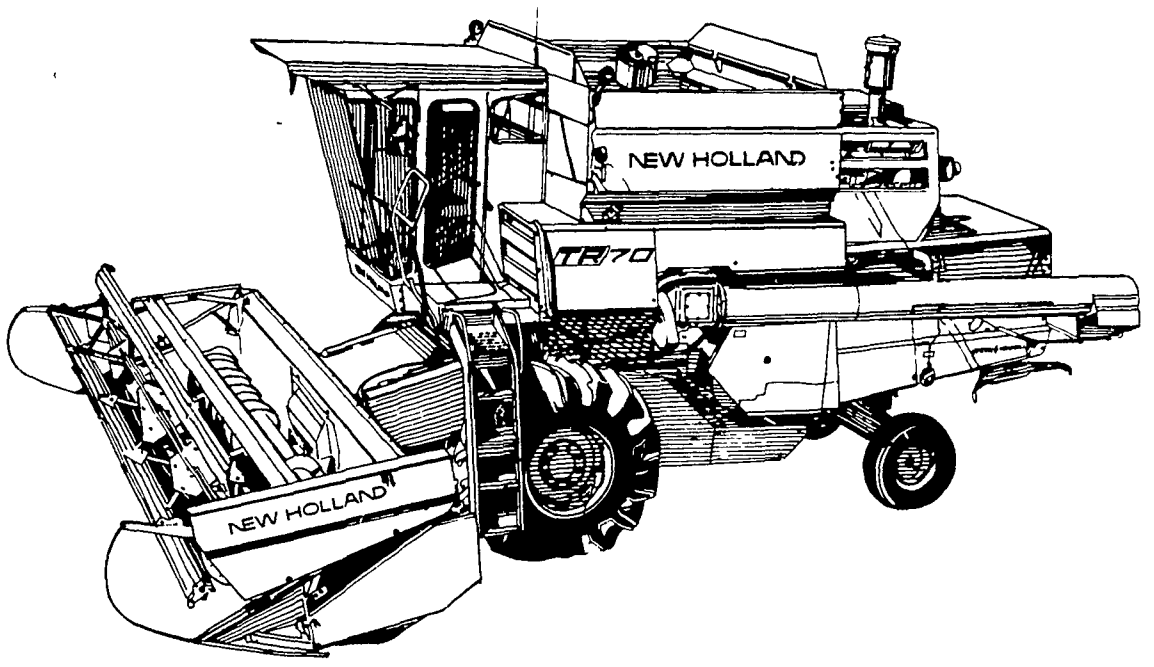


Model 1400 Combine with balanced capacity, comfort and convenience.

- Power, threshing, separating and cleaning components are perfectly balanced.
- Easy access for inspection and service!
- Comfortable, quiet cab.
- Available with gasoline or Diesel engine.

OR -- The field-proven Twin Rotor™ TR™ 70 Combine featuring:

- Twin Rotor threshing!
- Centrifugal separation -- NO STRAWWALKERS!
- Less crop damage and loss!
- 190-bu. grain tank, etc...



Make your choice between two practical, grain-saving combines at your authorized Sperry New Holland dealer's. He's anxious to show you both Grainpower models. Grainpower is the ability to fill the grain tank fast with a good, clean sample, leaving very little behind for the birds. Grain harvest is coming up fast, so ask your dealer now for a Grainpower demonstration on your farm! He's listed on the facing page.

National pullers rip track at Buck

THE BUCK — Tractor pullers from various parts of the country competed for a $20,000 purse here last week during the 1978 Penn Spring Nationals. The Buck Tractor pulling Stadium, the only such facility in the country, hosted the 2-day event.

Among the star attractions was veteran puller Art Arfpons of Akron, Ohio, who drives a screaming turbine-powered "monster." The Midwesterner won only one class, however, that being the 12,000 pound open event. On his first try at the 57,000 pound sled, he roared down the track for the full distance of 300 feet. But when the sled's weight movements were altered, he was stopped at 245 feet, five inches. John Shaul of Fultonham, N.Y. was second and Ron Barga of Ansonia, Ohio was third.

Shaul and Barga, both of whom registered full pulls on their first heats, were stopped at 221-2 and 196-5, respectively. Both men drove tractors powered by Allison Aircraft engines.

The contests - eight classes - were witnessed by thousands of spectators on both Friday and Saturday nights. Located 10 miles south of Lancaster on Route 272, the Buck Tractor Pulling Stadium is within easy access to tractor pulling enthusiasts from several states.

While the Buck facility is "home base" for a number of tractor pullers who participated in last week's big event, all but two area drivers were shut out of the winner's circle.

Mark and Tim Stauffer, both of Ephrata, scored victories with their air-cooled Deutz tractors. Both young men have gained fame as highly competitive tractor pullers in local, state, and national contests. They have a number of national trophies to their credit and demonstrated the power of their machines last weekend.

Tim Stuaffer, driving a Deutz 8006 in the 5000 pound super stock class, won with a distance of 277 feet, five inches. Two Allis-Chalmers finished in second and third place. Both were driven by area competitors who are regular contestants at the Buck. Jim Brubaker, Quarryville, piloted his A-C for a distance of 268-11, while Cochranville's Dale Smoker was stopped at 267-6.

Mark Stauffer, drove his Deutz 9006 to victory in the 7000 pound super stock class. Finishing second and third, respectively, were Craig Leggett of Boonesboro, Md. and Tom Savage of Damascus, Md. Both men drove John Deeres.

In other classes, the results were as follows:

12000 pound super stock

1. Danny Dean, South Charleston, Ohio, IH 1066, full pull. 2. Bob Williams, Graveport, Ohio, Allis-Chalmers D-21, 288 feet, nine inches. 3. Harry Griest, Coatesville, IH 1456, 273-5.

5000 pound modified

1. Dennis Wilson, Greenville, Ohio, 427 Ford, full pull, 217-3. 2. Ronald hughes, New Windsor, Md., hemi, full pull, 203-3. 3. Fuhrman Brothers, Decatur, Ind., 454 Chevy, 265-11.

7000 pound modified

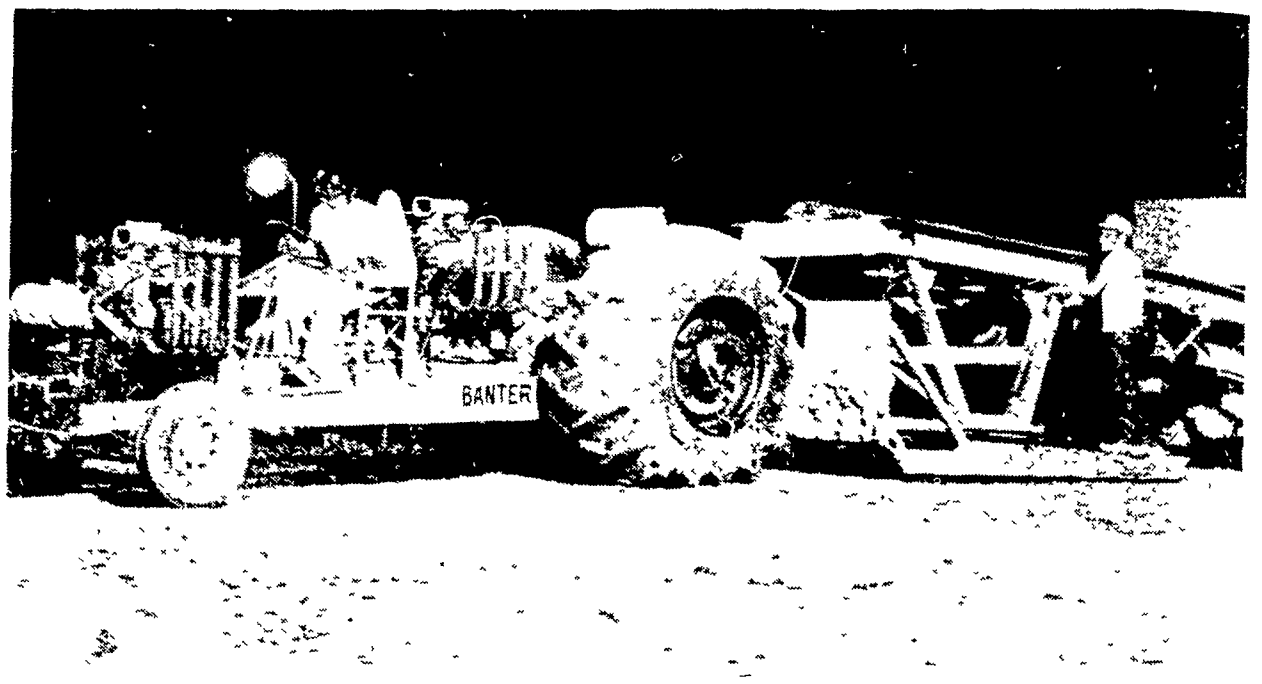
1. E.J. Potter , Ithaca, N.J., Allison, 277-11. 2. Larry Jones, Washington, Ind., 454 Ford, 272-9. 3. Larry Fuhrman, Decaur, Ind., 454 Chevy, 271.7.

9000 pound super stock

1. Danny Dean, IH 1066. 2. Tom Middleton, Ridgely, Md., IH 1066. 3. Bill Hint, Castalia, Ohio, A-C D-21.

9000 pound modified

1. Banter Brothers, Warren, Indiana, Chevy, 291-5; 2. Art Arfons, turbine, 286-4; 3. Dave Hileman, Rockford, Ohio, two 454 Chevys, 285-10.



Ready for take-off, one of the Banter Brothers sits between two blown Chevy engines.

HOW
UNIPEL® 10-10-30
puts new flexibility
in fertilizer planning:

This UNIPEL fertilizer provides all of the Phosphorus and Potassium needed for a Spring plowdown application for soybeans. It's also an excellent fertilizer to boost forage yields of legume crops such as alfalfa.

If you use split-application fertility for corn . . . it provides all the P and K you'll need to team up with the Spring supplemental N of your choice.

The chemical combination of N and P in UNIPEL 10-10-30 enhances Phosphate uptake and increases the fertilizer's efficiency. ORTHO's unique "Phospho-Nitric" manufacturing process for UNIPELS produces its long-lasting form of Phosphate that resists fixation in acid soils and is readily available for plant use whether applied Spring or Fall.

UNIPEL 10-10-30 gives you lots of options for fertility programming Let's discuss how we can fit it in yours.

Carter's beef imports questioned

Arden Tewksbury

SYRACUSE, N.Y. – Arden Tewksbury, president of 7000 dairy farmers belonging to Eastern Milk Producers Cooperative, has sent a letter to President Jimmy Carter strenously opposing his relaxation of controls on imported beef. Earlier, on June 7, 1978, the Co-op's 200 member Delegate Body unanimously passed a resolution urging Carter's reconsideration of this decision.

The cooperative leader applauded Carter's concern over efforts to stem the inflationary spiral which permeates the entire economy - not just the food sector. However, he noted that past attempts to slow inflation by flooding domestic agricultural markets with cheap supplies of foreign commodities have been unsuccessful. These attempts have seriously distrupted the industry involved and created distortions in the economy as a whole.

Inflationary spirals cannot be controlled by depressing prices in a single sub-sector of our economy, stressed Tewksbury. In the absence of efforts to control the costs of production, the depressing of beef prices, dairy products or any other commodity only squeezes the industry affected.

He observed that the economic depression of one segment of agriculture inevitably has an adverse impact on other segments.

The United States beef industry is a paramount agriculture industry and its continued economic viability is of vast importance to the health and welfare of all consumers, the Meshoppen, Pa. dairyman concluded.

Coconut Care

To open a coconut, pierce the "eyes" with an ice pick or large nail and drain the liquid. To remove the shell easily, bake the drained coconut at 350 degrees for 25 minutes — or, put it in the freezer for an hour Then, place the coconut on a firm surface and tap the shell lightly with a hammer in several places until it cracks Separate the meat from the shell and use a vegetable parer to remove the brown skin.

Md. farm visitation day set for June 25

COLLEGE PARK, Md. – Maryland's annual statewide Farm Visitation Day has become a national phenomenon. And this year's twelfth annual version on June 25 promises to be bigger and better than ever.

If the weather is pleasant, upwards of 25,000 youngsters and adults are expected at the 23 participating "Welcome Farms" scattered through nine of Maryland's 23 counties.

Local committees have been active in the nine counties, planning details for hosting the event at each of the designated farms.

The general plan is that particpating dairy farms will offer free cold milk as a refreshment, at least to visiting youngsters. In some cases, free samples of other dairy products will also be offered, as well as free recipe leaflets. Up in Frederick county, the 4-H Cow Gals and Guys organization will attend to this detail.

Most non-dairy farms will offer other forms of free refreshments, such as lemonade or fruit punch.

General open house hours on Farm Visitation Day are 1 to 5 p.m. Many of the participating dairy farms will offer an opportunity for visitors to stay later and observe the evening milking. In some cases, milking operations will already be under way before the 5 p.m. closing hour. At least one participating dairy farm – in Cecil county – regularly begins its evening milking at 2:30 p.m.

For the first time in its 12-year history, Farm Visitation Day will have farms open for inspection on the Eastern Shore, below the Sassafras river. These will include three in Talbot county – all in the Easton area. They will offer a first-hand look at broiler-growing grain and dairy farming.

Southern Maryland farms will offer the traditional look at tobacco, grain and livestock. And the U.S. Naval Academy dairy farm at Gambrills (Anne Arundel county) will again be hosting visitors, as it has every year since Farm Visitation Day began in the state. New this year will be the chance to visit a dairy goat farm in Calvert county, including a goat-milking demonstration at 5 p.m.

Directions to all participating farms are listed in a free Farm Visitation Day brochure, available from Extension offices and public libraries in the nine participating counties – Anne Arundel, Baltimore, Calvert, Cecil, Charles, Frederick, Harford, Talbot and Washington.

Additional information is available from the office of Roy D. Porter, Extension coordinator of special communications at the University of Maryland in College Park. His telephone number is (301) 454-3712 or 454-4064.

Farm Visitation Day is sponsored each year by the University of Maryland's Cooperative Extension Service and the statewide Farm-City Committee. All major farm organizations in Maryland are represented

These young Holstein cows present symbolic welcome for the nine dairy farms scattered through six counties which are participating in June 25's twelfth annual Farm Visitation Day in Maryland. Youngsters, and their parents, who visit the dairy farms are welcome to pet young calves, sample milk products, and perhaps even see cows being milked. Dairy products rank second only to broilers as the leading source of farm income in Maryland.

Grain reserve reaches 493.3 million bushels

WASHINGTON, D.C. – There were 493.3 million bushels of wheat and feed grain in the grain reserve as of June 9, according to Ray Fitzgerald, administrator of the Agricultural Stabilization and Conservation Service (ASCS). Fitzgerald said the reserve, as of that date, had 346,935,452 bushels of wheat, 23,794,440 bushels of barley, 85,824,397 bushels of corn, 28,651,874 bushels of oats and 8,091,977 bushels of sorghum (4,531,507 hundredweight). The figures cited by administrator Fitzgerald were based on a telephone survey by ASCS.

The grain reserve takes wheat and other grains off the market for a period of up to three years, or until market prices reach stated levels.

At the same time Fitzgerald announced the telephone survey results, ASCS released its regular weekly price support loan activity report. This report includes figures on grains in the farmer-owned reserve and other data. The data in the weekly report lags behind the figures reported today by the administrator because of the time taken to mail the data for the weekly report to Kansas City for processing.

Soviet grain studied

WASHINGTON, D.C. – Three U.S. grain study teams are scheduled to visit the Soviet Union this Summer to assess crop conditions and outlook.

G. Edward Schuh, deputy assistant secretary of agriculture for international affairs and commodity programs said the visits were scheduled under terms of the U.S. - USSR Agreement on Agricultural Cooperation.

Stoltzfus wears dairy crown

(Continued from Page 1)

Debra M. Krantz, Quarryville R1, the daughter of Mr. and Mrs. Willis Krantz.

The winners were selected from a field of ten contestants who had spent a full day of rehearsals and individual interviews with judges. The others were Joy Jungst, Elizabethtown R1; Kay Breneman, Manheim R2, Sandra Frey, 401 Beaver Valley Pike, Willow Street; Sandra L. Galbreath, Peach Bottom R1; Suzanne K. Groff, Camargo Road, Quarryville; Sandy Schmuck, Peach Bottom R2; and Sara E. Skiles, Narvon R2.

Joyce said winning the dairy princess title is a "once-in-a-lifetime opportunity," and she will postpone beginning her freshman year at Hesston College in Kansas so that she can fulfill the duties of promoting dairy products.

Despite the fact that Joyce was forced to miss the last day of rehearsal as well as the luncheon for judges and contestants, she quickly made up the loss and arrived fresh and bright enough to capture the title.

On-stage Joyce selected a question about why milk should be promoted. With confidence she replied, "Why shouldn't we promote milk? It's a product we're proud of." She added that everyone else promotes their products and certainly the dairy industry should promote theirs.

Each contest prepared a 30-second radio spot, and Joyce said she knew she wanted to "promote the refreshing part of milk, and its nutritional values." What she came up with was a crowd pleaser, promoting milk as a "cool, satisfying drink which offers a nutritious change of pace." She asked her fictitious audience to make the change to a "cold, refreshing glass of milk - Nature's most nearly perfect food." Joyce said it took her about one half hour to write the message, and then she learned it by repeating it over and over. "It's surprising how short 30 seconds is," she said. She said she spent the trip from her home in Gap to the Farm and Home Center for Friday night rehearsal saying the commercial over and over again. Her diligence paid off.

The new dairy princess is well-acquainted with the dairy industry: every morning and evening she can be found in the barn helping with the milking of the family's 60 cows. Joyce owns five animals, and has been a 4-H member for nine years. She served as secretary of the Holstein 4-H Club and is treasurer of the Lancaster County Junior Holstein Club.

Reigning Lancaster County dairy princess Joyce Stoltzfus shares her delight with, left to right, LuAnn Brenneman, first runner-up; Twila Brubaker, last year's dairy princess, and Debra Krantz, second runner-up.

Joyce, says, "I make it a habit to drink a lot of milk." Perhaps this accounts for the energy which keeps her going from that 4:45 a.m. wake-up through her many activities.

Joyce is a member of the Sandy Hill Mennonite Church were she is secretary of the yough fellowship and serves on several church committees. She was secretary of the Future Agriculturists of America Club at school and is a member of the Mennonite Historical Association where she serves on the youth committee.

Along with the other contestants, Joyce participated in dairy promotions at both the Park City and East Towne Malls. She said she enjoys promoting milk, and for two years had a cow at Park City with the Lancaster County Farmers Association agricultural promotion. She said, "I met a lot of teenagers and young parents with children who had never touched a cow. I enjoyed meeting this audience and I will enjoy going into the elementary schools."

There is no rest for a brand new dairy princess, and Joyce had her first engagement four days after the contest. She appeared with Twila Brubaker at Interstate Milk Producers Cooperative's Young Cooperator program at the Host Farm, where she helped serve dairy refreshments to participants.

Judges for the contest were Mrs. Robert Pepple, Oxford, dairyman's wife and former dairy princess; Mark Morse, educator, Camp Hill; and E. Wayne Beshore, York County dairyman and board member of the Pennsylvania Dairyman's Association. Master of ceremonies was Grover C. Gouker, Jr., Dale Carnegie Institute.

The contest was preceded with a milk punch and cheese reception on the patio of the Farm and Home Center. The stage resembled an old-fashioned ice cream parlor. Mrs. Robert Kauffman, Elizabethtown R1, was in charge of decorations and Mr. and Mrs. Elvin Brenneman, Mount Joy R1, headed up the reception.

Mr. and Mrs. Charles Rohrer, Paradise R1, were chairmen of the contest, assisted by Mr. and Mrs. Earl Stauffer, Ephrata R1. Bonnie Wagner offered special entertainment and choreographed the appearances of the contestants. She was assisted by Mrs. Rodney Mayhew.

OWATONNA'S HAYMASTER GOLD RUSH

Leb. Co. dairy princess contest set for June 30

LEBANON—Five young women will vie for the title of Lebanon County Dairy Princess on June 30 at 7:30 p.m. in the Lebanon County Municipal Building auditorium, Lebanon. All contestants are the daughters of dairy farmers and are involved with helping on the family farm.

Joyce Moyer, current dairy princess, will crown her successor from among the following individuals: M. Jane Bomgardner, 17, daughter of Mr. and Mrs. Harvey Bomgardner, Annville R3; Carol Kettering, 19, the daughter of Mr. and Mrs. Perry Kettering, 1733 Russell Road, Lebanon; Connie McFeaters, 16, the daughter of Mr. and Mrs. Leonard McFeaters, Annville R3; Barbara Sattazahn, 17, the daughter of Mr. and Mrs. Ray Sattazahn, R6, Lebanon; and Becky Jo Walmer, 18, the daughter of Mr. and Mrs. Carl Walmer, 185 Village Drive, Lebanon.

Miss Bomgardner is a graduate of Annville-Cleona High School and has participated in the marching band, concert band, wind ensemble, chorus, glee club, National Honor Society, and yearbook as editor-in-chief. Her other activities include the NoSoAnn 4-H Dairy Club, North Annville Cloverettes, and the Lebanon County Junior Holstein Club. She will attend Delaware Valley College in the Fall to study dairy husbandry.

M. Jane Bomgardner

Miss Kettering, a graduate of Annville-Cleona High School, was a member of the National Honor Society, Future Homemakers of America, Health Careers Club, Bible Club, and chorus. She is a member of the Emmanuel United Mehtodist Church choir. She is currently employed by Laudermilch Meats.

Miss McFeaters will be a senior at Annville-Cleona High School where her activities include National Honor Society, track, band majorette, varsity club, and Model United Nations. After graduation, she plans to attend Penn State University where she will study to be a veterinarian or animal psychologist.

Miss Sattazahn, a graduate of Northern Lebanon High School, participated in the senior band, Bible Club, National Honor Society, pep band, and stage band. Other activities include Norlebco 4-H Dairy Club, Junior Holstein member, and a member of the St. John's Host UCC. Her present plans are to work on the family dairy farm.

Miss Walmer is a graduate of Cedar Crest High School and participated in FFA, 4-H Horse Club, Teen Council, Church quartet, pep club and the French Club. Her personal plans are to work on a dairy farm, then to possibly further her schooling.

Progress in dairying saluted at N.Y. event

COPAKE, N.Y. – U.S. Secretary of Agriculture, Bob Bergland will be the featured speaker at a day-long dairy and agricultural promotion program to be held near here Tuesday, June 27 at Langdonhurst Farm. The celebration is in recognition of 30 years of progress in bulk handling. The Langdon farm, owned by Columbia County Farm Bureau president; Mike Langdon, was one of the farms on the first successful bulk pick-up route in the U.S. Events include crop and dairy tours at 10:00 and 11:00 a.m., a chicken barbecue at 11:30 a.m., and day-long educational and agribusiness displays. Bergland is scheduled to appear at 12:30 p.m.; he will be followed by a panel discussion on the Northeast dairy situation.

Billed as an event for dairymen and non-farm friends to salute progress in the dairy industry, "Northeast Dairy Day" will offer educational displays for farmers and consumers. Other features include agribusiness displays, an antique milking equipment exhibit, a baked goods contest, home crafts display, and refreshments. There is no admission charge.

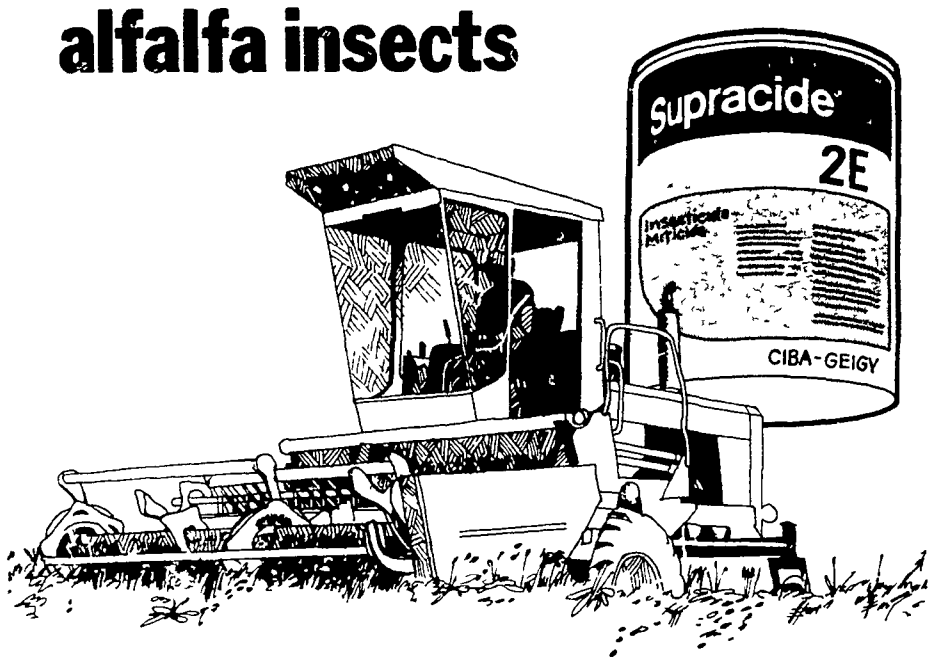
OUR RECOMMENDATION:

for alfalfa insects



You know how much a good crop of alfalfa is worth today. It's never been higher . . . You'd like to grow more of it per acre. Insect control plays an important role.

Supracide is what to use. Why? 14 to 21 days of control, for one thing. Short interval to harvest, for another. These are only two reasons to use Supracide on your high-priced alfalfa. Ask us about some others.

Supracide® trademark of CIBA-GEIGY for methidathion

SUPRACIDE 2E is not a restricted Insecticide - it is a general use pesticide.

CONTROLS - Alfalfa Weevil, Aphids, Spittlebugs, Leafhoppers.

It is a long lasting locally Systemic Insecticide.

Call today for spraying SUPRACIDE 2E after 1st cutting.

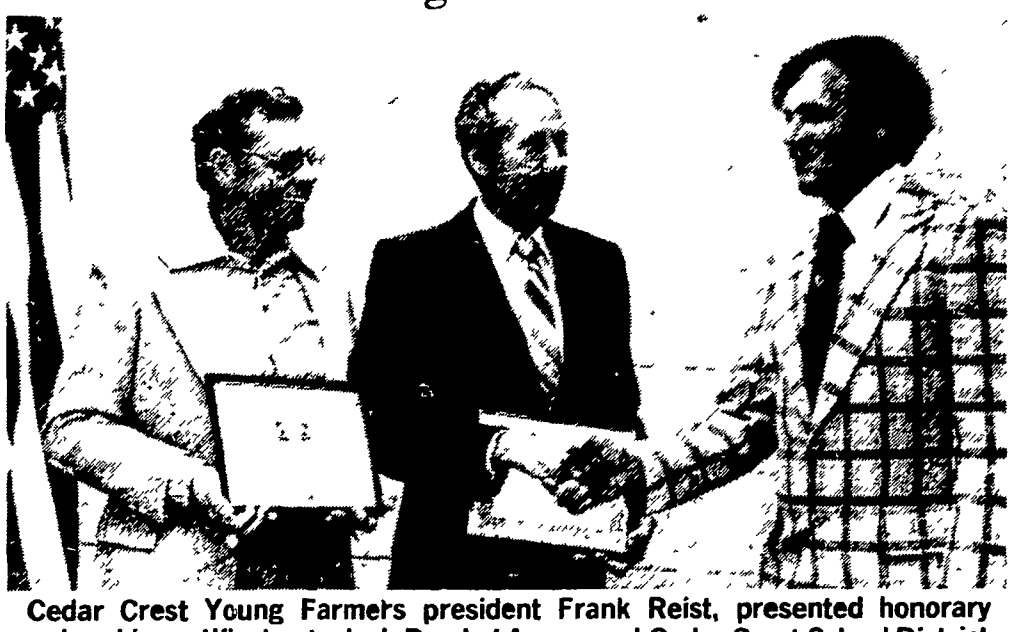
Cedar Crest Young Farmers bestow honors



Cedar Crest Young Farmers president Frank Reist, presented honorary membership certificates to Jack Reed of Agway and Cedar Crest School District Superintendent Dr. Marlin Kessler during a recent meeting at the Schaefferstown Fire Hall. Both honorary members have contributed significantly to the success of the CCYF program.

Glenn Wenger, Mike Arnold, Elwood Houser, Richard Bomberger, and Carl Reist were all honored recently by the Cedar Crest Young Farmers for production efficiency in their farming programs. Wenger, Lebanon R7, had first place in a corn silage contest; Arnold, Lebanon R2, took top honors with his hay; Houser, Lebanon R5, had the grand champion alfalfa; Bomberger, Lebanon R1, won in the hay crop silage division, and Reist, Lebanon R1, had a first place in first cutting mixed hay.

Concern grows

(Continued from Page 24)

identify any farm or ranch land owned by foreign interests.

(4) Requested the Secretary of Commerce to provide the Committee with whatever information her Department might be able to obtain through its International Investment Division on foreign investment in American agricultural land.

(5) Requested the Congressional Research Service of the Library of Congress to prepare an overview paper discussing Constitutional, International Treaty and other legal questions that would be involved in any Federal or state legislation dealing with the purchase and ownership of U.S. farmland by non-resident foreign aliens.

(6) Requested the Senate Appropriations Committee to add $450,000 to the 1978 Supplemental Appropriations Bill to enable the USDA to conduct a study of the feasibility of the establishment of a system for monitoring foreign investment in agricultural property and a multi-purpose land data system.

The Grange is also concerned.

In a statement issued last week by John W. Scott, Master of the National Grange, the nation's oldest farm organization, the Grange called for a more thorough and detailed investigation into foreign ownership of U.S. farm land.

"We are alarmed over foreign ownership of U.S. farm land," Scott said, "but as the General Accounting Office report released by Senator Herman Talmadge, Chairman of the Senate Agriculture Committee, indicates that 'very little data on foreign ownership of land now exists in federal, state or local government agencies,' the old adage, 'What you don't know won't hurt you' does not apply in this case. I believe we are seeing just the tip of the iceberg as regards to the effect on U.S. farmers because of foreign ownership of U.S. farm land."

The random GAO survey of 25 counties in California, Georgia, Kansas, Missouri and Oklahoma found that foreigners owned 44,700 acres – 0.3 per cent – of the total farm land in those places. "This is a very small sampling," Scott said. "Many prime farming areas were not surveyed such as in Illinois, Iowa and Nebraska. Foreign purchases in any part of a state have an escalating effect on land values in that state and more information is needed before any action is taken," said Scott.

The national farm leader said the Grange will support legislation recommended by GAO to provide for a nationwide registration system for foreign land owners similar to the alien registration system now used by the Immigration and Naturalization Service. "In addition," Scott said, "we will support the recommendations by Senator Talmadge, to have the Library of Congress prepare a paper on the constitutional, international treaty and other legal questions that might arise over legislation from Congress or state legislation pertaining to foreign ownership of farm land and the necessary funding of USDA to carry out the investigation necessary to determine the magnitude of the problem we face."

Fish to return to Conoy Creek

ELIZABETHTOWN – "I predict that within three years there will be good fishing in the Conoy Creek near Elizabethtown." The announcement was made by Karry Messerle Waterways Patrolman for the Pennsylvania Fish Commission for Northern Lancaster County.

Messerle made the announcement at a wildlife conservation workshop at the Pennsylvania State Grange Leadership School at Elizabethtown College Tuesday.

A pipe will be constructed parallel to the creek to keep all effluents from entering the waterway as they had in the past.

During the workshop, Messerle familiarized the Grangers with the goals, functions and history of the Pennsylvania Fish Commission.

The Commission is an independent agency of the state government. All funding necessary to achieve their goals is derived from the state license fees.

4-H state leadership conference set

YORK – Thirty-six York County 4-H members will learn specialized leadership skills when they take part in Pennsylvania 4-H Leadership Congress, June 26 to 29, on Penn State's main campus.

At 4-H Leadership Congress, they will take part in assemblies, discussion and interest groups, and recreational activities.

Members participating in the event from York County are: Barbara Kilgore, Airville; Kim Wilkinson, Etters, Itle, Etters, Rita Loughran, Dallastown, Nancy Eisenhart, Thomasville; Lee Ann Schneider, Wellsville, Roy Thompson, East Berlin; Bryan Palmer, Shrewsbury; D. Wayne Gracey, Brodbecks; Jonathan Janney, Brodbecks; John Marsteller, Stewartstown; Steve Trostle, Red Lion; Jonathan Miller, Seven Valleys; Brian Utz, Hanover; Mark Ebaugh, Delta; Teri Lehigh, East Berlin; Jonathan Myers, Thomasville; Judy Waltersdorff, Hollywood Drive, York; Laurie Dobrosky, Glen Rock; Brooke Palmer, Shrewsbury; Ann Miller, Seven Valley; Maria Leto, Dallastown; Joey Welsh, East Berlin; Lisa Dobrosky, Glen Rock; Carla Bollinger, Glen Rock; Sue Swartz, Hanover; Charla Janney, Brodbecks; and Kathy Whitcraft, Loganville.

"This year's conference will include six areas of leadership orientation and development," say county agricultural agents. "A Leadership School for teen leaders, a State Leaders Forum for adult leaders, delegate workshops for 13-15-year olds, day camping training, and 4-H reporters training are aspects of the program."

Selected teen leaders will attend a special school designed to increase skills to work effectively in planning and conducting county youth programs. Topics will include communications skills, understanding social concerns and group processes, and recreation.

Leaders and Extension Staff members will meet with College of Agriculture officials and participate in educational workshops involving the understanding of leadership principles, working with groups, communications, and subject matter related to selected 4-H projects.

Also scheduled during Congress will be a day-camping leadership program. Youth between the ages of 14 and 17 will be involved in this educational experience.

Other York County 4-H members; Linda Ebaugh, Delta; Tim Eisenhart, Thomasville; Tim Beck, Seven Valley; Paul Myers, Thomasville; Tommy Welsh, East Berlin; Christy Waltersdorff, Hollywood Drive, York; Kay Swartz, Hanover; and Bonnie Wire, Spring Grove have been named to serve as Leadership Council representatives or Congress Advisors.

They will supervise program activities along with 59 other selected 4-H members from throughout the state.

Leadership Council delegates will arrive on the Penn State Campus, June 23 for two days of counseling and orientation to prepare them for their duties the remainder of the week.

Highlights of the four-day conference will include the Iron Clad Agreement, a dramatic performance about American inventions in the latter half of the 19th century; Jimmy Gross and Peggy, an electronic musical spectacular; and an educational film, "Grab Hold of Today," starring Dr. Eden Ryl, that offers suspense, excitement, and humor in emphasizing how to eliminate existing negative attitudes and free young people to prepare for tomorrow.

Lebanon County members participating in the event are: Leadership Congress, Cathy McFeaters, Megan Connor, Sandra Hartman, Nicole Emrich, Julie Bow, Kristen Clemens, Beth Shiner, Michelle Noll, Jeanne Pierce, Dana Miller, Johan Berger and Mark Bomberger; Leadership School, Bev Hale, Sue Bomberger, Linda Sellers, Eugene Hoffman and Bruce Hellerick; Street Camping, June Moonshine, Jerry Boyer, and Karen Hoke; report to the state, Kathy Murray; Adult Leaders Forum, Nancy Hoke. Karen Rarick, 4-H Program Aide, will be accompanying the delegation.

Two other county 4-H members, Brian Wenger of Palmyra and Jim Connor of Lebanon, have been named to serve as a Leadership Council representative.

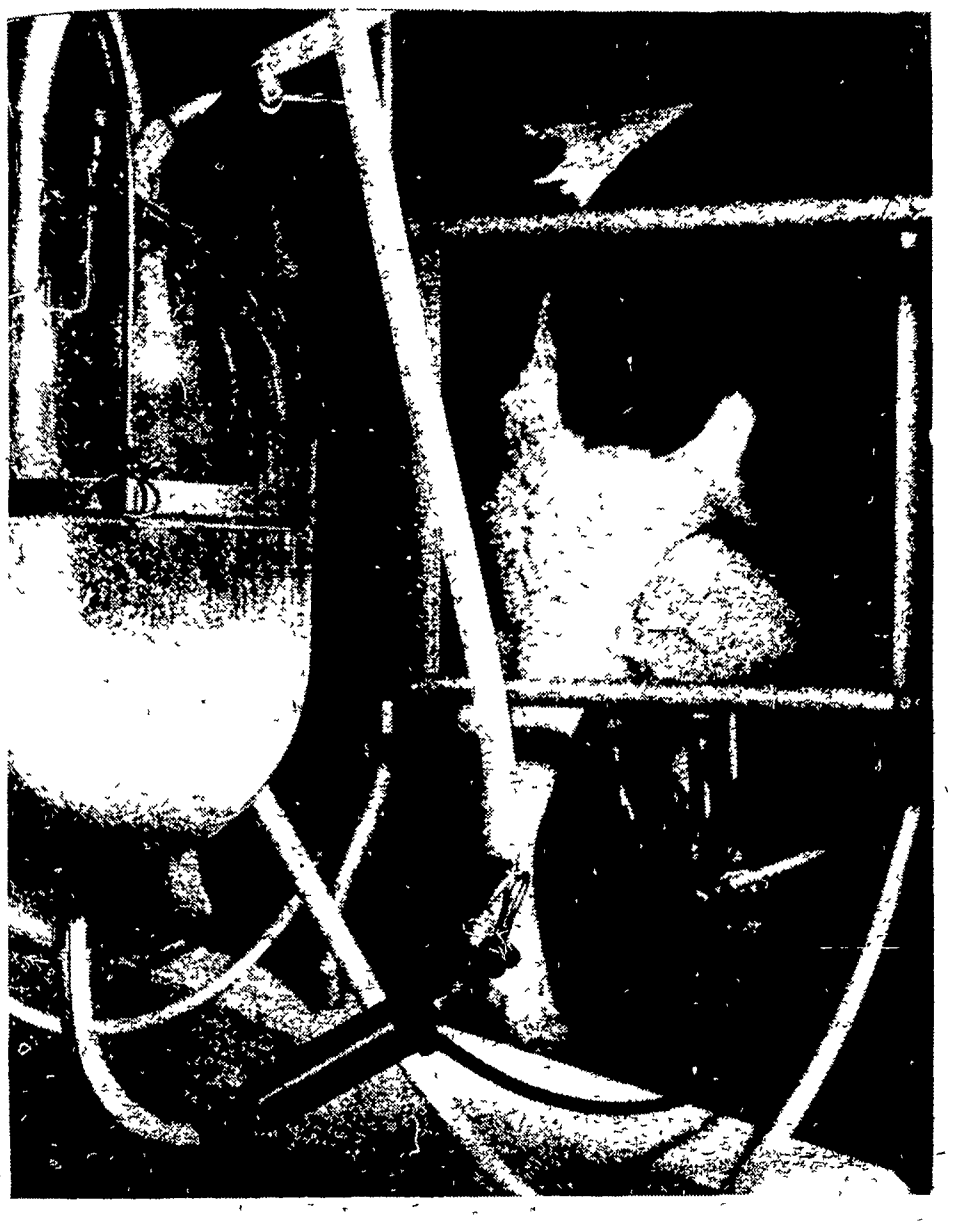
Increase the check your milking string delivers with WAYNE 38% DARI-BLEN



Your milking string can deliver a bigger check - with the help of Wayne 38% Dari-Blen.

To make milk, a cow needs protein. After each feeding, she keeps working on milk production only as long as the nutrients keep working for her. And protein is the key.

With Wayne Dari-Blen 38 percent supplement, you get protein from as many as eight different sources. As one source is used up the next carries on, like a relay team. Result: Dari-Blen feeding has boosted production in many herds as much as 20%.

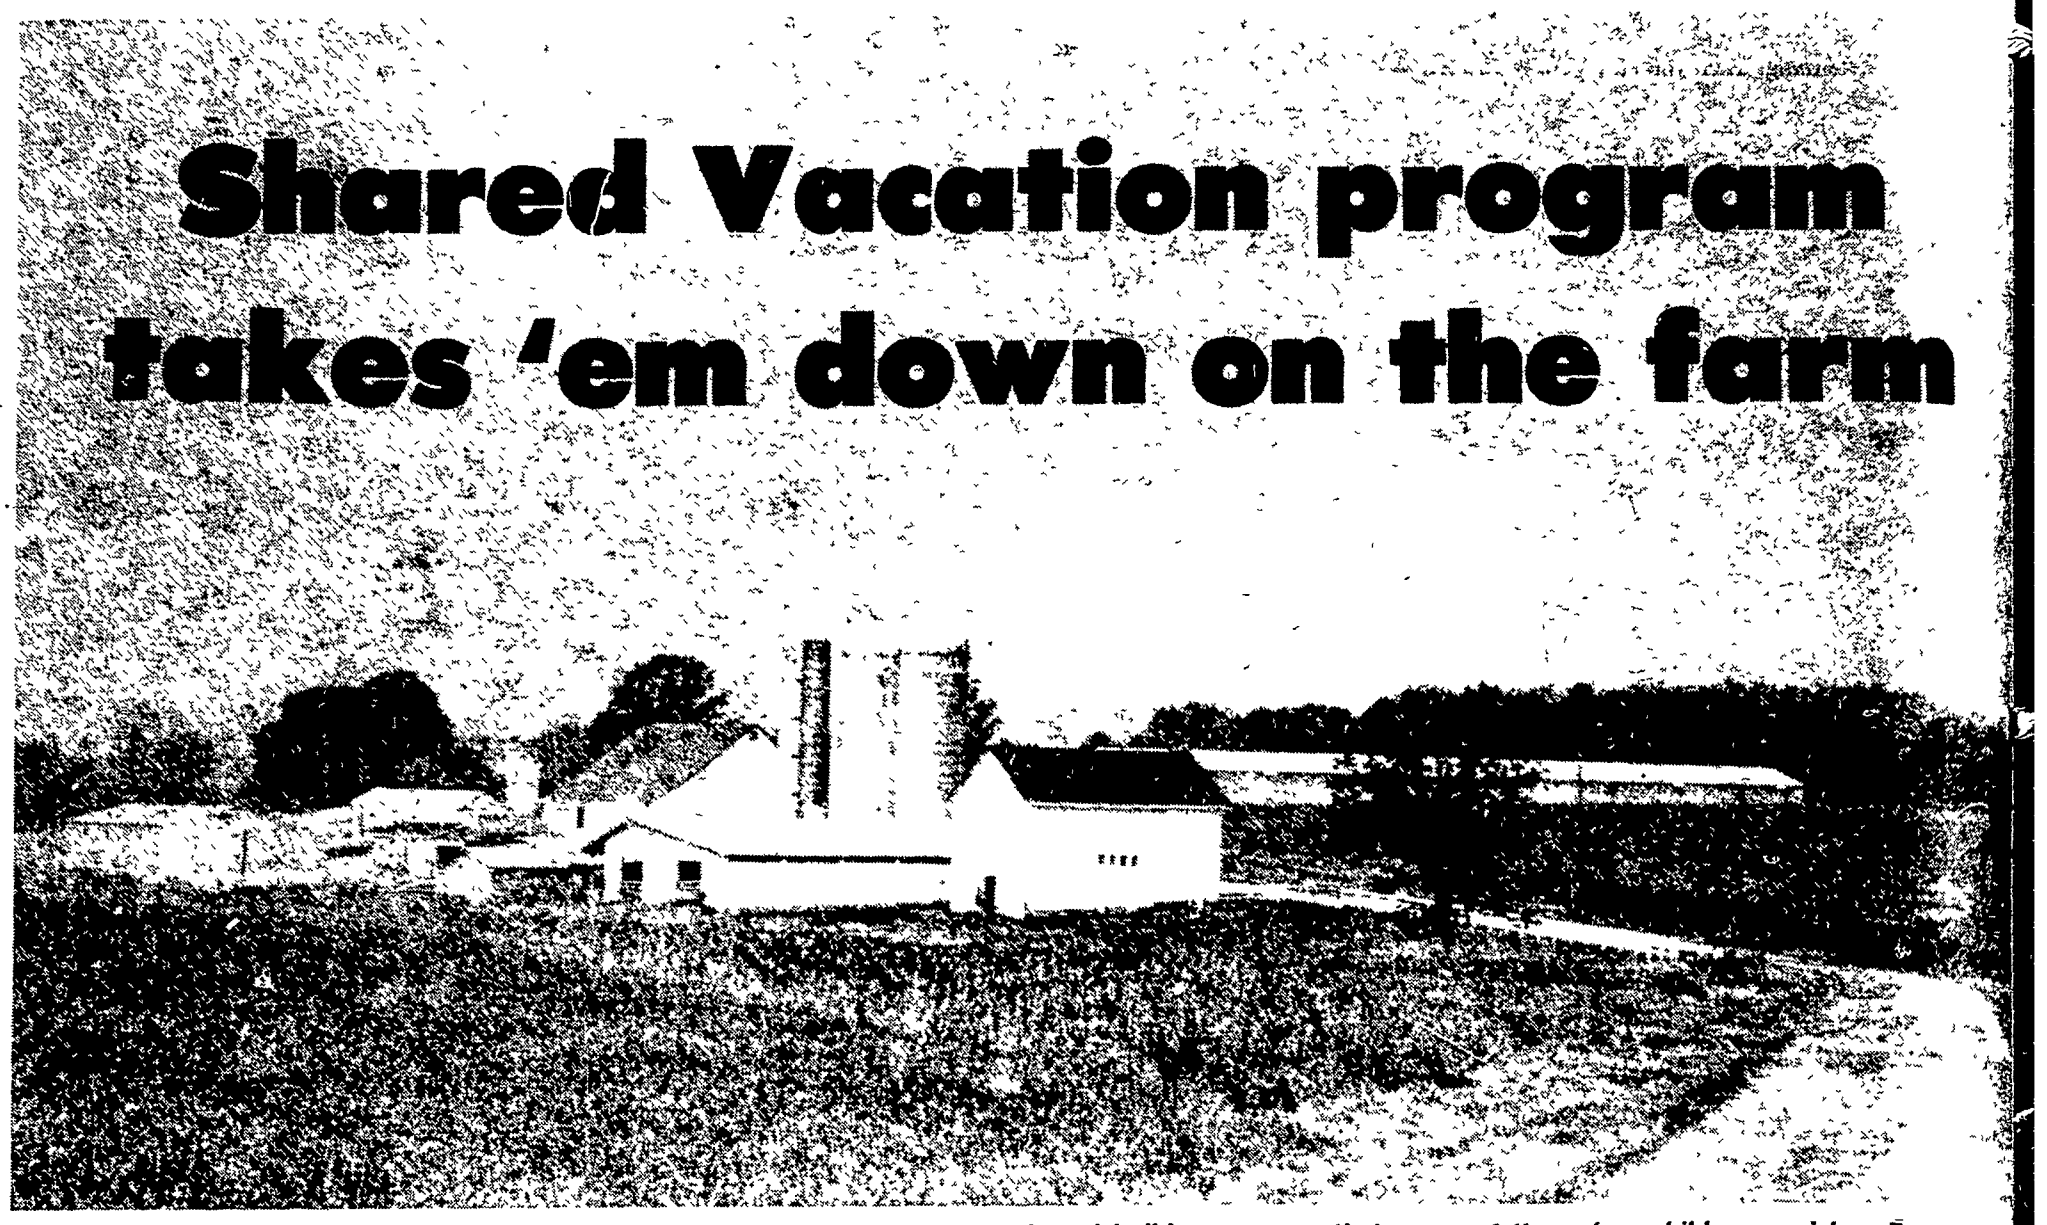
Shared Vacation program takes 'em down on the farm



Bo Joy Farm, Quarryville, would be the dream vacation side of the shared holiday program that many of the urban children envision. Few children actually get to go to a farm though.

LANCASTER – Lancaster County is the Garden Spot of America and is thus the drawing point for many vacationers across the country. Families come from far and wide to take in the rural beauty which abounds here. Tourist attractions, big businesses, Amish lifestyles, and large resort complexes continue to beckon people to this area.

But one program, in particular, is trying to open up this country and its great resources to the urban and rural poor who live here. The Shared Holiday program operated by the Lancaster County Council of Churches is attempting to place children who are referred to Shared Holiday by local social agencies in city and county homes for one or two-week "vacations." The age bracket of these children is six to 12.

According to the program coordinator Alice Heitmueller, 20 Urban Drive, Lancaster, the 20-year old program started by the YWCA in 1966 with 60 children being placed was eventually completely operated in 1977 by the Council of Churches.

Previous to 1976, the program included only urban poor. But in that year six out of a total of 87 children came from rural poor families. The Quarryville, Welsh Mountain, and Columbia areas were represented in the first year's rural poor population. In 1977, 29 rural poor children were placed with a total of 127 children that year. In that same year Mrs. Heitmueller says 147 weeks of vacation -- or two-and-one half years of one-to-one involvement with families on our own communities which have needs occurred. By way of proving the need for a program to reach the poor who actually live in this garden spot, Mrs. Heitmueller stated that of the total population of Lancaster County – 320,000 – 47,000 are below the poverty level set by the government. And of these 47,000, 30,000 live outside the metropolitan area and only one-third of these 47,000 receive any type of assistance.

Lancaster Farming visited two host families who have helped in this Shared Holiday Program in the past. The first family visited was that of Thomas and Cindy Hampton, Holtwood. The Hampton family also includes sons Brad, 14, and Jason, who will be four years old this week. The Hamptons have lived at their 34 acre homesite since 1968. Thomas is a millwright for Armstrong and he and his wife also operate five and one-half acres of grapes and two acres of fruit trees.

"We have been in the program for eight to 10 years," began Cindy. "We had three different boys in that time; one for five years, one for one year and our present guest for four years," she continued.

"We got involved in a local program because we were convinced of a real need here. It operates in the same manner as the widely publicized Fresh Air program that involves children from New York City. The advantages of the local program are the chance to actively become involved in our community and the possibility of establishing an on-going relationship with a child and his parents," she stated.

Cindy says she went into the program with what she hoped was an open mind and tolerance. "If you undertake this sort of thing with a Good Samaritan point of view and a mental attitude against welfare families, you may be unhappy with the results," she cautioned. "I think if you look at it as a chance to share – that is what it is called – your home and family and activities with another child without questioning these kids but rather accepting them as they are, you will be more realistic.

I have always felt that there has to be a better way to change things than through government intervention or just complaining. You need to get actively involved or nothing will change," she stated.

"Since these children are right here in the county and not far away, you can become more involved with them throughout the year. You get attached to them and get to know them better.

It takes some committment and dedication when you start a one-to-one relationship like this, but the children and your family both share in this experience," she explained.

"We learned that these children rarely go more than a few blocks away from their home in town and are amazed by the open areas in the country. Sometimes they have trouble adjusting to so much space and are frightened, especially at night. We also were amazed at their almost adoration of Tom and the fact that he is here for meals and that we work in the vineyard and orchard together

Our children learn from them, too, to appreciate many things," she added. For example, Cindy related how their most recent guest really enjoyed working in the pumpkin patch Brad tends. "Brad gets weary of the gardening, but Kenny just loves to be out there working in the pumpkins!" Cindy exclaimed.

She also noted that if things do not work out between the family and the child it is not a continuing program

"Sometimes personalities don't blend or you find you

(Turn to Page 43)

Steve, Joyce, and Scott Wagner are busy shelling peas. The friend that visited them especially enjoyed the food that Joyce prepared. Corn on the cob straight from the garden was a real treat.

Cindy Hampton works in the vineyard thinning grapes. To many of the visiting children, families working together on the farm is a novel experience.

Shared Vacation

(Continued from Page 42)

can't handle something. Then you call Mrs. Heitmueller and she will take care of it from there. She is truely remarkable!"

Cindy has decided after several years of experience with this program that even if it is not the answer to breaking the welfare cycle, if it changes the course of even one child's life for the better if is worth the try.

Since the urban children are often more "street-wise" than rural familes are, Cindy suggests beginning with a child a few years younger than the host family's children. She also advised prospective families to be themselves, to go about their home life as usual, and not to buy gifts or do special things all of the time for these children.

A second family which has hosted a Shared Holiday child is the Robert E. Wagner family. The Wagners own a dairy farm 11 miles south of Quarryville near Little Britain. As was the case with the Hamptons, the Wagners' guest was and is a Lancaster City resident. Three Summers ago, Joyce Wagner answered an announcement through her church for such a program.

"I really got involved in it because our son Steve, then four years old, had no one to play with. Our application was accepted and we went to orientation the first year," she says.

"Brian, a fair-skinned, red-headed six-year old, came for two weeks that first Summer," she relates. "After a day or so of being shy and a correction in acceptable language, he opened up and we had such a good experience that we had him back again the next year and he will be coming again this Summer," Joyce related.

Repeating what Cindy Hampton had said, Joyce explained that Brian lived on South Queen Street but had never been beyond two blocks of his home.

"When we crossed over Engleside Bridge (272 South of Lancaster) he wanted to know where we were going! He was amazed at the space and all the green grass and fields. He had played in the street and sidewalk, not in a yard, she explained.

In addition to the open space and greenery abounding in the countryside, totally new to him, Joyce said Brian was captivated by the food served at Bo Joy Farm.

"He was surprised that we had milk in a glass jar in the refrigerator. He always saw milk stored in cardboard cartons. He finally saw the cows being milked and understood how we got our milk.

He ate everything with enjoyment. He asked a lot of questions all the time, and that is good. He always wanted to know what I was cooking for the meals. He was really amazed that we could pick, husk, and cook corn-on-the-cob all in such a short time."

Also echoing Cindy Hampton's comments, Joyce Wagner found that Brian was just glad to be with them and out in the country. "We just did what we do everyday and he loved it," Joyce said. "He enjoyed feeding the calves," she added.

"We were well pleased with these shared holidays," Joyce stated. "We tried to make him feel at home, a part of our family, to make him feel comfortable. We didn't to anything special."

Although both the Hamptons and the Wagners are rural familes, many host families are suburban, as well. Mrs. Heitmueller explained that many more rural families could be beneficial, and many more rural poor need placement, especially the Quarryville, Columbia, and Welsh Mountain areas. She remarked that so many of the boys insist that they are going to a farm even though the counselors explain that is not the case.

"These children live in Lancaster County, but they have never been on a Lancaster County farm and that is where they think they are going!" she added.

Although the child cannot request a farm host family the host family can request the sex and age of the child.

Program dates for this year are July 10 to 16 and July 31 to August 6 for one-week visits and July 10 to 22 and July 31 to August 12 for two-week visits. Anyone still wishing to apply as a host for the July 31 to August 6 one-week and the two two-week visits can obtain information from the Lancaster County Council of Churches office at 447 East King Street, Lancaster, 17602, phone number 717-394-2029 or contact Mrs. Heitmueller, 20 Urban Drive, Lancaster, 17603.

On being a farm wife

—And other hazards

By JOYCE BUPP

Know a farmer who boasts that he hasn't missed a milking or a feeding in 20 years?

What a shame for him and his family.

The world is full of so many wonderful things that deserve recognition and moments of quiet contemplation. And no matter how much any farmer, or anyone else for that matter, enjoys their work, an occasional brief break for rest and recreation is an absolute "must" for the enjoyment of living.

Our favorite mini-break is a two-day June visit to the hunting cabin in the pine-scented mountains of central Pennsylvania.

With just a few bare necessitites and a change of clothes, our family moves to a quieter and more simple way of life: doggies sizzling at the end of a stick held over a crackling campfire, hikes through dark woods of hemlock and rhododendron, spying for native brook trout in the icy streams; meadows of wildflowers and mountaintops pink with the delicate blooms of laurel.

As usual, though, we found more than peace and serenity.

Like litter, for instance.

Hike to what seems like the most remote spot in the entire state – and a beer can will have gotten there first.

Thriving in the moss-covered acid soil of the mountains are clusters of pull tabs from aluminum soft-drink containers. Cigarette butts and filter tips appeared to be sprouting in abundance, too.

I recall seeing a long-lost muffler high atop one isolated mountain road, an empty donut box, assorted lids, straws and cups from fast food restaurants and enough bottles to start a recycling center.

Even an abandoned refrigerator managed to wend its way to an eternal rest a hundred yards down a steep slope.

I've heard that "you can't take it with you."

But that's no excuse to leave it all lying around to destroy the scenery for everyone else.

Junior Cooking Edition

This may be the last week June dairy recipes, but a de variety can be found ed here.

Included are: ice cream pie, chocolate ice cream roll, cherry cream pudding, caramel pudding, banana split, yogurt, cup custard, pumpkin torte, and steam pudding. Pick a favorite and get busy.

Keep those Summer recipes coming in for now is a good time to take the extra time and try new recipes to make. Send your recipes to: Lancaster Farming, Junior Cooking Edition, Box 366, Lititz, Pa. 17543. Include a complete list of ingredients and don't forget the directions. Put your name, address, age, and phone number at the bottom.

ICE CREAM PIE

⅓ cup peanut butter
⅓ cup molasses
2 cups crunch rice cereal
1 quart vanilla ice cream

Mix peanut butter and molasses together in a saucepan and add rice cereal. Butter a pie plate and press the mixture into plate to form crust. Freeze. Let one quart vanilla ice cream melt. Add to crust. Then freeze. Serve cold.

Titus L. Wadel
Age 10
Chambersburg, Pa.

xxx

CHOCOLATE ICE CREAM ROLL

3 eggs
¼ cup water
1 cup granulated sugar
¾ cup flour
¼ cup cocoa
¼ teaspoon salt
2 teaspoons baking powder
1 teaspoon vanilla
½ gallon ice cream

Beat eggs until thick, add water, sugar, and continue to beat. Sift salt, flour, cocoa, and baking powder, mix well. Add vanilla. Line a sheet cake pan with greased paper. Pour in batter. Bake at 425°F. for 12 to 15 minutes. Sprinkle powdered sugar on a tea towel. Turn cake with towel inside. Allow to cool. Unroll and spread with ice cream, then freeze.

Annie K. Glick
Age 9
Bird-in-Hand, Pa.

xxx

CHERRY CREAM PUDDING

2 cups crushed graham crackers
1 stick margarine (melted)
2 cups confectioner sugar
8 oz. cream cheese
1 package whipped cream topping mixed according to directions
cherry pie filling

Mix crushed graham crackers and margarine. Bake eight to ten minutes. Set aside. Mix sugar with cream cheese and whipped topping. Place in pie shell. Top with cherry pie filling or fresh fruit.

Annie K. Fisher
Quarryville, Pa.

xxx

CARAMEL PUDDING

1 cup brown sugar
2 tablespoons butter
2 quarts milk
4 tablespoons flour
eggs, if desired
1 teaspoon salt
1 teaspoon vanilla

Cream brown sugar and butter. Add milk to mixture and bring to a boiling point. Stir to prevent scorching. Combine egg and flour. Add small amount of milk to make paste. Add to boiling mixture. Cook until thick.

Eugene Weaver
Age 10
Mifflinburg, Pa.

xxx

BANANA SPLIT

2 cups graham cracker crumbs
5 tablespoons melted butter
2 cups confectioner sugar
¼ lb. soft margarine
2 eggs
1 teaspoon vanilla
4 or 5 bananas
pineapples (well-drained)
whipped cream
ground nuts
red cherries

Mix graham cracker crumbs and melted butter and press into an oblong baking pan. Then beat confectioner sugar for five minutes, and add margarine, eggs, and vanilla. Spread this over the cracker crumbs. Slice bananas over pudding. Put well drained pineapples over top. Next put whipped cream on top. Spread pineapple over whipped cream, then add nuts and cherries.

Susie Z. Burkholder
Age 15
Ephrata, Pa.

xxx

YOGURT

2 quarts milk
½ to ⅔ cup fresh yogurt

Heat milk to boiling point. Cool to 100°F. (lukewarm), then add fresh yogurt. Beat a little to break milk solids. Pour into pint jars. Place in large kettle of warm water up to the jar neck for incubating from three to five hours or until set. The water should be 105°F. warm. After it is set, one should refrigerate immediately.

Can be served as salad dressing for tossed greens or vegetables. Also good on baked potatoes or warm apple pie, fresh fruit, apple sauce, jelly or jam.

Verna Shirk
Age 14
Ephrata, Pa.

Ladies Have You Heard

By Doris Thomas

Lancaster Home Economist

UNDERSTANDING FOOD ADDITIVES

Awareness about the use of additives in our food is widespread and has taken on increased concern in the past few decades. The questions at issue for food additives are whether or not they are necessary and, if so, whether or not they are safe.

An excess of 2,000 substances are currently being added to foods for flavoring, coloring, preservation and a variety of other purposes. What are these "additives" and do we need them?

The Food Protection Committee of the Food and Nutrition Board (National Research Council/National Academy of Sciences) defines a food additive as "a substance or mixture of substances other than a basic foostuff, which is present in a food as a result of any aspect of production, processing, storage or packaging."

There are two broad types of additives: 1) Intentional Additives -- added deliberately to perform specific functions, and 2) Incidental Additives -- substances present in foods in trace quantities as a result of some phase of production, processing, storage or packaging. Packaging materials in minute amounts that become part of foods are also incidental additives.

Some food additives come from natural sources. Lecithin – from soybeans or corn – is an example. It contributes desired consistency in producing many foods. Annatto, a naturally occuring yellow dye, is frequently used to color foods and is another example.

Other food additives are manufactured and are often the same as those found naturally in food. The vitamins and minerals used to improve nutritive value are examples.

Although manufactured additives are frequently called "chemicals," they are no more so than those made by nature. A difference may lie in the fact that manufactured additives are more concentrated, freer of objectionable impurities and more consistent in quality than the natural products.

Nutritional deficiency diseases which are considered largely nonexistent in the U.S. today thanks to food additives include: rickets, eliminated by the addition of vitamin D to milk; goiter, eliminated by the use of iodized salt; and pellagra, eliminated due to the enrichment of bread and all-purpose flour with niacin.

All additives, whether from natural or other sources, are "chemicals." They serve more than 40 functions, but it is simpler to group them into five common classes: preservatives, colors, flavors, texturizers and nutrients.

Preservatives include natural substances such as spices and essential oils, which contain antibiotic and antifungal agents, and synthetic substances such as butylated hydroxanisole (BHA) and butylated hydroxytoluene (BHT).

Colors may be derived from vegetables (beets, carrots, corn) or from spices (paprika, tumeric). They are also derived from coal tar dyes, known as "synthetic colors," such as sunset yellow (FD & C Yellow No. 6) and red (FD & C Red No. 2).

Flavors occur naturally from such substances as herbs, seafood and eggs and can be enhanced from additives such as saccharin and monosodium glutamate (MSG).

Texturizers are additives used to stabilize and thicken. Examples are naturally occurring tree gums or synthetically prepared polysorbate 60.

Nutrients include vitamins, such as A, D and niacin, a B vitamin, and minerals, such as calcium carbonate and magnesium sulfate.

Food additives have become part of everyday life and undoubtedly will play an increasing role with advances in good technology. Industrial, University and U.S. Food and Drug Administration scientists are continually analyzing additives and natural toxicants with new and improved experimental tools in order to fully identify all effects these substances have on our health.

The best way for the consumer to be informed is to get facts based on scientific information, not emotion. Reliable sources include:

Rabbit conference set

UNIVERSITY PARK – A rabbit conference will be held here on Friday, July 28 and Saturday, July 29, at the Kern Graduate Center on the main campus of The Pennsylvania State University.

This conference is being planned for anyone interested in the rabbit industry. Presentations will include talks on nutrition, genetics, management, disease and parasite control, housing, equipment, breeding, research needs, commercial rabbit production, processing and marketing.

Also, workshops will allow everyone to choose a subject and participate in discussing show rabbits and management, association activities, use of pharmaceuticals and how to show a rabbit.

A program, list of inns and motels and a registration form can be obtained by writing to: Conference Center, 410 J. O. Keller Building, University Park, Pa. 16802. Please specify on your request, "Rabbit Conference" program.

Everyone with interest in the rabbit industry is welcome to attend. Conferees must preregister.

Short-cut grass may kill lawn

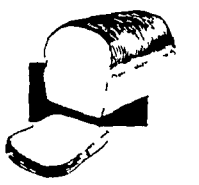
UNIVERSITY PARK – With all your hard work trying to maintain a lush, dense, healthy lawn and the empty bottle of liniment to prove it, you may be the one who is causing your lawn to thin out and eventually die, according to the Penn State Extension Service.

Before you start blaming the seed, fertilizer, or the directions on the box or bag, check the height of the cutting blade on your mower. The height you are mowing your grass may determine the life or death of your lawn. Close cutting doesn't give the grass a chance to manufacture the food it needs to build strong deep root systems and a dense sod. Giving your lawn a close shave doesn't cut down on the number of times it must be mowed or add to its attractiveness either. It's the evenness of the cut and not the closeness that makes a lawn attractive. Lawns of a combination of Kentucky bluegrass-red fescue should be cut at a height of 1½ to 2 inches. During the Summer 2 inches is even better.

However, certain types of lawn grasses are well adapted to close mowing. Bentgrasses and Zoysia can stand a close shearing of ½ to one inch.

June is dairy month

Home on the Range



Puddings for the milk lover

This is the last week of June Dairy Month. And, this week's offering of dairy recipes is puddings. Hope you enjoy them.

Now that June Dairy Month is over, we will again be returning to recipe themes set up on a monthly basis. To take part in the weekly column, check the new calendar each month and send you contributions to: Home on the Range, **Lancaster Farming Newspaper**, Box 366, Lititz, Pa. 17543.

Our special gifts to all of our dairy recipe contributors are now in the mail, and you should have either received them by now or will be receiving them in the next few days. If, by some chance, you do not find a gift in your mail box and you did help with this month's recipes, send us a note and we'll see that you get a gift for your effort.

RICE PUDDING

1 quart milk
¼ cup rice (not instant)
2 eggs
½ cup sugar
1 teaspoon vanilla

Combine the milk and rice and cook until the rice is soft, about one hour. Beat two eggs and sugar until foamy. Add beaten eggs and sugar to rice and cook until thickened. Add vanilla.

Audrey Nemeth
Rockaway, N.J.

xxx

CREAMY PUDDING

4 cups milk (plus ½ cup)
½ cup brown sugar
½ cup granulated sugar
1 tablespoon flour (rounded)
1 tablespoon cornstarch (rounded)

Heat four cups milk in heavy two-quart saucepan. Mix together dry ingredients; add eggs, beating until smooth. Slowly add ½ cup milk. Gradually add to heated milk. Bring to boiling point, stirring constantly. Cool and beat once more before serving.

Emma Mae Esh
Gordonville, Pa.

xxx

RICE PUDDING

⅓ cup rice
2 quarts milk
¾ cup sugar
2 teaspoons vanilla
Nutmeg

Place all ingredients except nutmeg in a two quart baking dish and mix well. Sprinkle nutmeg over top. Place in 325 to 350 degrees F. oven. Cook until rice is tender and mixture is creamy. Stir at intervals.

Sylvia J. Ruoss
Blain, Pa.

xxx

CRACKER PUDDING

½ cup coconut
1 cup cracker crumbs
2 eggs
½ cup sugar
1 quart milk
1 teaspoon vanilla

Beat eggs, add sugar, and stir well. Add milk gradually and let come to a boil. Turn down heat. Continue stirring while adding coconut, vanilla, and cracker crumbs. Bake at 350 degrees F. in a two quart baking dish for 45 minutes. Stir occasionally while cooling.

Recipe Theme Calendar

JULY

8	Reunion Recipes Deadline July 1
15	Cherry Recipes Deadline July 8
22	Zucchini Recipes Deadline July 15
29	Pear Recipes Deadline July 22

Recipes listed for July

LITITZ – With July come fireworks, hot weather, and, of course, a bountiful supply of fruits and vegetables. Therefore, for three weeks, "Home on the Range" will center around Summer produce as a theme. However, to begin July, we will feature one theme which should come in handy for the rest of the Summer – reunion recipes.

How many times have you been asked to bring a dish to a family reunion and have it stretch for as many as 20 or 30 people? Most likely, you have become known for one type of food and never deviate from that recipe. Every now and then, however, it is nice to have a change, so for July 8, send us any large-group-type recipes you have found to be successful. Include in those recipes just how many people they will comfortably serve.

We are looking for almost any type of food, recipe with one exception – cakes. Do not send a cake recipe for this particular week's theme. Better choices would be rolls, casseroles, desserts, salads, finger foods, drinks, etc. These recipes should be in our office by July 1.

For July 15, we would like to print a multitude of cherry recipes that all our readers can enjoy while this fruit is still in season. Send those recipes to us by July 8.

An ever popular squash is zucchini. It goes well in breads, desserts, casseroles, and salads. So, for the fourth week in July, the 22nd, we will be honoring this favorite type of garden produce.

One delicious fruit that is rarely featured in recipe columns is the pear. Therefore, on July 29, this fruit will be the center of our attention. If you have any recipes featuring the pear, send them to us by July 22.

Send all recipes to "Home on the Range," **Lancaster Farming Newspaper**, Box 366, Lititz, Pa. Make sure to print your name, address, and phone number on each sheet of recipes.

FRUIT COBBLER

Fruit of choice
2 cups flour
4 teaspoons baking powder
2 tablespoons sugar
1 teaspoon salt
½ cup shortening
⅔ cup milk
1 egg

Put fruit (fresh, frozen or canned) in a cake pan. Add tapioca or flour and sugar to thicken juice and put pan of fruit in the oven to heat until the topping is made. Combine ingredients for dough and drop on hot filling by the spoonfuls. Bake at 400 degrees F. about 20 minutes or until brown. Serve with fresh, cold milk.

Mary Weaver
Mifflinburg, Pa.

xxx

SPANISH CREAM

1 quart milk
1 box unflavored gelatin
4 eggs, separated
8 tablespoons sugar
Vanilla

Combine milk and gelatin over heat. Slowly let the mixture come to a boil. Beat egg yolks and add 4 tablespoons sugar. Add yolks to mixture and remove from heat. Beat egg whites until stiff, adding 4 tablespoons sugar and a little vanilla. Fold egg whites into mixture. Pour into dish and cool. Let set overnight. Serve with whipped cream and top with a cherry.

xxx

BUTTERSCOTCH PUDDING

1½ quarts boiling milk
1 cup molasses
1 cup brown sugar
1 cup flour
½ cup water
1 tablespoon butter
1 tablespoon vanilla
5 eggs (beaten)

Combine molasses, brown sugar, flour, water, butter, vanilla, and eggs Mix into boiling milk. Serve cold.

Mrs. Daniel S. Stoltzfuls
Kinzers, Pa.

PUMPKIN PUDDING

1 tablespoon butter
¾ cup brown sugar
¼ cup milk
2 cups milk
2 egg yolks
2 tablespoons flour
1 tablespoon cornstarch
¼ teaspoon salt
½ teaspoon cinnamon
1 or 2 cups pumpkin
¼ teaspoon cloves
1 tablespoon whiskey

Cook the butter, brown sugar, and quarter cup milk for five minutes then add the rest of the ingredients which have been combined in a separate bowl. Stir frequently. When pudding thickens and begins to bubble, remove, cook, and serve.

Mrs. Ray Seidel
Lenhartsville, Pa.

xxx

GRANDMA's PUDDING

1 cup flour
6 cups milk
3 eggs
2 cups brown sugar

Put five cups of milk on stove on medium heat and while heating, separate eggs and mix yolks with sugar, flour, and remaining cup of milk. When milk is boiling, pour in the thickening. Cook about two to three minutes. Then beat whites stiff and stir in immediately after removing from stove. Delicious with whipped cream, graham cracker crumbs and bananas.

Mrs. Marvin Hoover
Womelsdorf, Pa.

xxx

RICE PUDDING

4 cups cooked rice
4 cups milk
1½ cups sugar
2 slightly beaten egg yolks
2 tablespoons margarine
2 stiffly beaten egg whites
Nutmeg

Combine first five ingredients and bring to a boil over medium heat, stirring constantly. Cook until slightly thickened – about 10 to 15 minutes. Gradually fold in beaten whites. Cool for 15 minutes. Stir and pour into serving dish. Garnish with nutmeg.

Sharon Huegel
Lancaster, Pa.

HONEY BROOK MOLASSES

• BAKING MOLASSES • TABLE SYRUP
• BLACKSTRAP MOLASSES
• CLIP & SAVE FOR YOUR RECIPE FILES:

STONE JAR MOLASSES COOKIES

1 cup Honey Brook Baking Molasses
½ cup shortening
1 tsp. soda
2¼ cups flour
1¾ tsp. baking powder
1 tsp. salt
1½ tsp. ginger

Heat Molasses to boiling point. Remove from heat. Stir in shortening and soda. Measure flour by sifting. Blend remaining ingredients: stir in. Chill dough. Heat oven to 350° (mod.). Roll thin (1/16") Cut into desired shapes. Place on lightly greased baking sheet. Bake 5 to 7 min. DO NOT OVER-BAKE. Makes about 6 doz. 2½" cookies.

Easy Creamy Icing

Blend 1 cup sifted confectioners' sugar, ¼ tsp salt and ½ tsp. vanilla or other flavoring (lemon, almond or peppermint, etc.) and liquid to make easy to spread (about 1 tbsp. water or 1½ tbsp. cream) Tint, if desired, with a few drops of food coloring Spread on cookies with spatula or pastry brush.

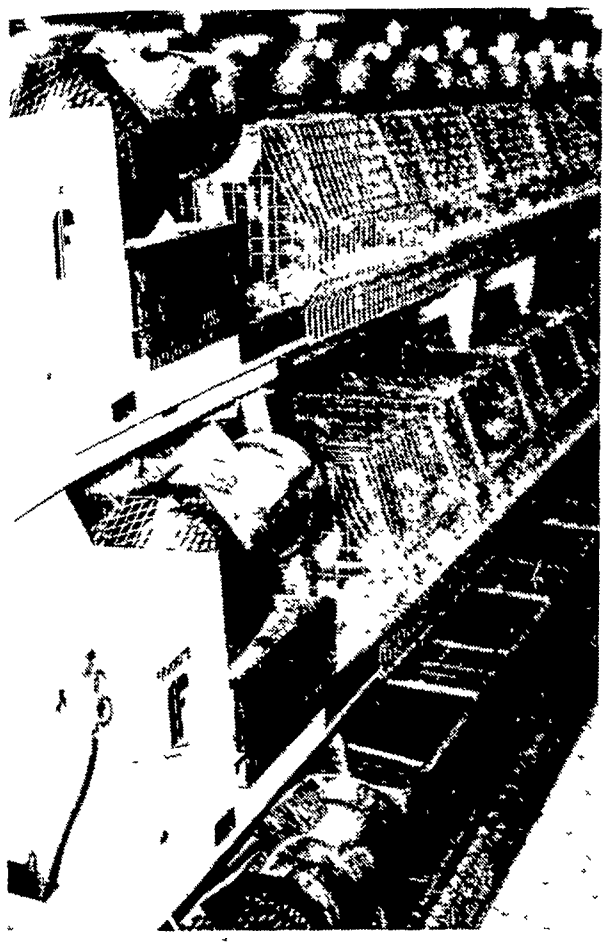
POULTRY EQUIPMENT

LOCALLY MANUFACTURED BY EXPERIENCED PEOPLE

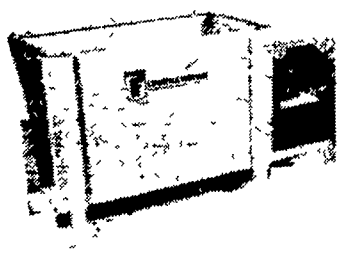


FAVORITE START GROW SYSTEMS

FEATURES:

- Double galvanized back-bottom.
- Unique start-grow cage front design.
- Start-grow cage bottom with 1" x 1" wire.
- Grow cage bottom with 1" x 2" wire.
- Start-grow cages notched for waterers.
- Start-grow cage waterers adjustable from outside of cage.
- Swinging cage doors lock open or closed.
- Partitions designed to eliminate bird movement between cages.
- Galvanized feed-saver chick guard.
- Flat chain and trough feeding.
- Feeding speeds up to 60 feet per minute.
- Hi-Torq speed reducer with three year warranty.
- Adjustable positive-lock hopper feed gate.
- Positive feed return to feed hopper.
- Rugged feed-chain corner assemblies.
- Unique feed manifold.
- Works well with heating system of your choice.
- 24" wide, 26" deep, 14" high.
- 30" wide, 26" deep, 14" high.

FAVORITE FLOOR FEEDING SYSTEMS



- Designed for single and multiple circuits.
- Hi-Torq speed reducer with three year warranty.
- Flat feeding chain speeds up to 60 feet-per-minute.
- Positive feed return to feed hopper.
- Adjustable, positive-lock hopper feed gate.
- Several feed saving trough designs.
- Anti-roost grill for feed troughs.
- Mini 1- and 2-line hoppers for suspended feeding systems.
- Standard 1-, 2-, and 4-line hoppers, with adjustable legs.

FAVORITE "CAL-AIR" CAGE SYSTEMS

FEATURES:

- Shallow (reverse) cage design.
- 4-Deck or 3-Deck configurations.
- No dropping boards or scrapers required.
- Double galvanized back-bottom-egg tray.
- Cages with angled fronts.
- Cage doors in front.
- Bottom partition wire is welded to precise slope of cage bottom.
- Flat chain and trough feeding.
- Feeding speeds up to 60 feet per minute.
- Hi-Torq speed reducer with three year warranty.
- Adjustable, positive-lock hopper feed gate.
- Positive feed return to feed hopper.
- Rugged feed-chain corner assemblies.
- Unique feed manifold.
- Simplified egg collectors.
- Flexible egg collector cups.
- 12" egg collector cross-belt.
- Cross-belt runs underneath egg collectors.
- Easy access to all decks.
- Floor stand or hanger support systems.
- 12 inches deep in various widths.

Farm Women Societies

Berks Co. Society 4

Berks County Farm Women Society 4, met at the home of Jean Waldo, Boyertown R4, on June 6, with 14 members and two guests present.

Mrs. Ruth McMullen presented three $10 prizes to the following girls, who were first in their Home Economics' class upon their graduation: Senior High, Pamela Weisel; Jr. High, East, Shelly Ruhl; and Jr. High, West, Sherry White.

The program was presented by Miss Marybelle Waldo, Collegeville, who showed slides on her trip to the Holy Land.

The next meeting will be at the home of Evelyn Becker, Kutztown, on July 11.

Lancaster Co. Society 3

On June 17, Lancaster County Farm Women Society 3 met at the Salem Lutheran Church, Ephrata.

Mrs. Allegra Leininger introduced Miss Martha Gregory, who is the winner of the $300 scholarship presented by the Society. Martha will enter Penn State in the Fall majoring in food science.

It was announced that the members of Society 3 will be entertained on July 12 by Society 14 at the Farm and Home Center.

The group decided to give donations of $50 to the dairy princess program, $50 to the American Cancer Society, and $100 to the Easter Seal fund.

Members of the group will travel to Ocean City, N.J. on August 5. Today, June 24 the Society is taking a trip to Tangier Island.

The program for the day was presented by the New Life for Girls Rehabilation Center, located near Dover, York County.

The next meeting will be the family picnic at Shady Grove Park, on July 16. Members are to furnish a salad or a dessert.

Lancaster Co. Society 14

Lancaster County Farm Women Society 14 recently met and went miniature golfing at Villate Green. On return, a short business meeting was held.

Mrs. Viola Hostetter, president reported on Spring Rally at Hershey, the Co. picnic Aug. 2, and the group is scheduled visit to Conestoga View July 20.

Mrs. Ann Hinkle, volunteer coordinator for the Blind Association explained closed circuit radio, volunteer reading, and gift shop needs for volunteers. Members volunteered to "try out" for these volunteer experiences.

Hostesses were Mrs. Ada Rohrer, Mrs. Esther Kreider, and Mrs. Meryl Meloy.

The July meeting will be held at the Farm and Home Center July 12 at 1 p.m. Society 3 and the county officers will be entertained. Mr. Paul Neff will be the speaker. Hostesses will be Mrs. Janet Leaman, Mrs. Dorothy Canter, Mrs. Jean Thomas, and Miss Miriam Leaman.

Lancaster Co. Society 19

For their June meeting, Lancaster County Farm Women Society 19 took the Lancaster City Walking Tour. Close to 20 members enjoyed learning the history and seeing the architecture of the buildings in Lancaster.

After the tour, the group had a Dutch treat at the Jasper Restaurant on King Street. Mrs. Harold Saylor, president, presided over a short business meeting.

The group donated $100 to the county project, the Welsh Mt. Clinic. They also gave $100 to the Lancaster County Dairy Princess contest.

The next meeting will be a pig roast to be held on July 8, beginning at 6:30 p.m. It will be at the Musser's Springhouse, near Mt. Joy.

Lancaster Co, Society 22

Twenty-three members of Lancaster County Farm Women Society 22 attended the June meeting held at Lancaster County Park A bag lunch was enjoyed by all with dessert, coffee, and punch supplied by hostesses Vi Weller and Claire Hess

Helen Witmer, president, conducted the business meeting reporting on the Spring Rally and the entertaining day provided by Society 2. On August 2, the Lancaster County family picnic will be held at Pavilion 3 at the Lancaster County Park.

Members were reminded to bring priced articles for the bazaar table for the Lancaster County Farm Women's convention to be held at the Farm & Home Center on November 4

The next meeting will be held at the home of Mrs Elvin Sangrey, Lancaster R1. All members are to bring needles and thread to sew cancer pads. A talk and walk along the Conestoga creek with a County Park Naturalist was the highlight of the days activities.

CUP CUSTARD

3 eggs
⅓ cup granulated sugar
¼ teaspoon salt
3 cups milk
¾ teaspoon vanilla

Beat the eggs, then add the sugar, salt, scalded milk, and vanilla. Mix well. Pour into six custard cups of ½ cup or 4 oz. capacity. Place the cups in a pan and pour in one inch of boiling water. Bake uncovered at 350°F. for 35 minutes. When done, a knife should be clean after drawn from the center of it. Sprinkle cinnamon on top before baking, if desired. Can be eaten cold or hot.

Narvon, Pa.

xxx

PUMPKIN TORTE

2 cups graham crackers, crushed
⅓ cup granulated sugar
½ cup butter
2 eggs, beaten
¾ cup sugar
8 oz. cream cheese
2 cups pumpkin
3 egg yolks
½ cup granulated sugar
½ cup milk
½ teaspoon salt
1 tablespoon cinnamon
1 envelope unflavored gelatin
¼ cup cold water
3 egg whites
¼ cup granulated sugar

Mix cracker crumbs, ⅓ cup sugar, and butter together. Press into the bottom of a 9 x 13 inch pan.

Next mix eggs, ¾ cup sugar, and cream cheese. Pour this over the graham crackers. Bake for 20 minutes at 350°F.

Cook pumpkin, egg yolks, ½ cup sugar, milk, salt, and cinnamon until mixture thickens. Remove from heat and add gelatin, dissolved in cold water. Cool. Beat egg whites, ¼ cup sugar, and fold into pumpkin mixture. Pour over cooled bake crust. This may be topped with whipped cream.

xxx

STEAM PUDDING

1 egg
3 tablespoons granulated sugar
2 tablespoons melted butter
1 cup milk
little salt
3 cups flour
1 teaspoon baking soda
1 teaspoon cream of tarter

Mix all ingredients together, drop on pan and set pan in kettle with a little water in the bottom. Steam ¾ of an hour to one hour in tight kettle. Do not lift lid while steaming. Serve with milk and fresh fruit.

Kendy's Kollumn

by Kendace Borry

Summer officially arrived this week, and all anyone has to do is look in the back seat of my car to know I'm ready for it There you will find the odd assortment of tennis rackets, baseball bats, sleeping bags, and cowboy boots -- all ready for action

I never could stand to sit still and have grown up with a love of playing sports. The result is that I've become active in playing softball and tennis, not to mention that good old horseback riding and camping

But it can be very hard being a farm girl and liking sports. For there is also a collection of equipment at home which calls for my attention, and these include the hoe, pitchfork, and lawn mower. The dilemna of trying to fit everything into a hectic schedule can be very trying at times.

When my mother sees me trotting out the back door in my baseball uniform, she has a habit of mentioning how high the grass is. As I rummage through the junk kept in my car, looking for lost tennis balls, my friends crack jokes about how the gas mileage would increase if it was ever cleaned And as I hurry out to the stables to ride, I myself wonder sometimes how everything is going to get done. Yet it always does

Summer just has so much to offer, and the time seems to go so fast. I love those long, golden days filled with activites, both work and play And whenever there's a spare moment, you just know I'll be able to find a million things to do.

How can you ever explain it to someone from town when they ask, "Don't you get bored out there on the farm?"

Home on the Range

GRAHAM CRACKER DESSERT

3 cups milk
½ cup sugar
1 cup graham cracker crumbs
Pinch salt
1 teaspoon vanilla
2 cups whipped cream
Banana slices

Heat milk. Add sugar, graham cracker crumbs, and salt. Bring to boil, stirring continuously. Remove from heat, add vanilla. Cool. Add whipped cream. Top with banana slices.

Mrs. Elmer Wenger
Manheim, Pa.

xxx

OLD FASHIONED BREAD PUDDING

3 slices white bread
5 eggs
1 quart sweet milk
1 teaspoon vanilla
¼ teaspoon salt
4 heaping tablespoons sugar

Break bread into small pieces. Put in a two quart baking dish. Beat eggs well. Add sugar, salt, milk, and vanilla. Pour over bread. Sprinkle cinnamon on top. Bake at 450 degrees F. until knife comes out clean, about 20 to 25 minutes.

Mrs. Howard Shaw
Dallastown, Pa.

xxx

MUENSTER CHEESE

2½ gallons sour milk
2 heaping teaspoons soda
½ cup butter
2 cups sour cream
1 tablespoon salt

Let sour milk stand until like junket. Scald until it's too hot to touch then pour into cheese cloth. Let hang overnight or at least 12 hours. Crumble curds and mix two heaping teaspoons soda and ½ cup butter into them. Let stand two hours, then put into double boiler. Add one cup sour cream and melt. When melted, add another cup sour cream and one tablespoon salt. Mix well. Pour into a buttered mold. Let set until cold.

Farm Women Societies

(Continued from Page 50)

Lebanon Co. Society 5

The June meeting of the Lebanon County Farm Women Society 5 was held at the home of Margaret Light. Twenty-one members and four guests attended.

It was announced that at the 4-H fair set for August 7, help is needed at the refreshment stand. Help is also wanted for at the charity bazaar scheduled for September 8 and 9, at the Lebanon Plaza. Homemade articles, baked goods, and chow chow will be sold.

A demonstration of the microwave oven was presented by Mrs. Aletta Shadler and Mrs. Mary Morrisey.

The Society's picnic will be held at the home of Marian Maulfair, rain or shine, beginning at 7 p.m. Everyone is to bring one hot and one cold dish.

Each member was given a crystal water pitcher. The group presented Mrs. Sechrist with a basket planter.

Slides of activities and programs which Society 7 had participated in were shown by Mrs. Gordon Zinn.

The next meeting of the group will be held on July 12, beginning at 6:30 p.m. at the Starview Sportman Club.

York Co. Society 7

The 30th anniversary of York County Farm Women Society was celebrated recently at the Embers Restaurant. Mrs. Harold Sechrist, York County president, was guest of honor for the event.

Mrs. Robert Emswiler, president of the group, was in charge of the meeting.

Dinner was served to 17 members and one guest.

Chicken fine

WASHINGTON, D.C. – The U.S. District Court for northern Ohio, in Cleveland, fined White Cottage Food Center, Inc., Canton, Ohio, $2,000 on May 23 for advertising ungraded chicken as U.S. Grade A.

York Co. Society 26

The June meeting of York County Farm Women Society 26 was held at the home of Mrs. Anna Mansberger, Etters R3. The evening meeting was chaired by President Ruth N. Hake.

The group has planned activities to help support a youth group. This is one of the Society's projects for this year.

The group will serve an evening meal to 50 young people of the Holstein Association at a park along the Yellow Breeches Creek in Cumberland County. This will take place on July 10, beginning at 6 p.m.

A donation will be sent to the county bake sale.

On August 26, the group will take a bus trip to visit the Cloisters and other places of interest in the Pa. Dutch areas of Lancaster County. The tour will leave the Paddletown Church, near Newberrytown, at 8 a.m.

Members are planning to attend the York County Farm Women picnic to be held July 26 at the 4-H Center, Bair.

Society 26 will be entertained by the Paradise Farm Women Society 23 on August 14, beginning at 7:30 p.m., at the Paradise Lutheran Church Fellowship Hall.

The group's program was a flower decorating demonstration given by Mrs Cathy Horst. Arrangements, center pieces, corsages, and nosegays were made and given as prizes.

The next meeting will be held at the home of Mrs Carolyn Bailey, York Haven R2, on July 11, beginning at 7:30 p.m. Plans will be made for the Society's picnic to be held in August.

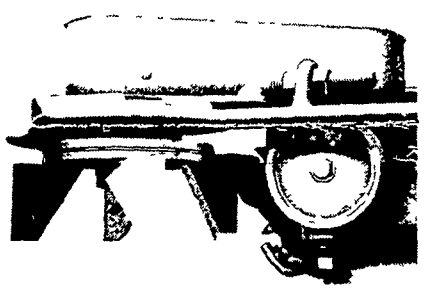
PATZ Silo Unloaders give you two big, lugged drive wheels for sure traction and flotation. Silage is removed evenly with the Patz exclusive self-leveling device. Preset depth control adjustment; "no-load" starting with the PATZ throw-out clutch; and easy lifting, high into the top of the silo for refilling; are additional features of this durable performer. Call us for design matched systems, installation and service of quality PATZ equipment.

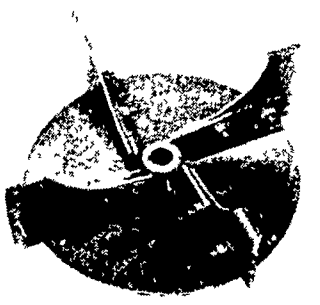
...but DON'T STOP with the UNLOADER

The big capacity of the PATZ Silo Unloader can be design matched to a choice of Material Movers, Conveyors, Conveyor-Feeders or In-bunk Feeders to completely automate your feed handling chores.

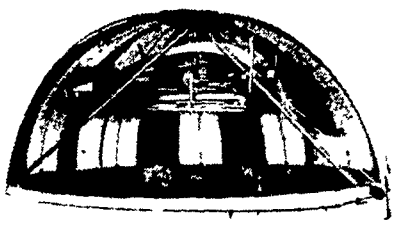
Claw-Like, Hardened Steel Gathering Chain
Steel claws and rakers cut and pull apart the hardest packed or frozen silage.



Spring Tensioned Frost Cutter
Four hardened steel, self sharpening blades shear away frozen silage.



Adjustable Impeller Blades
Four impeller blades adjust for close tolerance and efficient silage throwing.



Tripod Raised For Easy Filling
PATZ Unloader prepares easily for raising high into silo top.

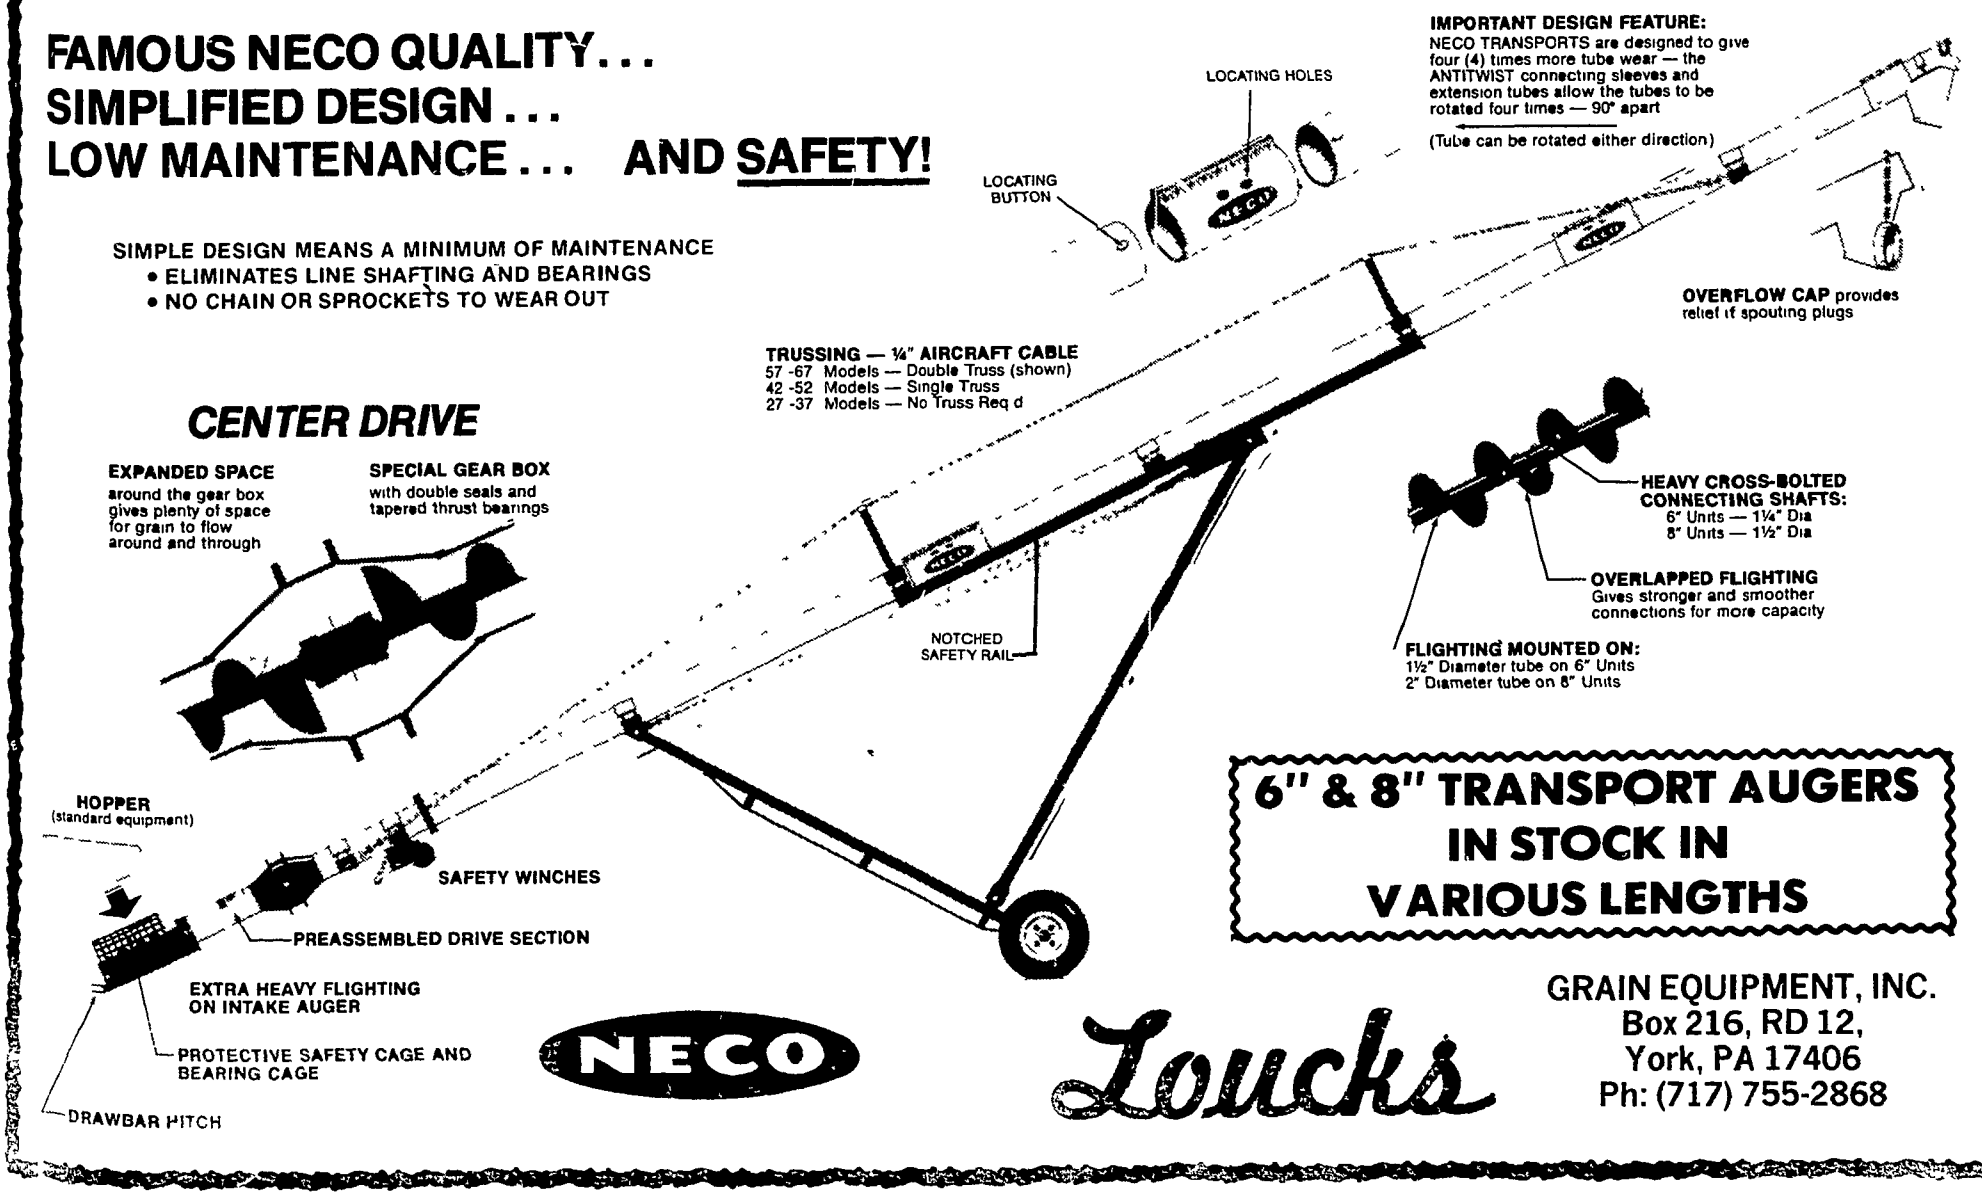
FAMOUS NECO QUALITY...
SIMPLIFIED DESIGN...
LOW MAINTENANCE... AND SAFETY!

SIMPLE DESIGN MEANS A MINIMUM OF MAINTENANCE
- ELIMINATES LINE SHAFTING AND BEARINGS
- NO CHAIN OR SPROCKETS TO WEAR OUT



IMPORTANT DESIGN FEATURE:
NECO TRANSPORTS are designed to give four (4) times more tube wear — the ANTITWIST connecting sleeves and extension tubes allow the tubes to be rotated four times — 90° apart
(Tube can be rotated either direction)
LOCATING HOLES
LOCATING BUTTON
OVERFLOW CAP provides relief if spouting plugs
TRUSSING — ¼" AIRCRAFT CABLE
57 -67 Models — Double Truss (shown)
42 -52 Models — Single Truss
27 -37 Models — No Truss Req'd
CENTER DRIVE
EXPANDED SPACE around the gear box gives plenty of space for grain to flow around and through
SPECIAL GEAR BOX with double seals and tapered thrust bearings
HEAVY CROSS-BOLTED CONNECTING SHAFTS:
6" Units — 1¼" Dia
8" Units — 1½" Dia
OVERLAPPED FLIGHTING
Gives stronger and smoother connections for more capacity
FLIGHTING MOUNTED ON:
1½" Diameter tube on 6" Units
2" Diameter tube on 8" Units
NOTCHED SAFETY RAIL
HOPPER (standard equipment)
SAFETY WINCHES
PREASSEMBLED DRIVE SECTION
EXTRA HEAVY FLIGHTING ON INTAKE AUGER
PROTECTIVE SAFETY CAGE AND BEARING CAGE
DRAWBAR PITCH

Saturday, July 1

Lancaster Co. Society 6 meeting, 2 p.m.; hostess Anna Geyer.

Plant lovers' corner

Move, divide iris in early Summer

UNIVERSITY PARK – Late June and early July is the time to move and divide iris. Clumps need dividing about every three or four years or they will become overgown and unproductive, advises James J. McKeehen, Delaware County Extension agricultural agent. Trim off the leaves to about one-third their height. Lift the clump, wash off excess soil, and cut the original clump into several smaller ones. Each should have at least one fan of leaves. Divisions having several fans of leaves will usually bloom the following year.

Iris grows bets in full sunlight. The Japanese and Siberian irises will tolerate shade and can be grown in moist soil. Plant the rhizome, or fleshy stem parallel with the soil surface. In heavy soil the top of the rhizome should be slightly above the ground. In light soil it may be an inch or two below the surface. Established iris that are growing well do not need fertilizer. Weaker clumps may be fed a 5-10-5 or 5-10-10 fertilizer at one-half cup for six small plants. Scratch this lightly into the soil around the iris and then water thoroughly.

June is the month of roses and a good time to decide what types and varieties you may wish to plant in your garden. Almost all types will flower the first few weeks in June. Hybrid tea and floribunda roses are bush types available in many varieties and colors. Hybrid tea roses bloom heavily in June and again in September, while floribunda roses flower throughout the Summer. A combination provides blooms for cutting and for color in the garden. Most climbers flower only in June, but several good everblooming climbers will produce flowers throughout the Summer.

Some species of roses are useful in landscape work. The Memorial rose, Rosa wichureiana, is useful as a sprawling ground cover for banks. The Rugosa rose, Rosa rugosa, withstands seashore conditions well, flowers all Summer with single blooms, and has colorful orange seed pods, or "hips", in late Summer. Roses grown in containers of soil may be planted at any time. Roses ordered "bare foot" will be shipped either in late Autumn or early Spring. Among rose gardens open to the public are those at the New York Botanical Garden, Brooklyn Botanic Garden, Sterling Forest Gardens, Longwood Gardens, Hershey Rose Gardens, Scott Horticultural Foundation at Swarthmore College, Morris Arboretum of the University of Pennsylvania and some in city and county parks. Plan to visit at least one soon with a camera and notebook to record your favorites.

Poultry projects started for Montgomery County 4-H'ers

NORRISTOWN – The Summer 4-H broiler and roaster project in the Harleysville area is open to all boys and girls ages eight to 19, and will enable youngsters to learn about poultry management and production.

Dave Morrison, a Montgomery County attorney and 4-H leader will head the project. Meetings will be held Saturday mornings at the Heckler Plains, a restored historical farm in the Harleysville area. The broiler project will last until July 30, and the roaster/capon project will run up until the Labor Day weekend.

The birds will be housed at Heckler Plains and the participants will take designated days to feed, water and care for the birds.

The project cost of $10.00 per participant will cover brooder equipment, coop construction, materials and feed. Many important aspects of poultry management will be discussed such as bird handling, genetics, nutrition, disease control and economics.

Other activites that this project will include are a visit to a poultry farm and a hatchery, an all day workshop where the youths will learn how to grade eggs, judge live and dressed birds, determine good layers, and caponize cockerels.

This project will stress business management to high school participants, and hopefully encourage youths to continue their work with poultry. At the end of the project, each participant will dress two birds to take home. Ribbons and certificates will also be awarded.

Although the first meeting has passed, it is not too late to join. Anyone interested in raising chickens should contact Dave Morrison at his office at 215-569-4530, or call Nancy Kadwill at the 4-H Office in Norristown 215-277-0574.

Senate nutrition committee claims diet linked to cancer

WASHINGTON, D.C. – In his opening statement at the oversight hearings on diet and cancer, Senate Subcommittee on Nutrition Chairman George McGovern (D-S.C.) stated that research findings pointed to a significant percentage of malignant cancers that are diet-related. He found it astonishing that even though a majority of cancers are preventable there is evidence indicating that one-half of all cancers may be diet-related, the cancer research establishment continues to seek a cure. Reluctance of the research establishment to pursue diet-cancer relationships raises serious questions about our research priorities. We have a right to demand accountability from our research scientists, stated McGovern.

Director of the National Cancer Program (NIH) testified that there is an increased interest in the diet-cancer relationship. Factors that have been implicated include obesity and high dietary levels of fat. A plausible theory about the fat-cancer relationship suggests that an excessive fat intake modifies the metabolism of cholesterol, bile acids, and neutral steroids in the intestine. Other witnesses supported the diet-cancer theory and the relationship of dietary fat and cancer risk. Dr. George Blackburn, director of Nutrition Support Service of the Cancer Research Institute, agreed and stated that "the public wants better knowlege as to the proper role of diet and nutrition ... They are confused and occasionally misled by specific announcements of research finding and fraudulent advertising." Funding of nutrition related research would go toward meeting the public's need and desire for dietary guidance.

Ida's Notebook

Ida Risser

Recently, I had the opportunity to visit for the second time "The Heritage Center" on the square in Lancaster. It is housed in the Old City Hall and the adjoining Masonic Lodge Building. Both were built in the mid-1790's.

If you are interested in artifacts, you'll surely find something appealing displayed there. There are clocks and furniture, fine paintings, antique quilts and coverlets, printed works from the Ephrata Cloister Press, long rifles and Conestoga Wagon fixtures. Also, country crafts like baskets, homemade toys, fraktur, butter prints, decorated woodenware and weather vanes are displayed there.

What makes this large display even more interesting is finding something with which you can identify, such as a piece similar to one in your own home. The exhibits are well-explained and they show us a way of life that seemingly is gone forever.

xxxxx

Sometimes I feel like a piece of toast that came out of a malfunctioning toaster. What I mean is that my skin is white on my front side and brown on my back side. It just naturally acquires that coloring from bending over the berry patch and the pea fences.

I'm reminded of the large sun bonnets with ruffles which my grandmothers and other older relatives always wore in the yard and garden. Apparently, it was definitely taboo to have freckles or a tan skin. Even long sleeves were worn in the hot Summer.

Ideas in this area have now swung to the opposite extreme and the bikini allows the body to acquire an almost complete tan. But as long as I must crouch over my work, I guess I'll be satisfied to look as though I've burned to a crisp only on one side.

Antique show set

LITITZ – An antique show will open to the public on July 3 and 4, when the Lititz Historical Foundation holds its 17th annual Antiques Show and Sale. The displays will be housed in the Bobst Recreation Center in Lititz Springs Park, seven miles north of Lancaster on Route 501.

More than 30 leading dealers will offer authentic antiques in glass, china, silver, brass, jewelry, quilts, coverlets, dolls, primitives, antique tools, early postcards and furniture.

My Thoughts ...

And welcome to them

By JOANNE SPAHR
Assistant Editor

Two months ago I moved from the farm into an apartment of my own in town And, suddenly, a whole new world of responsibility-lessness opened up to me.

For instance, no longer do I have to worry about mowing a giant lawn for hours on end. (The landlord does it for me. Ha.)

And, no longer do I have to burn the trash. (I let that up to the garbage man Ha-Ha)

And, no longer do I have to pull tobacco plants (I'm never on the farm in the morning to help Ha-Ha-Hee.)

And, no longer do I have to help **plant** tobacco plants. (I'm never on the farm in the **afternoon** to help.Ha-Ha-Ho-Ho.)

And, no longer do I have to help put in the tobacco crop. (I'll never be at the farm at all to help Ha-Ha-Ha-Hee-Hee-Hee.)

And, no longer will I be called on to assist a first calf heifer with a difficult birth. (Yeah)

And, no longer will I have to run to the barn to feed the dogs and cats. (I'm not allowed to have pets)

And, no longer will I have to help weed the garden (I don't have a garden.)

And, no longer will I have any responsibilities at all Ha-Ha-Ho-Ho-Hee-Hee.. Ho...H...

. . You know, I don't like this arrangement a bit

Farm co-op integrity upheld

PARK RIDGE, Ill. – A recent U.S. Supreme Court decision extending protection of the rights of farmer cooperatives was praised here last week by American Farm Bureau President Allan Grant.

Grant cited a decision of June 12, in which the high court found that the National Broiler Marketing Association (NBMA) could not qualify as a bona fide farmer cooperative exempt from anti-trust proceedings under protections granted by the Capper-Volstead Act.

"Without intent to judge or harm the broiler association in any way," Grant said, "we are relieved that the Court recognized the integrity of farmer-owned cooperatives that have served our agriculture so well during this century."

The Court decision, which upholds an earlier ruling by a U.S. Court of Appeals, found that because some NBMA members owned no breeder flocks or hatcheries, and maintained no "grow-out" facilities for raising chicks, the association "is not among those Congress intended to protect by the Capper-Volstead Act."

The Court's majority decision made direct reference to a friend of the court brief filed by the American Farm Bureau Federation that an exemption extended to integrators who process broilers could enable them to dictate terms to growers who contract with them to raise broilers.

Only Once

"I eat out occasionally but I never go to the same restaurant twice," the frugal executive observed His friend quickly completed the secenario by adding, "I don't ever leave a tip either"

Stop losing interest,
Farmers First now pays you more interest than ever before.

That's right. More interest for a shorter term.

Our new six month certificate of deposit pays an interest rate at date of issue equal to the U S Treasury Bill 6 month rate then in effect. Farmers First takes this highest rate available and compounds the interest daily to give you the **maximum yield for your deposit.** This rate will vary weekly, so call your local Farmers First office to see how much you will receive. $10,000 minimum deposit required

And even more interest for a longer term.

If you have more time, we'll give you more interest $1,000 minimum deposit required.

Term	Rate		Effective Annual Yield
1 year	6.00%	Plus daily compounding equals	6.272%
3 years	6.50%		6.812%
4 years	7.25%		7.627%
6 years	7.50%		7.900%
8 years	7.75%		8.173%

Benefits to you.

- Daily compounding on highest rates permitted by law.
- No purchase fee.
- Automatically Renewable at maturity
- Interest paid to you by check, deposit to any Farmers First account, or added to your renewed certificate.
- Deposits up to $40,000 insured by Federal Deposit Insurance Corporation

Farm Bureau urges changes in Endangered Species Act

PARK RIDGE, Ill. – Farm Bureau says a Supreme Court decision favoring a tiny fish over a multi-million dollar dam adds urgency to the need for Congress to immediately amend the Endangered Species Act of 1973.

Allan Grant, president of the American Farm Bureau Federation, refers to the court's decision that the nearly completed $116-million Tellico Dam in Tennessee cannot be finished because it might jeopardize an estimated 15,000 Snail Darters, a species of perch on the endangered species list.

"It is up to Congress to inject some sanity into the Endangered Species Act to avoid conflict between endangered species and human needs such as energy and food production," Grant says.

He adds that there is no justification for wasting the some $100-million of taxpayers' money already spent on Tellico Dam to save a relatively few Snail Darters, one of some 130 species of darters.

Grant says voting delegates at the latest AFBF convention placed a high priority on getting Congress to amend the Endangered Species Act.

In another court action, a U.S. District Court in Washington, D.C. granted Farm Bureau's motion to intervene on the side of the Environmental Protection Agency in a lawsuit filed by the Environmental Defense Fund.

The suit seeks to stop an EPA order granting permission for the state of Mississippi's limited use of ferriamicide, a chemical compound used to combat imported fire ants.

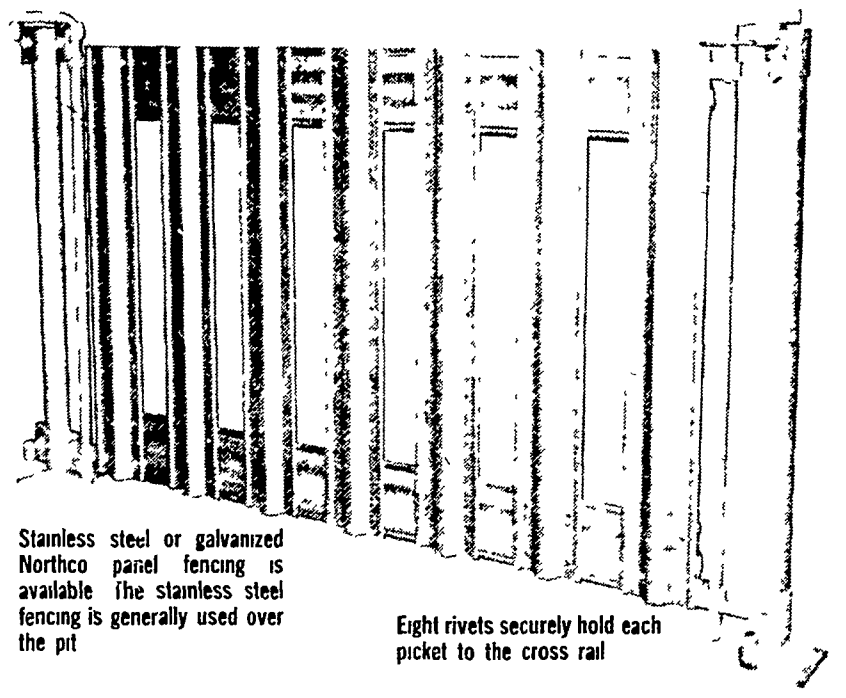
NORTHCO
FARM AUTOMATION SYSTEMS

HOG FENCING BUILT TO LAST AND LAST!
NORTHCO PANEL FENCING

NORTHCO PANEL FENCING is available in stainless steel or galvanized. Stainless Steel panels are generally used over the pit.

Panels are designed with a positive locking system and can easily be opened with Northco's gate closure rod.



Stainless steel or galvanized Northco panel fencing is available The stainless steel fencing is generally used over the pit

Eight rivets securely hold each picket to the cross rail

HOG PANEL FENCING
MADE FOR CONFINEMENT

- Northco Hog Panel Fencing is built specifically for hog confinement by the experts in the field. That's why Northco Panel Fencing has advantages like these·
- UPRIGHT PICKETS—Hogs can't climb the upright pickets and the "open" design of Northco Panel Fencing aids the ventilation system
- EVERY SECTION SWINGS—The closure rod can be quickly removed so every fencing section in the building will act as a gate
- EASY TO INSTALL—Hinges allow for some length adjustment to simplify installation Also Northco Panel Fencing can be ordered in sizes to fit almost any hog building including both total confinement and open front systems

The Northco Hog Experts have designed SUCCESSFUL hog confinement systems since 1963. This experience is part of the reason Northco is considered the leader in hog confinement.

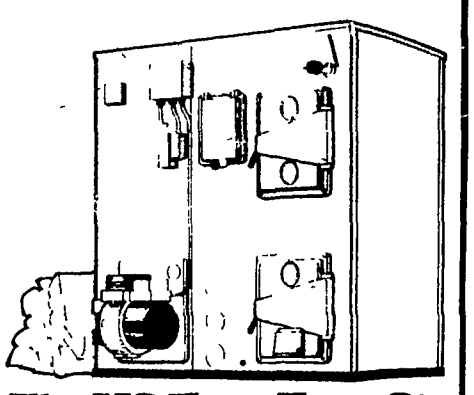
Two ways to reduce fuel costs.

The **HS Tarm Type OT** is a modern, efficient multi-fuel boiler for central hot water heating systems It's a unit which allows you to use low cost wood in addition to electricity and oil or gas as your source of heat When fueled with wood, it warms your home and provides plenty of hot tap water as well Should the wood fire go untended, automatic controls will switch to another fuel, and the boiler will continue to supply all your heating and hot water needs

The **Tasso A-3** is a cast iron wood-burning boiler made to work in combination with existing oil or gas-fired hot water heating systems to give you multi-fuel economy Used with your present boiler, it allows you to heat your whole house with wood all the time, or merely supplement your present fuel by burning wood Like the HS boiler, the Tasso A-3 offers convenient operation If the wood fire dies out, your oil or gas burner will take over automatically



The HS-Tarm Type OT

Either the HS Tarm Type OT or the Tasso A 3 will give you reliable service while helping to protect you from fuel shortages and the high cost of commercial fuels Choose the boiler that's right for you!

WANTED:
tractor dealers to make and sell profit!

Case Franchises Available In The Reading & Everett, Pa. Areas

When you're selling farm machinery, your customers rightfully demand products that will turn them a profit And being a businessman, you in turn expect a profit from your services

You both profit with a Case tractor franchise As a Tractor Specialist, you will sell 14 sizes of farm tractors and a line of heavy duty tillage tools Period You needn't scatter your selling power over the full range of farm machinery Your service shop is expert on one commodity farm power Your parts inventory is cleaner and more financially manageable Your used equipment lot consists largely of faster moving used tractors

Light construction power too if the Case utility tractor franchise is available in your territory Call or write us We'll be glad to outline the full potential of a Case franchise in your area

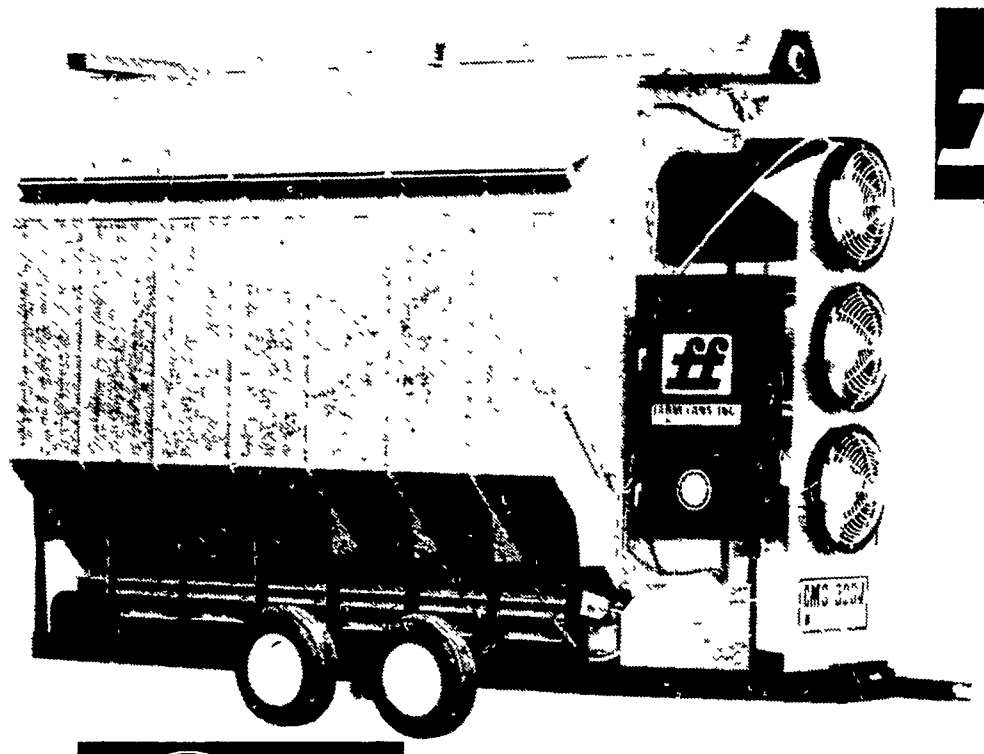
THE SYSTEM

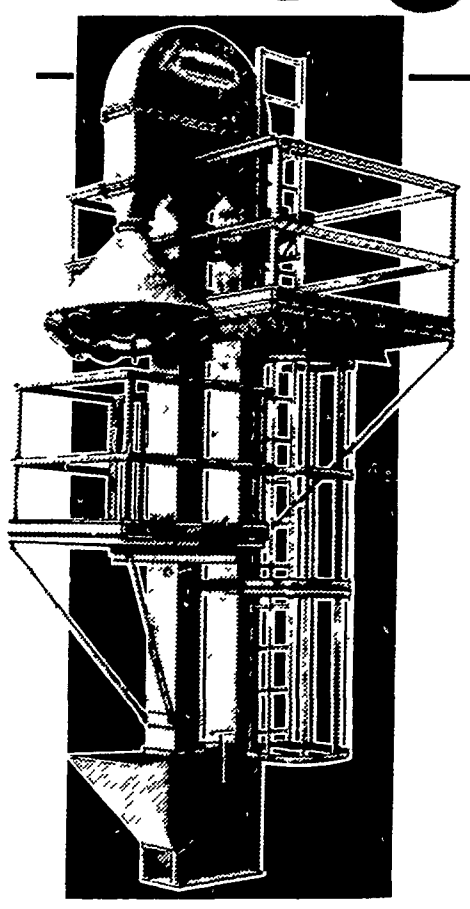
THE MOST VERSATILE GRAIN DRYING, CONVEYING & STORAGE



THE ALL NEW J-SERIES

THE ENERGY SAVER

- Two models - CMS-320J, CMS-420J
- Choice of Continuous Multi-Stage or Continuous Flow drying.
- Exclusive Automatic System Control is weather-proof and tamperproof.
- "Temper Dries" automatically for premium quality grain.
- The J Series is specially designed to meet today's need to save energy.
- Big capacity drying for high volume grain operations
- Backed by almost 30 years experience in grain conditioning.



THE GRAIN MOVERS

BUCKET ELEVATORS

MODEL 7000

High-volume agricultural and commercial grain and feed distribution of up to 7000 bushels per hour.

This largest, latest addition to the Cardinal Bucket Elevator line is engineered to perform the long-term, maintenance-free job you've come to expect from Cardinal equipment.

MODEL 3000

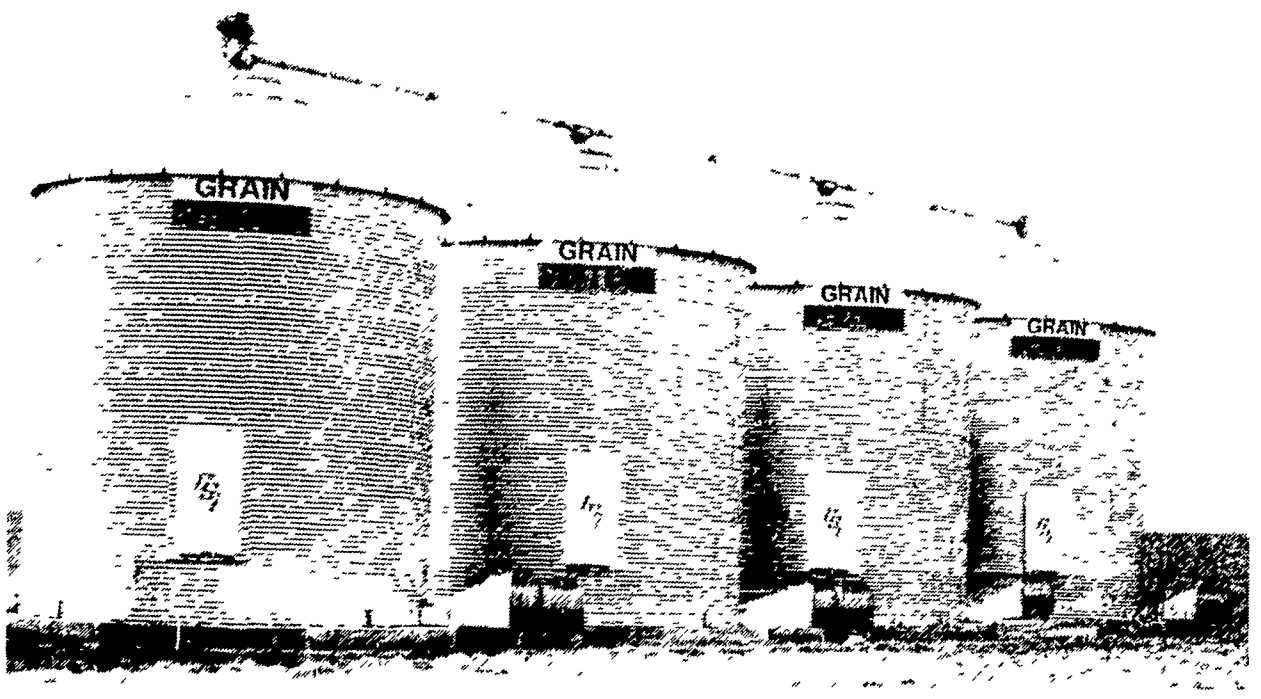
Agricultural and commercial grain and feed distribution of up to 3000 bushels per hour.

The Model 3000 Cardinal Bucket Elevator is engineered and manufactured to provide long, heavy-duty service at even full capacity . . . lower cost per bushel.

MODEL 1500

Agricultural grain and feed distribution of up to 1500 bushels per hour.

The Model 1500 Cardinal Bucket Elevator is designed and built for efficient agricultural distribution applications, from small capacity to 1500 bushels per hour.



A GSI ON-FARM STORAGE SYSTEM.

FEATURING

- All galvanized steel with G-90 galvanized coating, including galvanized doors.
- Our steel is A446 Quality or a minimum yield of 40,000 pounds per square inch.
- Walk around steps on top of roof
- Equipped with safety rings
- No welding anywhere on roof, prevents rust.
- Slotted holes to raise & lower roof for air movement for drying.

GSI has the system to meet your demands An on farm storage system that lets you harvest when you're ready and sell when the price is right From one bin to an entire system, GSI bins are priced right!

GSI manufactures farm bins up to 60 ft diameters with capacities to 157,000 bushels Sturdy construction for maximum grain protection, with important safety features Easy field assembly

To complete the system, GSI offers an entire drying package and a full line of grain handling equipment to match your needs GSI on-farm storage system the profitable solution

FULL LINE PARTS DEPARTMENT

There's more to gain with "precision feeding" of baby pigs.

Faster gains on less feed can be as easy as 1-2-3 with our "Precision Baby Pig Starter Program" from Master Mix Research.

Primer 1 supplements sow's milk with high energy levels for improved gains and more efficient feed conversion. Reduces scours, too.

Primer 2 from weaning to 40 lbs. body weight, contains high energy levels and amino acids the baby pig can quickly utilize for fast extra gains.

Pig-Gro 3 is formulated for all pigs up to 60 lbs. Based on an amino-acid-to-high-energy concept that maximizes quick gains with minimum feed costs.

Come in. Let us show you why there's more to gain with Precision Baby Pig Starter feeds.

Lancaster County DHIA Monthly Report

May 1978

A registered Holstein cow owned by Paul H. Martin, Ephrata R1, completed the highest 305 day lactation. Jean produced 24,149 pounds of milk, 1011 pounds of butterfat with a 4.2 per cent test. Second high lactation was completed by a registered Holstein cow owned by Curtis E. Akers, Quarryville R1. Polly produced 26,950 pounds of milk, 962 pounds of butterfat with a 3.6 per cent test in 305 days.

The herd of Ephraim D. Riehl Jr., East Eby Road, Leola R1, had the highest daily butterfat average. This herd of 24.8 registered and grade Holstein cows averaged 58.2 pounds of milk, 2.29 pounds of butterfat with a 3.9 per cent test. The herd of Vernon R. Umble & Son, Christiana R1, placed second. This herd of 64.8 registered and grade Holstein cows averaged 54.1 pounds of milk, 2.23 pounds of butterfat with a 4.1 per cent test.

FIRST 305 DAYS OF LACTATION WITH 630 OR MORE LBS. OF BUTTERFAT.

Grant heads trade mission

WASHINGTON, D.C. – A special trade mission of 15 Farm Bureau executives left here Thursday for a full week of negotiations with European trade and agricultural officials.

The mission, headed by Allan Grant, president of the American Farm Bureau Federation, will go first to Geneva.

Purpose of the mission is to assess what progress has been made to-date in the multilateral negotiations and to urge that final agreements provide for expanded mutually advantages agricultural trade.

4-H'ers named to scholarship

Kathy Hall, of Littlestown R2, was named state winner of a Danforth 4-H Scholarship to attend Camp Miniwanca, the American Youth Foundation Leadership Training Camp, at Shelby, Michigan, July 24 to August 5.

At Camp Miniwanca, Kathy will participate in a curriculum comprising courses in personal foundations, leadership principles and practice, and Christian ideals. A comprehensive program of group, social, and recreational activities has been planned.

As part of the program, a system of personal measurement based on discovered needs is an important phase of the training program.

The 1978 season will mark the 65th year of camp operation.

Camp Miniwanca is sponsored by the American Youth Foundation, a part of the educational department of the Ralston Purina Comapny.

Another outstanding 4-H member has been selected to attend the leadership camp from August 7 to 19. He is Jeff Stull of Waynesboro R2.

Mannings weave web of creativity

By JOYCE BUPP
Staff Correspondent

EAST BERLIN – What is it that drives a person to work for long hours, painstakingly crafting some item that could, for all practical purposes, be purchased for assembly-line prices in any nearby shopping center?

Call this powerful force creativity. Or maybe devotion. Or perhaps even a kind of love.

That's what you'll find at The Mannings. Nestled along the picturesque banks of the Conewago Creek in Adams County, this East Berlin R2 weaving school has won national acclaim and become a "mecca" for artisans who design in thread and cloth.

The school was originally established, in 1950, by Osma Gallagher Tod, recognized as one of the country's best weavers and author of books on the intricate craft.

During the 1950's, Harry and Katharine Manning were school teachers in the Harrisburg area. Selecting weaving as a hobby they both wanted to master, they came to the school for lessons in the craft. When the opportunity to purchase the school came in 1960, the hobby turned overnight into a business for the couple.

With the popularity of the back-to-nature movement about seven years ago, a surge of interest in handcrafts swept across the country. Both the mail-order and the retail store portions of the business were caught in the tide of make-it-yourself, and sales volumes at The Mannings climbed steadily.

Today's well-stocked inventory of craft items include a kaleidoscope of colored yarns and threads, knitting and crocheting supplies, intricate and decorative beads for macrame and jewelry making and, the specialty of the shop, rug yarns.

Students come to The Mannings from all over the United States for an intense week-long course in weaving under two full-time instructors. In a strictly personalized teaching climate, only four students are enrolled each week. For a brief duration of the course, each student becomes practically a member of the Manning family, living near and eating in the spacious farm home. Basic work on a variety of looms and "sampler" pieces are part of the skills that each student works to master during the intensified study.

Interest by customers in learning the basics of a variey of crafts led Harry and Katharine Manning to set up workshops periodically. A recent three-day series, held in early June, offered short courses in spinning, dyeing and basketry. Each class was opened to about ten students, many from the local area but some from distant states who roomed nearby for the sessions. Specialty teachers are tapped from the membership of the Handweavers Guild of America and through word-of-mouth sources.

One annual event that draws national interest to the famous craft school is a "Handweavers National Juried Show," a competition of hand crafted pieces. Included in the impressive entries to the display are wearing apparel, rugs and Indian rugs, coverlets, macrame and completely hand-dyed, spun and woven items Some of the entries are then offered for sale, with prices listed in a catalog printed for the show.

But, probably the most popular event sponsored by The Mannings is their annual Spinning Seminar. This year's seminar, held June 10, drew hundreds of visitors, including some from Canada.

In the informal setting of cool green lawns under tall shade trees, spinners and related craftsmen set up shop and spend the day showing the how-to's of their crafts. Novices wander to the demonstration sites throughout the day, where they can watch and learn from the specialists. Specific events of interest are scheduled throughout the day, and special guest lecturers are invited to speak on spinning techniques and other topics of interest to the weaving enthusiasts.

Several local craftspeople were included in the seminar listing of demonstrators this year. Many of them are active as teachers or demonstrators at area museums and craft classes.

One special interest event featured Richard Coons, Dover High School agriculture teacher, who demonstrated the shearing and grading of sheep fleeces. Coons also displayed a variety of sheep breeds, so that the subtle differences in the grades and types of fleeces could be observed by visitors.

Phyllis Robinson, of Harrisburg Pike in Lancaster, specializes in spinning angora rabbit hair. Accompanying her to the display was one of her soft, long-haired rabbits, fascinating both the adults and children who stopped to watch her spin.

"The angora fur is a luxury I spin into small items just for myself," she said. "It's a fiber that lasts almost forever."

Most of Phyllis's spinning is done with wool, dog hair or other natural fibers. She works on a castle spinning wheel, a smaller portable spinning machine, which she built in a woodworking class at Millersville College. Beautifully crafted and finished, the wheel is made from cherry wood and took about a year to complete as a spare time project.

Associated with Country Crafts of Witmer, Pa., Phyllis has demonstrated spinning at the William Penn Museum in Harrisburg and has had her work accepted for show by the Pennsylvania Women in the Arts.

Flax "scutching" and spinning was the fascinating craft shown by Neeltje Hain of Strasburg. A former teacher of industrial textiles and crafts, Neeltje has solved the difficult task of finding sources of flax for her craft. She grows her own raw material at her Lancaster County home.

"When the flax pods begin to ripen, the stems are harvested by pulling the entire stalk from the ground, not by cutting. For spinning, you want just as much length as possible to that fiber," she explained.

Next the stems are laid in water for five to ten days, a process which softens the outside stem, or straw, coating and begins to expose the desirable fibers inside. After the soaking period, the stems are pounded with a flax brake to loosen and tear away the strawy outside.

Scutching is the next step, using a wooden paddle-like tool that knocks the remaining straw bits from the flax fibers and fluffs them out. Then, handfuls of the flax are pulled across various sized metal combs with long, sharp teeth, as a final preparation of straightening before the spinning process.

"The last frolic of the farm season was the annual

Patricia Ann Greek, center, will reign as princess of the York County dairy industry. Serving in her court will be first alternate Ann Miller and second alternate Mary Lou Parks.

Patty Greek new York County dairy princess

By JOYCE BUPP
Staff Correspondent

BAIR – Sixteen-year-old Patricia Ann Greek will be performing double duty chores this Summer at upcoming York area cattle shows. Not only will she be at the halter of her registered Holsteins, she'll also be handing out ribbons and congratulating winners as York County's dairy princess.

Patty was awarded her crown last Saturday evening before a crowd of 300 dairy farm and industry representatives during candlelit pageant ceremonies at the county 4-H Center.

A junior at Red Lion Area Senior High School, Patty is the daughter of Mr. and Mrs. William Greek, Delta R2. The owner of four dairy heifers and cows, she helps her brother with his herd of milking registered Holsteins.

Active in agriculture and community organizations, Patty is a member of the York Junior Holstein Club, 4-H dairy judging team and several project clubs, Youth Fellowship and community recreation council.

She is also active in the Red Lion Chapter of the Future Farmers of America and eyes a career in the secretarial area of the dairy industry.

Patty's first official appearance will be this weekend when she will help to promote dairy products at the Hanover Mall display sponsored by the Central 4-H Dairy Club.

"I'm especially interested in speaking with grade school youngsters," says the pretty, dark-haired young lady. "It's important that we teach children good nutrition while they're young; then they'll remember it all their life." To carry out that goal, the new princess expects to be visiting elementary school classrooms with a cow and calf during next year's term.

Ann Miller, 17-year-old daughter of Mr. and Mrs. Ray Miller, Seven Valleys R1, was chosen the first alternate princess.

Recently graduated from Spring Grove Area Senior High School, Ann plans to pursue a career in veterinary science and has been accepted for Fall studies at the York Campus of Penn State University.

During high school, she served as president of the school student council, was a member of the National Honor Society, and handled the statistician duties for the wrestling and track teams.

Ann owns a registered Holstein cow and calf and takes part in a variety of 4-H dairy and other project clubs. She is an active youth worker at the Codorus Church of the Brethren.

Second alternate princess is Mary Lou Parks, a junior at Kennard-Dale High School. Her parents are Mr. and Mrs. Roy Parks, Jr., Stewartstown R2, and the family milks a herd of 90 Holsteins.

Mary, age 16, is majoring in the business field at high school and hopes to begin a business career following graduation.

Her activities include the high school orchestra and chorus, and she is a member of the Citizens Band Radio Club

Other contestants in the pageant were Barbara Ann Snyder, daughter of Mr. and Mrs Charles Snyder, Felton R1; Cathy Sue Taylor, daughter of Eugene Taylor, Manchester R2; and Terri Warner, daughter of Mr. and Mrs. William Warner, Felton R2.

Outgoing princess, Susan Adams of Delta R2, was escorted for her final appearance by her father John Adams. In a touching farewell speech, Susan thanked the county dairy farmers for the opportunity to serve them during her year-long reign.

Escorts for the ceremonies were James Knight, Airville R2; Kevin Laughman, Thomasville R1; Jonathan Miller, Seven Valleys R1; Jonathan Myers, Thomasville; Tim Rutter, York; and Joey Welsh, East Berlin R1.

Chairman of the county dairy princess committee is Kathy Lehman, who is assisted by Darlene Godfrey. June Boyer is treasurer.

Chairing committees for the annual pageant were: Rolla Lehman II, financial; Ralph and Ada McGregor, judging; Barbara Mummert, decorations and flowers; Sandy Adams, gifts and door prizes; Karen Laughman and Marge Rutter, pageant; and Larry Amspacher, refreshments.

Judges for the event were Sally Bair, Staff writer for **Lancaster Farming**; Jesse Smith, dairy research specialist with Agway; and Marvin Hissong, Franklin County dairyman. Scott Smith, radio announcer for Shippensburg College football, served as the master of ceremonies.

Solar grain drying tested

WASHINGTON, D.C. – "Costs of efficient solar collectors come reasonably close to some propane gas-powered systems now used" is one of the conclusions reported in a recent USDA research report.

The report analyzes eight experimental solar drying systems developed in the Midwest and being tested by the Science and Education Administration in Kansas and at agricultural experiment stations in South Dakota, Iowa, Ohio and Colorado.

It suggests that some grain producers may want to consider replacing wornout systems or increasing current drying capacity with supplemental solar drying equipment as fossil fuels grow more expensive and scarce.

The systems tested include: 1) rock heat-storage, 2) flat-plate, 3) inflated tube, 4) suspended plate, 5) wraparound, 6) intensifier, 7) air supported, and 8) multiuse types. The design, measure of performance, capital investment and fixed and variable costs are presented for each system. The design and performance of each collector are included to provide technical information to the reader.

The title of the report is "The Performance and Economic Feasibility of Solar Grain Drying Systems", USDA Agricultural Economic Report No. 396 by Walter G. Heid, Jr., USDA, Washington, D.C. 20250, February 1978.

BIG CAPACITY, LONG REACH, HIGH PERFORMANCE!

NEW IDEA 177 FLIGHT ELEVATOR

Whatever you want to elevate, the Avco New Idea Flight Elevator can handle it. ear corn, shelled corn, baled hay, beans, small grain or ensilage. It's available in the length you need from 31 to 51 feet. Both the regular and long trucks feature a 96 inch wide tread for extra stability. All sections are made of galvanized steel with steel angles at overlapping joints for extra strength. Choose from PTO, gas or electric motor drive. It's the flight elevator designed for big capacity

NEW IDEA FARM WAGONS GET THE JOB DONE!

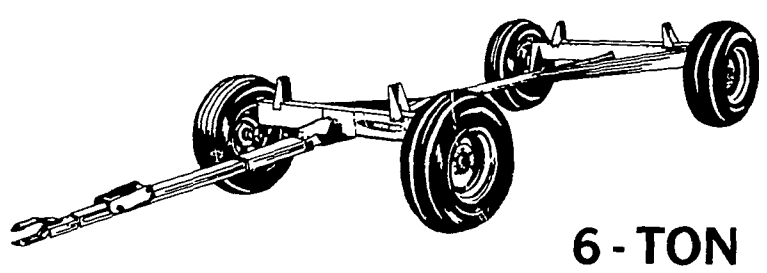
THREE TOUGH WAGONS TO FIT YOUR NEEDS.

Now you can choose from three different-capacity farm wagons to suit your needs from hauling grain to forage boxes.

MAXIMUM STABILITY . . . You get a balanced load across all kinds of terrain with extra-wide tread widths, from 70 to 75 inches.

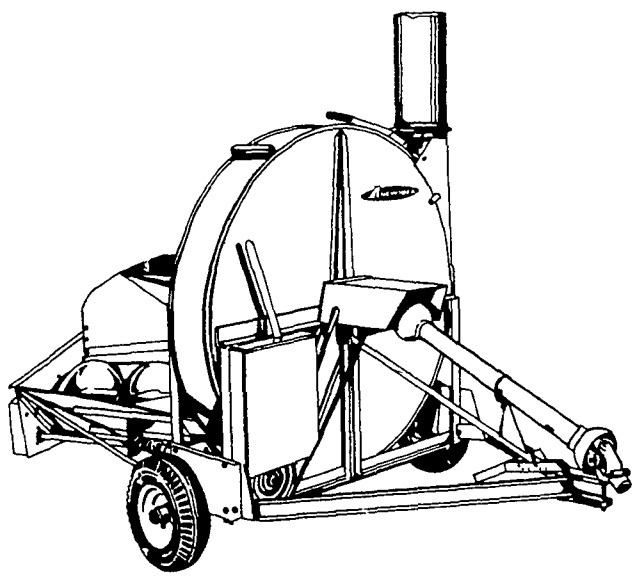
MAXIMUM MANEUVERABILITY . . . The short turning radius and automotive-type steering of these wagons lets you pull them through tight spots with ease.

MAXIMUM SPEED . . . Large, sturdy, heavy-duty spindles with tapered roller wheel bearings provide a rugged foundation for all of your hauling needs.



6 - TON
8 - TON
10 - TON

THERE'S A GOOD IDEA BEHIND EVERY NEW IDEA.



Here's a rugged new high capacity Forage Blower that's easy to set up, easy to position and easy to transport It can blow 100 tons of silage or 70 tons of haylage, to the top of your highest silo in just an hour

You'll like the ease of attaching this Forage Blower to your tractor drawbar It's so well balanced that it can be hitched up in seconds

The hopper is angled into the fan to assure a smooth and constant infeed of material Six fan blades, 54 inches in diameter, whisk the material upward at a speed exceeding 125 feet a second

A flow control device encloses the center of the fan to virtually eliminate material carryover. Adjusting fan blade tip clearance is quick and convenient

Rugged, top quality construction throughout this Forage Blower is your assurance of long, trouble-free service Operating efficiency is built right in. Sealed bearings are used for minimum maintenance. And other features are designed with you in mind

Take the adjustable A-frame hitch. It makes it quick, easy and safe to level the feed hopper, regardless of drawbar height, even on an uneven surface

Also, it's simple to match the hopper height to the forage box or other hauling unit. Two wheel settings give you a choice of heights, or you can remove the wheels for the lowest hopper level The hopper's low profile lets you drive in close with nearly any make of unloading box

PEIA board to increase in number

ARLINGTON, VA. – The Board of Directors of the Poultry and Egg Institute of America has approved an amendment to the by-laws which would increase the number of Directors from 17 to 28.

The decision to increase the number of Directors serving on the PEIA Board came following a meeting of the Directors in Kansas City.

In making the announcement, PEIA Board Chairman Kenneth Longacre stated that "the Board decided it was necessary to increase the input of industrymen in the policy decisions of the Institute. At the same time, the present Board felt that the increase in the number of directors would still enable us to function efficiently."

Under the new structure, four Directors each would be elected by the Broiler, Turkey and Shell Egg Sections. Two Directors would be elected by each of the following sections: Egg Products, Further Processing, Other Poultry and the Council of States. Eight Directors-At-Large would be elected by the Board of Directors.

Each Director is to be elected for a two-year term, with one-half of the Board up for election annually.

The new amendment becomes effective at the Institute's annual meeting, Fact Finding, in September.

Conservation bills move

HARRISBURG – Senate Bills 733 and 744 dealing with storm water and flood plain management have come out of the House Conservation Committee and have passed to the Rules Committee.

The bills may be up for vote before the House in the Summer sesion.

Insect control takes management and knowledge

NEWARK, Del. – Home-grown vegetables are a great source of pleasure. They can also help reduce one's food bill, if a person plans and manages his plot carefully. But this takes some doing – especially when it comes to garden pests.

To raise vegetables today without having them attacked by a broad range of insects is almost impossible. So if one has a garden this Summer, you've going to need some sort of pest control program.

According to University of Delaware Extension entomologist Frank Boys, there are more than 30 different kinds of injurious insects that feed on vegetable crops. One can never tell just which of these will be a problem from one season to the next, or just how severe their attacks will be. But by knowing what to look for and approximately when to expect them, a person has a good chance of successful control.

Some insects, like corn earworm, aphids and bean beetles, are a problem nearly every year. Others cause trouble only once in a while. The exact time an insect will appear in the garden varies with the different species and also with the weather. Some spend the Winter in or close to the garden As soon as the weather becomes warm (40 degrees F or above) these insects will move in and become active. Others may fly to and from the plot at random. Still others come to feed later in the Summer.

It's a safe bet, though, that one will have insects from the time the garden is planted in the spring until the last spinach leaf is cut in the fall.

Most folks assume that the only good bug is a dead one. They consider all insects harmful and repulsive. But from the standpoint of control, this isn't a very enlightened attitude, points out Boys. Just because one finds some exotic many-legged creature on a plant with a hole in one of its leaves, one shouldn't assume that's the culprit. Such guilt by association is very often wrong. Not all insects are destructive. In fact, they don't all have chewing mouthparts.

Unless one knows his bugs, he can't be sure that the one he sees is injurious. It could even be one of the good guys. More than one beneficial insect has been sprayed, stepped on, or squashed because it was thought to be destructive — while the real villian is safely off somewhere, ready to strike again.

One of the things that makes pest control tricky is that most insects have three or four stages in their development, and they may actually be harmful to crops in only one or two of these stages. Moths and butterflies, for instance, are harmless as adults, but very destructive in the larval (immature) stage as caterpillars. Some beetles, like the Japanese beetle and the Mexican bean beetle, are a problem in their adult as well as their larval stage.

If a person can't identify the insects that are feeding on his plants, he could be applying controls at the wrong stage in their development. The results then can be very discouraging, notes the entomologist. He recommends home gardeners check over some of the excellent field guides to insects which are available – many of them in inexpensive paperback form. These contain many good color illustrations of insects in their various growth stages and can be an immense help in identifying the pests in the garden.

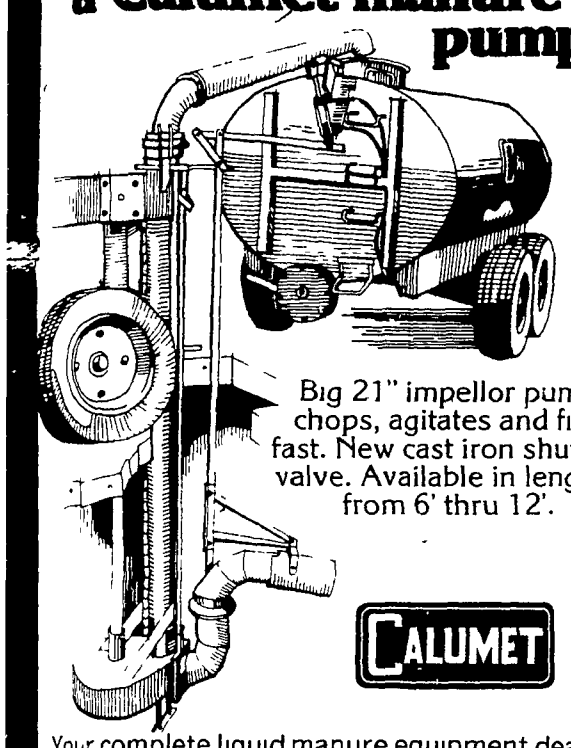
By knowing the correct identity of an insect, he'll be able to tell whether it's a good one or a bad one, whether it has chewing or sucking mouthparts which can damage plants, the number of generations it has in a season (hence the length of time it's likely to be around), which stage or stages are harmful to plants, its preferred food, and where it lives. Then one will be in a better position to determine how, when, and where the insect can best be controlled.

Scabies warning issued

UNIVERSITY PARK – Cattle scabies, long a problem in a small area in the Southwest, is now appearing in Midwest and south central plains states, a U.S. Department of Agriculture (USDA) official disclosed recently.

Pennsylvania buyers are advised to check the scabies status of the state of origin and Pennsylvania import requirements for cattle destined for import into the commonwealth.

Complete agitation, fast unloading with a Calumet manure pump.



Big 21" impellor pump chops, agitates and fills fast. New cast iron shut-off valve. Available in lengths from 6' thru 12'.

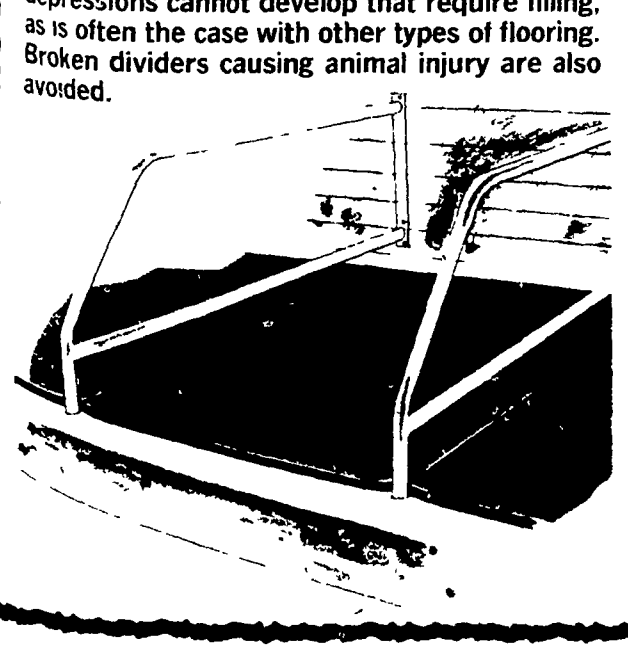
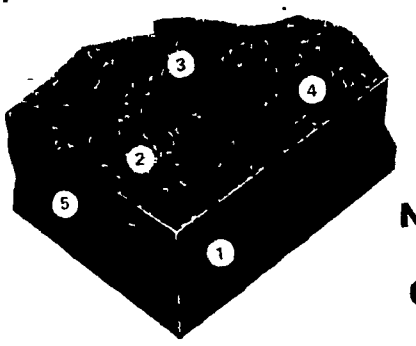
DAIRY MONTH SPECIAL ON RED BARN COW MATS
BUY 9 OF ANY SIZE MAT AND GET ONE FREE

Why and How RED BARN Rubber Mats can reduce costs, cut injuries.

RED BARN floors are 100% vulcanized rubber. They were first manufactured and installed in 1968, and have proven their worth to dairymen ever since. Whether these mats are used in free stalls or stanchion barns, their non-slip qualities provide both comfort and safety for your herd. Dairymen everywhere report bedding cost reductions of 80% and more, and a dramatic decrease in clean-up time. Slips and falls that result in swollen hocks and stepped-on teats are all but eliminated.

LABOUR COSTS CUT DRAMATICALLY
RED BARN rubber flooring cuts free stall cleaning time to a minimum. One dairyman with 165 stalls averages only 15 minutes per day to keep ALL stalls clean (testimonial on request). Because RED BARN mats are tough, depressions cannot develop that require filling, as is often the case with other types of flooring. Broken dividers causing animal injury are also avoided.





NOTE THESE SPECIAL QUALITIES

1. RED BARN is the thickest mat there is, measuring over ¾".
2. Surface has a grained, pebbled texture for easy cleaning and non-slip qualities
3. Surface is resilient for comfort, yet springs back to original form
4. TOUGH Each mat contains over 100 pounds of vulcanized rubber NO WIRE, METAL OR CLOTH BONDING MATERIALS ARE USED
5. RED BARN is non-absorbent

RED BARN Soft, Tough Mats Save Costs & Protect Animals

VANCO SALES CO.
Phone 717-776 3494
Ask For Van Hocker

RED BARN rubber mats come in four standard sizes and will fit virtually any floor installation No adhesives are required the corners of each mat are fastened with cement nails or Ram-Set pins and washers The 100 pound weight of each mat does the rest Mats are easily cut and fitted — the only tools needed are a piece of chalk, a square and a utility knife To assure dry floors and good drainage, a slope of about 3 inches per 7½ feet is recommended

DETAILED INSTRUCTIONS FOR BOTH FREE STALL and STANCHION BARN INSTALLATIONS are AVAILABLE on REQUEST

Three Internationals sweep Buck's 12,000 pound event

THE BUCK — Three International tractors swept the 12,000 pound superstock class at the Buck Tractor Pulls two weeks ago. Winner in the contest was Harry Griest of Coatesville, followed by Tom Bedgar of Freeland, Maryland and Tom Middleton of Ridgely, Md.

Griest, driving an IH 1456, piloted his red machine for a distance of 300 feet, a full pull. Bedgar, driving an IH 856, was stopped at 299 feet, five inches, and Middleton, aboard an IH 1066, came to a halt at 289-10.

In the 5000 pound modified class, Gary Mills of Fallston, Md. won with a full pull and subsequent 240-2. Curtis Stoltz of Myerstown placed second. Like Mills, he had a full pull on his first run, and was stopped at 230-2 when the weight movements on the 57,000 pound sled were changed for the second heat. Ted Houck of Gap was third.

Hughes and Huff of New Windsor, Md. won the 9000 pound open class with their hemi-powered rig, traveling a distance of 299 feet and five inches. Griest placed second with a pull of 298-3, and Dave Johnson of Deerfield, N.J. came in third at 267-3. He drove a machine powered by three 427 cubic inch Ford engines.

Jim Brubaker, Quarryville, outdistanced Tim Stauffer of Ephrata and Dale Smoker of Cochranville in the 5000 pound super stock class. Driving an Allis-Chalmers 180, the Lancaster Countian's pull measured 247 feet. Stauffer was second with a 221 foot pull from his Deutz 8006 Smoker managed to go for 178-5 with his A-C 180.

In the 9000 pound super stock class, Eddie Horman of Frederick, Md. beat the competition with his IH 1466. He roared down the track for a distance of 244 feet, nine inches. Mark Stauffer, driving a Deutz 9006, placed second with his effort of 233-7. Third was Quarryville's Marlin Brubaker aboard an Allis-Chalmers D-21 with a distance of 223 feet.

Dave Johnson, a New Jersey puller, scored a victory in the 7000 pound modified class with his tri-motor Ford. His winning distance was 278 feet and seven inches. Lester Houck of Kinzer placed second with 266 feet, while Hughes and Huff took third at 232-11.

Mark Stauffer of Ephrata drove his air-cooled Deutz 9006 for a distrance of 290 feet, 10 inches, to win the 7000 pound super stock class. His brother, Tim, aboard a Deutz 8006 placed second with a distance of 283-4. Marlin Brubaker placed third with his A-C D-21, coming to a halt at 280-3.

Visitation nite held by York-Adams Pomona

YORK – The York-Adams pomona visitation night program was held on June 9 with Gideon Grange, Hanover, as host and Fawn Grove Grange presenting the program.

As part of the evening, Everett Richardson spoke on "Education in the Early 1920's" and Mrs. Mary Devilbliss, teacher at the Farm Grove Elementary School, shared some of her present experiences. Special guest speaker was Sen. Ralph Hess, of the 28th congressional district.

The final visitation night program will be presented by Gideon Grange at Biglerville Grange hall on August 4 at 8 p.m.

"Degree Day" for York-Adams Pomona will be July 22, at Valley Grange Hall, Lewisberry, beginning at 5 p.m. with a covered-dish meal. Degree work will begin promptly at 6 p.m. The following Granges will present the degrees· first, Valley Grange; second, the York-Adams Youth Team; third, Biglerville Grange, and fourth, Red Lion Grange.

On July 29 the Four County Picnic for Area D, involving York-Adams, Cumberland, Dauphin and Lebanon Counties, will be held at Killinger Grove, Millersburg, Dauphin County, beginning at 2 p.m. A bus will be going from York-Adams Counties, with stops at Red Lion Grange Hall at 11:45 a.m.; Jay's Superthrift at 12 p.m., and Camp Hill Shopping Center at 12:30 p.m. For information call Frank Sheffer - 244-3384. The picnic is for Grange members and guests.

Lebanon County DHIA Monthly Report

MAY 1978

"Minnie," a 7-year old registered Holstein in the Arnold Acres herd, was the top cow in the May DHIA program. Her 305-day record of 26,798 pounds of milk, a 4.0 per cent test and 1077 pounds of butterfat was tops for the month in both milk and butterfat.

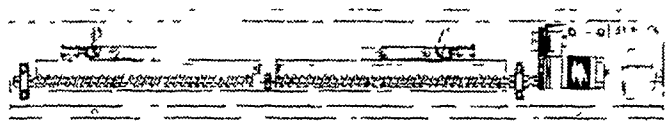
CHORE-TIME®

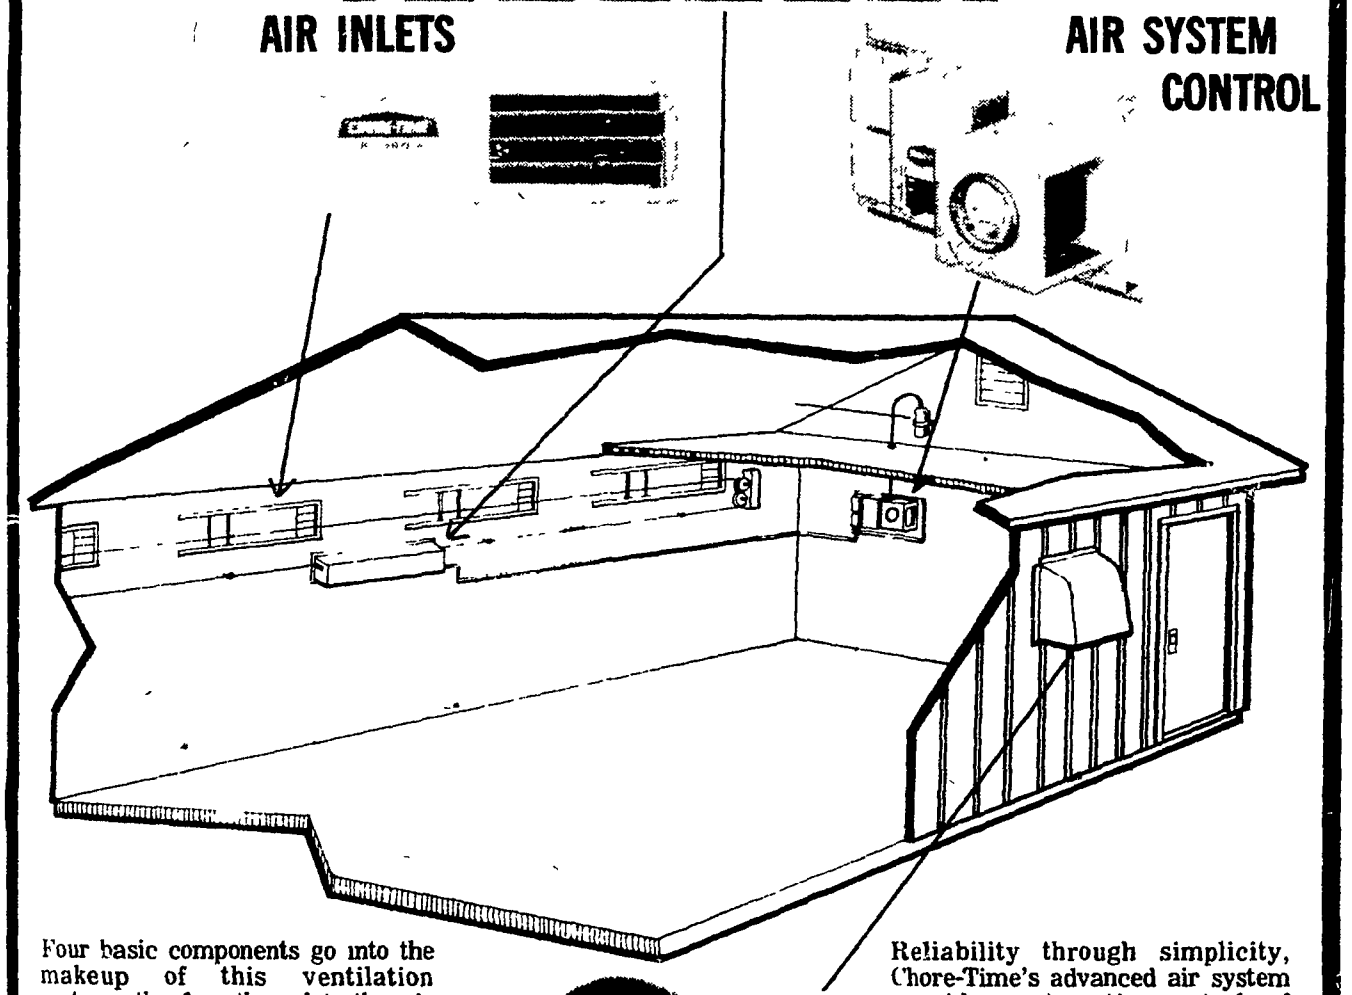
ENVIRONMENTAL CONTROL FOR POULTRY & LIVESTOCK BUILDINGS

INLET POWER PACK



AIR INLETS

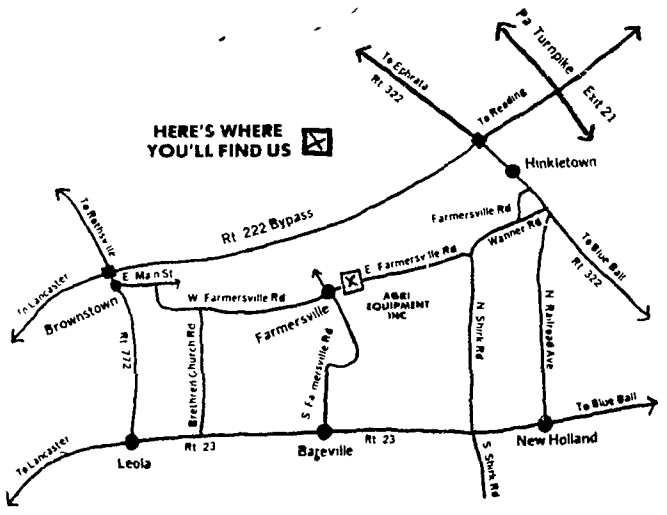
AIR SYSTEM CONTROL



Four basic components go into the makeup of this ventilation system...the fan, the inlet, the air inlet power pack, and the controls. Coordinated, these four basic components can provide you with better conversion and performance by removing stresses due to lack of oxygen, excess humidity, noxious gases and temperature extremes.

Reliability through simplicity, Chore-Time's advanced air system provides automatic control of incoming fresh air, moisture and heat for productive environmental control in agricultural buildings.

AUTOMATIC HOOD FAN



Whether you are updating an existing facility or building a new one, before you decide on an air system for your operation, call your local Chore-Time representative.

Mannings weave

(Continued from Page 99)

scutching party," related Neeltje. "And, of course, part of the fun was for the boys to chase the girls around with the scutching paddles."

After the scutching and combining, bundles of the fibers were hung from the attic rafters for winter spinning chores. Storage from the attic ceiling kept the bundles dry and out of the way of mice that could destroy them.

A demonstrator at the Kutztown Folk Festival each year, Neeltje plans a scutching day at her Strasburg home this fall when the flax is ready to harvest and store.

If thoughts of sitting at a spinning wheel did not interest some visitors, then perhaps another technique shown by Marianne Goldmier of Gettysburg caught their fancy instead. She demonstrated the use of the drop spindle, a spinning "machine" with no moving parts, except the busy hands of the craftsman.

"All you really need to learn how to drop spin is a good-sized potato with a notched pencil stuck in the top of it," she insisted. "And it's certainly a great attention-getter; everyone stops to ask just what it is that you're doing."

Because the drop spinner must keep both hands elevated in front of them to keep the thread and spindle operating properly, it can become easily tiring, especially for beginners. An experienced spinner, like Marianne, can work at the craft for perhaps an hour; but she noted that this is a craft that can be picked up and worked for just a few spare minutes between other jobs.

"Portability and economy are reasons for using the drop spindle," Marianne related. "A drop spindle costs only $3.50 and can be carried in your pocket. Spinning wheels start in price at about $150 and the bigger ones can't even be put in an automobile without partially dismantling them."

Marianne's interest in the thread crafts started when she began sharing her father's weaving hobby. She branched out into tapestries and eventually into the spinning field. For the past seven years, she's been on the teaching staff of The Mannings and has come to understand the sensitivity of a craftsman toward his work, and the tools which he uses.

"A spinner might get violent if you touch his wheel when he's set it and is ready to work," she quipped.

Spinning cottom, 'the most difficult fiber in the world," for the seminar was Ethel Fuehrer of Ephrata.

Ethel learned the craft basics during a spinning bee at the Ephrata Cloister and has demonstrated there for several years.

"All I did at first was spin 'rope'", she laughed, recalling her first attempts which came off the wheel bulky and uneven.

Traveling from the Mountville area of Lancaster County to take part was Betty Lenox, a specialist in spinning on the "great or walking wheel." Betty has been a long-time demonstrator at the Pennsylvania Farm Museum at Landis Valley.

"A spinner could walk up to 20 miles in a day, working the great wheel," she explained. "Housewives doing their spinning tasks didn't need to worry about getting out of the house for exercise."

After threads had gone through the spinning process, colonial women turned their talents toward brightening the materials with colors borrowed from nature. Several of the artisans participating in the seminar detailed various processes of dyeing natural fibers.

"Dyeing with marigolds and coffee" was the description given her display by master natural color artist Jeanne Romanowski of Alexandria, Virginia.

"You'd better know what item you want to make and color enough yarn or thread to complete it," she warned her fascinated audience. "Each dye lot comes out differently and depends on the ingredients and even the cooking kettle used."

She recommends preparing the dyes in copper or coated brass pots, because other metals, even an enamel pan with nicks in the finish, may affect the final color as minerals cook off and blend with the dye during the heating process.

While her cooking pots filled with dried marigolds simmered over open fires, Jeanne recommended ways of drying and storing natural materials for creating a variety of colors and shades.

Other area craftsmen who took part in the informative day included: Janet Eshelman, former curator at the Landis Valley Farm Museum and accomplished spinner on the great wheel; Dotty Lewis, Lancaster, who showed the spinning of dog hair; Judith Eby of Dover, spinning slubby yarns on the Green Springs wheel; and Aatis Lillstrom, a specialist in research and spinning, who also raises sheep at his New Bethlehem farm.

ARCADIAN® liquid gives a profitable boost to alfalfa after the first cutting.

Give alfalfa a liquid boost after the first cutting That's when topdressing N-P-K, and micronutrients in an Arcadian® liquid fertilizer made with POLY-N® pays big dividends in high yielding, high quality alfalfa You can even add pesticides if you need to

When it's done right, a topdressing after the first-cutting will increase the yields of later cuttings It will raise the protein content Help the crop compete better against grasses And improve the vigor for a long stand life

Arcadian liquid makes it easy Made the SLF® way, Arcadian liquid gives you uniform distribution of fertilizer ingredients from start to finish It's truly the efficient way to turn alfalfa into green gold

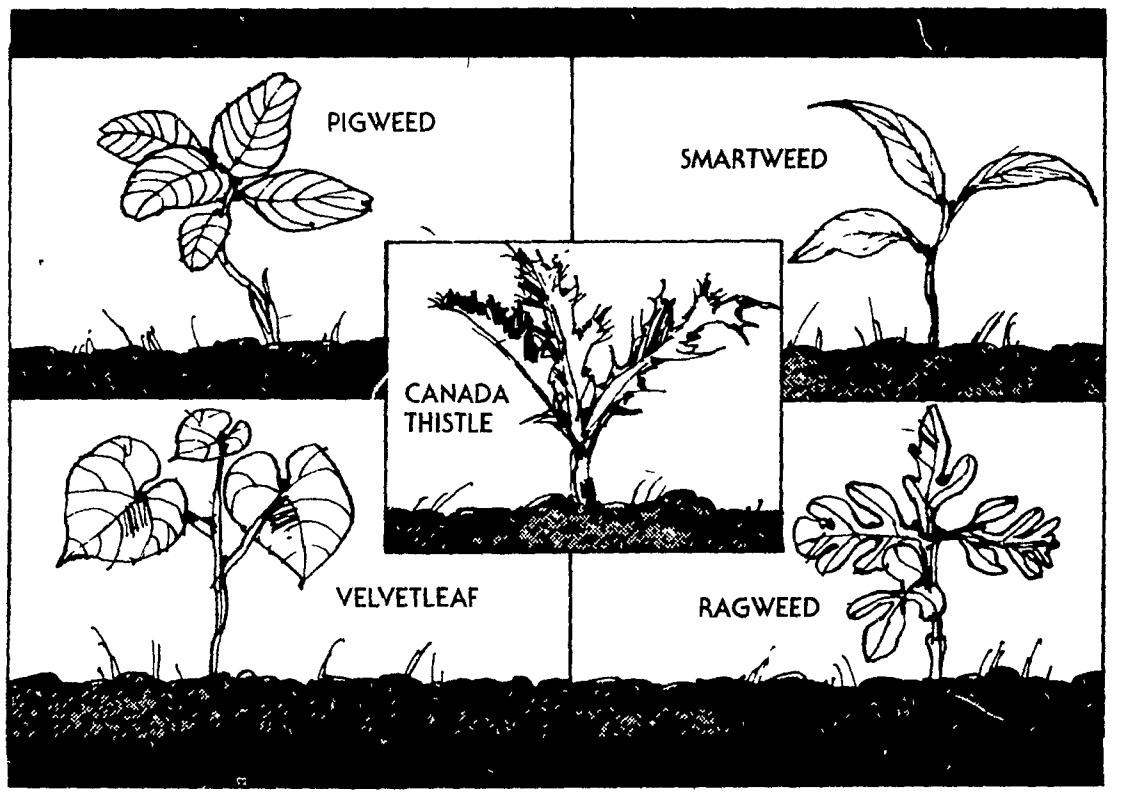
ROHRER'S ARE DISTRIBUTORS FOR BANVEL

For post-emergence weed control on corn...

Banvel® herbicide...



...alone or tank-mixed with 2,4-D (depending on your weed problem):

...to control tough, late-germinating broadleaf weeds,

...to cover misses of pre-emergence herbicide application,

...to get control where weather or other factors make earlier application impossible,

...to make sure that late weeds cannot mature to become the nursery for next year's weed crop.

Ask us for application details about Banvel herbicide...from Velsicol.

Note: Before using any pesticide, read the label.

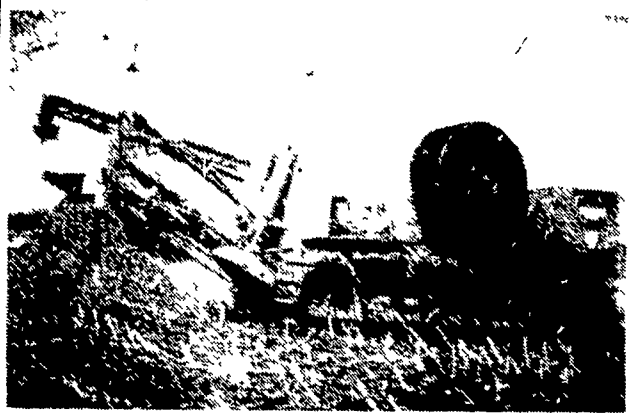
P. L. ROHRER & BRO., INC.

SMOKETOWN, PA PH: 717-299-2571

Farm Drainage Pays High Returns

Investment	Typical Annual Return
Land Drainage	21-46%
Farm Buildings	3-23%
Farm Land	11%
Stocks	7.4%
Bonds	6.1%

Even with the conservative figures shown above, it's obvious that land drainage should top farmer's lists of investment priorities.



✓-CHECK THESE BENEFITS ...

- Better soil aeration
- Better soil moisture conditions
- Longer growing seasons
- An increased supply of nitrogen to the plant
- Soils warm up more quickly
- Certain toxic substances and disease organisms are removed
- Soil erosion can be reduced
- Deeper root development enables plants to better with stand summer droughts
- Valuable livestock water supplies are obtained
- Increased crop yields and improved crop quality

Rodent control essential for poultry houses

NEWARK, Del. – In a poultry house, mice are a nuisance but rats are double trouble; both types of rodent eat poultry feed, but rats will also eat young chicks.

According to Delaware Extension poultry specialist George W. Chaloupka, an effective rodent control program consists of three important parts: sanitation, rodent-proofing of the premises, and elimination of existing rodent populations.

Don-t invite rodents in for dinner, Chaloupka says. Sanitation involves taking care that feed isn't spilled on the floor. Also, junk and trash should be removed from outside and inside poultry buildings. Anything in which a rodent can hide or build a nest should be removed if possible. Trash containers should be metal with tight-fitting metal covers. Feed storage should also be rodent-proof.

One should use any practical means to rodent-proof his premises, Chaloupka advises. The use of construction materials to prevent rodents from moving into or out of buildings is good. If possible, one should choose materials that are impervious to gnawing and that prevent the rodent from climbing as a means of entrance. Since the upper teeth of rats and mice curve inward, it's difficult for them to gnaw into a flat, hard surface. Rats, and less often mice, may enter by burrowing in the ground beneath foundations and floors. They may climb and enter the upper reaches of structures, or they may simply go through doors and windows.

The Fundamental rules for rodent-proofing structures are for one to:

Close openings over one-half inch in diameter to prevent access by rats, and over one-quarter inch in diameter for mice.

Cover all edges subject to gnawing with sheet metal or other impervious material.

Extend rodent-proofing to a height of about three feet above stored or piled materials.

Check holes around pipes. Fit sheet metal around pipes where they enter wooden walls.

Keep doors closed if there is no need for them to be open.

In attempting to eliminate rodent populations, some knowledge of rodent habits is necessary. Rats and mice are color blind. Rats' vision extends only a few feet, and mice's less than one foot. However, rodents can detect movement at considerable distances. Well-developed senses of taste and smell aid them in avoiding poorly prepared toxic baits. Their hearing is exceptionally good. Their organs of touch are very sensitive hairs in the whiskers and around the body, which probably explains why rats like to run next to walls. You can recognize their regular travel routes by the dark, greasy marks they leave on walls.

Rats and mice are good swimmers. A large rat can reach up 18 inches. With a running start, he can jump three feet vertically or about eight feet horizontally.

Since the front incisor teeth on a rat grow at a very rapid rate, the rat must gnaw to live. The new growth must be worn down by constant gnawing, or the teeth will curve back to form tusks, causing the animal to starve. Thus, rats can gnaw through lead pipes, work through several inches of poorly-mixed concrete, and waste little time in gnawing through wood.

The Norway rat prefers to live in burrows up to 18 inches below the surface of the ground. Sometimes in light sandy soil, a colony of rats may burrow as deep as six feet.

Rats usually begin searching for food and water after sunset, and apparently feed at least twice during the night. Although mice are normally seed and grain eaters, rats will eat almost any food available, with a preference for clean, fresh food.

Mice can live quite comfortably in a chicken house, drinking water and consuming about 10 per cent of their body weight in feed every day.

Rats cause even more problems for the poultry producer. Besides eating considerably more chicken feed than a mouse, a rat can kill chicks up to about three weeks of age. An adult rat can kill large numbers of chicks, normally attempting to carry them into the burrow.

Chaloupka says rodents may be eliminated by single-dose poisons, anticoagulant poisons, or traps. Also, a well-trained cat is an excellent deterrent to rodent infestation.

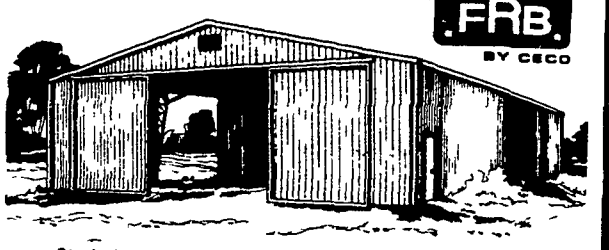
When poisons are used, always read and follow directions carefully. For success with single-dose poisons, the animal must eat a lethal amount at one meal. Use plenty of bait, but put it under a protective cover if pets or livestock might be endangered.

Anticoagulant poisons are slow to kill but relatively safe to use. Where the exposure of poisons might be particularly hazardous, trapping can be effective if traps are baited properly and placed across paths normally traveled by rats and mice. When rodents travel on rafters or pipes, secure the traps with nails or clamps.

Recently, electronic devices have been put on the market that claim to rid farms of rats and mice. In addition to being relatively expensive, Chaloupka says, the effectiveness of these devices is questionable at this time.

Rodent control in poultry houses, as in other farm buildings, demand continuous attention. The best way to control rodents is to take away their food and shelter. One shouldn't allow them to enter buildings Traps, gas, and poison will only stop a rodent population temporarily.

Own the best...
FARM-RITE BUILDINGS
Steel frames on concrete piers make the difference!



- Steel where steel is needed, wood where wood serves best
- Standard widths 60', 50', 40', 30' Any length
- All usable space, floor to roof, no truss interference
- Strong steel roofing and siding with baked-on enamel in colors
- Completely new ALL-STEEL sliding door won't warp
- Backed by 60 years of Ceco engineering experience

18 Montgomery County 4-H'ers to attend leadership conference

NORRISTOWN — Eighteen Montgomery County 4-H members will learn specialized leadership skills when they take part in Pennsylvania 4-H Leadership Congress, June 26-29, on the Pennsylvania State University's main campus.

The county delegation will join with approximately 1300 other 4-H members from all counties in the Commonwealth to share and contribute ideas which will improve local community programs.

At 4-H Leadership Congress, they will take part in assemblies, discussion and interest groups, and recreational activities.

Members participating in the event are: Andrea Esterly, Bechtelsville; Debby Weikel, Pennsburg; Mary Pat McGann, Maple Glen; Karen Waltemyer, Collegeville; and Jonathan Keener, Telford.

"This year's conference will include six areas of leadership orientation and development," says Nancy Kadwill, county agent. "A leadership school for teen leaders, a state leaders forum for adult leaders, delegate workshops for 13 - 15 year olds, day camping training, and 4-H reporters training are aspects of the program," she says.

Selected teen leaders will attend a special school designed to increase skills to work effectively in planning and conducting youth programs. Topics will include communications skills, understanding social concerns and group processes, and recreation. These include: Stacey Seybold, Linfield; Dana Geyer, Harleysville; and Sharon Shultz, Red Hill.

"County Reporters" will be Jeanne Cratin, of Ft. Washington (Developing Radio Techniques") and Eric Jones of Schwenksville ("Poster Design and Construction") who will be attending special workshops on public relations.

Leaders and Extension staff members will meet with College of Agriculture officials and participate in educational workshops involving the understanding of leadership principles, working with groups, communications, and subject matter related to selected 4-H projects.

Also scheduled during Congress will be a day-camping leadership program. Youth between the ages of 14 and 17 will be involved in this educational experience. Members attending are: Don Wampole, Lansdale; Gary Seybold, Linfield; Jamie Graybeal, Telford, Jennifer Roblee, Ambler, and Jackie Cratin, Fort Washington.

Three county 4-H members, Rita Wojton, Trappe; Scott Young and Yvette Amar, both of Ambler, have been named to serve as a Leadership Council representative.

Leadership Council delegates will arrive on the Penn State campus June 23 for two days of counseling and orientation to prepare them for their duties the remainder of the week.

Highlights of the four-day conference will include the Iron Clad Agreement, a dramatic performance about American inventions in the latter half of the 19th Century; Jimmy Gross and Peggy, an electronic musical spectacular; and an educational film, "Grab Hold of Today", starring Dr. Eden Tyl, that offers suspense, excitement, and humor in emphasizing how to eliminate existing negative attitudes and free young people to prepare for tomorrow.

1977 deficiency payment date extended

HARRISBURG — The Pennsylvania State ASC Committee has authorized ASCS County offices to take requests for payment filed through June 30, 1978 for Deficiency Payments for 1977 crops of Wheat, barley and grain sorghum.

This in effect means any farmer that grew wheat, barley and grain sorghum and had a 1977 allotment in effect for that crop and has not as yet reported their acreage and filed an application for this deficiency payment may do so now. There were no set-aside or other requirements for the 1977 program.

Payments within the allotment for planted wheat grown are $.65 per bu., unplanted $.22 per bu.; for barley $.50 per bu. planted within the allotment; and for grain sorghum $.38 per bu. planted within the allotment.

Save Energy and get FREE HOT WATER... with the revolutionary...

MUELLER FRE-HEATER

The Mueller Fre Heater conserves energy and provides "free" hot water by capturing the heat now wasted!

HERE'S HOW IT WORKS

Rather than using noisy, dust-creating fans with fragile, dirt collecting air-cooled condensers, the refrigerant is routed to a specially designed condenser/heat exchanger and its heat is transferred to the water

A thermostatically controlled valve delivers 145° F water to a storage tank

In addition to the thermostatic valve, a mixing valve is provided to permit "prepping" temperature water

Thus, the Fre-Heater delivers two temperatures of water — prepping and washing

Tests indicate the Fre Heater consumes 10% less power than an air-cooled system . . and you get Free Hot Water!

ELIMINATES REFRIGERATION SERVICE PROBLEMS!

The most common causes of slow cooling in bulk milk cooling systems are related to the air-cooled condenser

The Fre-Heater eliminates these problems because

- There is no air-cooled condenser
- The Fre Heater is installed indoors
- There are no noisy fans to fail
- The head pressure is very stable — assuring longer compressor life
- There are no cold weather starting problems, plus . . . the Fre-Heater conserves energy and produces Free Hot Water!

HOW MUCH WATER CAN BE GENERATED?

There are many variables, so this question cannot be answered directly, however, a rule of thumb is that a Fre-Heater operating on 60° F well water will produce a volume of 145° F water similar to the amount of milk produced during a milking

War on against cereal leaf beetle

By JOANNE SPAHR

LANCASTER – Tuesday was D-Day. More specifically, it was distribution day for cereal leaf beetle parasites in several counties around the Commonwealth. And, hopefully, D-Day also marked the beginning of the end for a large number of cereal leaf beetles in the state.

The beetle is primarily a European-Asian pest that was first identified in the United States in 1962 in southwest Michigan. A flying insect, the beetle has since spread by prevailing winds to the north and east, and to a lesser extent to the south. It did not miss Pennsylvania in its travels.

In about 1966 the cereal leaf beetle became a problem in the western part of the Commonwealth and only in the last four years has it found its way into the eastern and southeastern counties.

It does its damage in both the adult and larval stages by feeding on the leaves of oats, wheat, barley, and other small grains. The insect chews out all the green chlorophyll-containing cells. Heavy feeding gives the plant a white, frosted appearance

In southeastern counties of Pennsylvania, where the population has only been building up over the last four years, the tactic in controlling this pest is to establish a parasite population which will grow at an equal rate as the beetle and keep it under check. This type of control – one in which natural enemies, and not pesticides, are used – is known as a biological control.

This week's drop of cereal leaf beetle parasites marked the third such consecutive attack in three years. Three agencies were involved – the United States Department of Agriculture, the Pennsylvania Department of Agriculture, and the Cooperative Extension Service of the Pennsylvania State University.

Early on June 13, representatives of the USDA's Animal and Plant Health Inspection Service (APHIS) collected cereal leaf beetle parasites at an insectary at Rock Springs.

After the parasites were collected and packed in specially prepared containers, they were flown to designated airports around the state where the Pennsylvania Bureau of Plant Industry coordinators distributed them to county agents waiting to pick them up.

This year, however, there was a limited number of parasites reared at the insectary. As a result, not every county received the wasp. Only a few counties in Lancaster Farming's coverage area – including Chester and Berks – were able to receive them.

Jim Murningham, officer-in-charge of APHIS' Plant Protection Quarantine Programs in Meadville, explained that the wasps were distributed to counties where they had never before been dropped and, also, to the counties with the highest production of small grains.

For the past two years both Lancaster and York Counties have received the cereal leaf beetle parasite and were, therefore, unable to participate this year. Lebanon County has such a small population of the beetle that treatment for it is not worthwhile, says County Agent Denis Hoke.

Tony Dobrosky, agent for York County, did note, however, that in York more calls were received in one week this year than in all of last year.

Berks County agent Herbert Wetzel says he scattered his cereal leaf beetle parasites in three drops over the entire county.

The parasites are tiny wasps imported from Europe which attack only the cereal leaf beetle and do not sting.

The wasps seek out the beetle's larvae (the growth stage following the egg stage) and lay their own eggs inside the host. When the parasite eggs hatch, the young wasps eat their way out, destroying the cereal leaf beetle larvae in the process.

The cereal leaf beetle parasite release program is part of the federal-state effort to reduce the use of pesticides in controlling plant pests. A growing concern over contamination of the environment and a reduced cost over a long period of time has motivated the shift to biological control.

A significant economic feature of biological control is its moderating influence with respect to new infestations. Unlike chemical pesticides, biological controls as a rule only have to be repeated until parasite populations become established, according to Henry F. Nixon, Director of

the Pennsylvania Bureau of Plant Industry.

The parasitic wasps were imported from Europe several years ago under a cooperative agreement with the USDA's Agricultural Research Service (ARS), and several states with cereal leaf beetle infestations. APHIS and ARS screened the wasps and found ways to raise them either in the laboratory or in field insectaries, such as the one in Centre County.

"Our research showed us that in Europe where these wasps are part of the natural environment, the cereal leaf beetle is not a serious problem for farmers in most years," says Jim Murningham. "For the most part ...e needed to find those species of parasites that could survive and reproduce in our climate and yet be harmless to everything except the cereal leaf beetle."

During the Cereal Leaf Beetle Parasite Distribution Day held last June, a total of 665,476 of the tiny parasitic wasps were released by county agents in 406 oat fields in 62 counties throughout Pennsylvania.

According to a survey taken last year, cereal leaf beetle parasites were recovered at 155 new sites, in 62 Pennsylvania counties. Results in certain fields showed, more than 70 per cent of the beetles in their larval stage were parasitized; this figure is equal to other states where the wasps have been established for several years.

"Last year we expanded our program by introducing a third larval parasite, **Lemophagus curtus,** and increased the accumulative number of parasite releases per county. The 1976 parasite recovery results were encouraging, and last year we realized increased economic benefits as a result of decreased cereal leaf beetle damage," Murningham added.

For more information about this cooperative program contact Jim Murningham at the USDA's Plant Protection and Quarantine office at P.O. Box 596 in Meadville, PA. 16335. Telephone number, (814) 724-3114.

Grange calls for land ownership inquiry

WASHINGTON, D.C. – In a statement issued today by John W. Scott, Master of the National Grange, the nation's oldest farm organization, the Grange called for a more thorough and detailed investigation into foreign ownership of U.S. farm land.

"We are alarmed over foreign ownership of U.S. farm land," Scott said, "but as the General Accounting Office report released by Senator Herman Talmadge, Chairman of the Senate Agriculture Committee, indicates that 'very little data on foreign ownership of land now exists in federal, state or local government agencies,' the old adage, 'What you don't know won't hurt you' does not apply in this case. I believe we are seeing just the tip of the iceberg as regards to the effect on U.S. farmers because of foregin ownership of U.S. farm land."

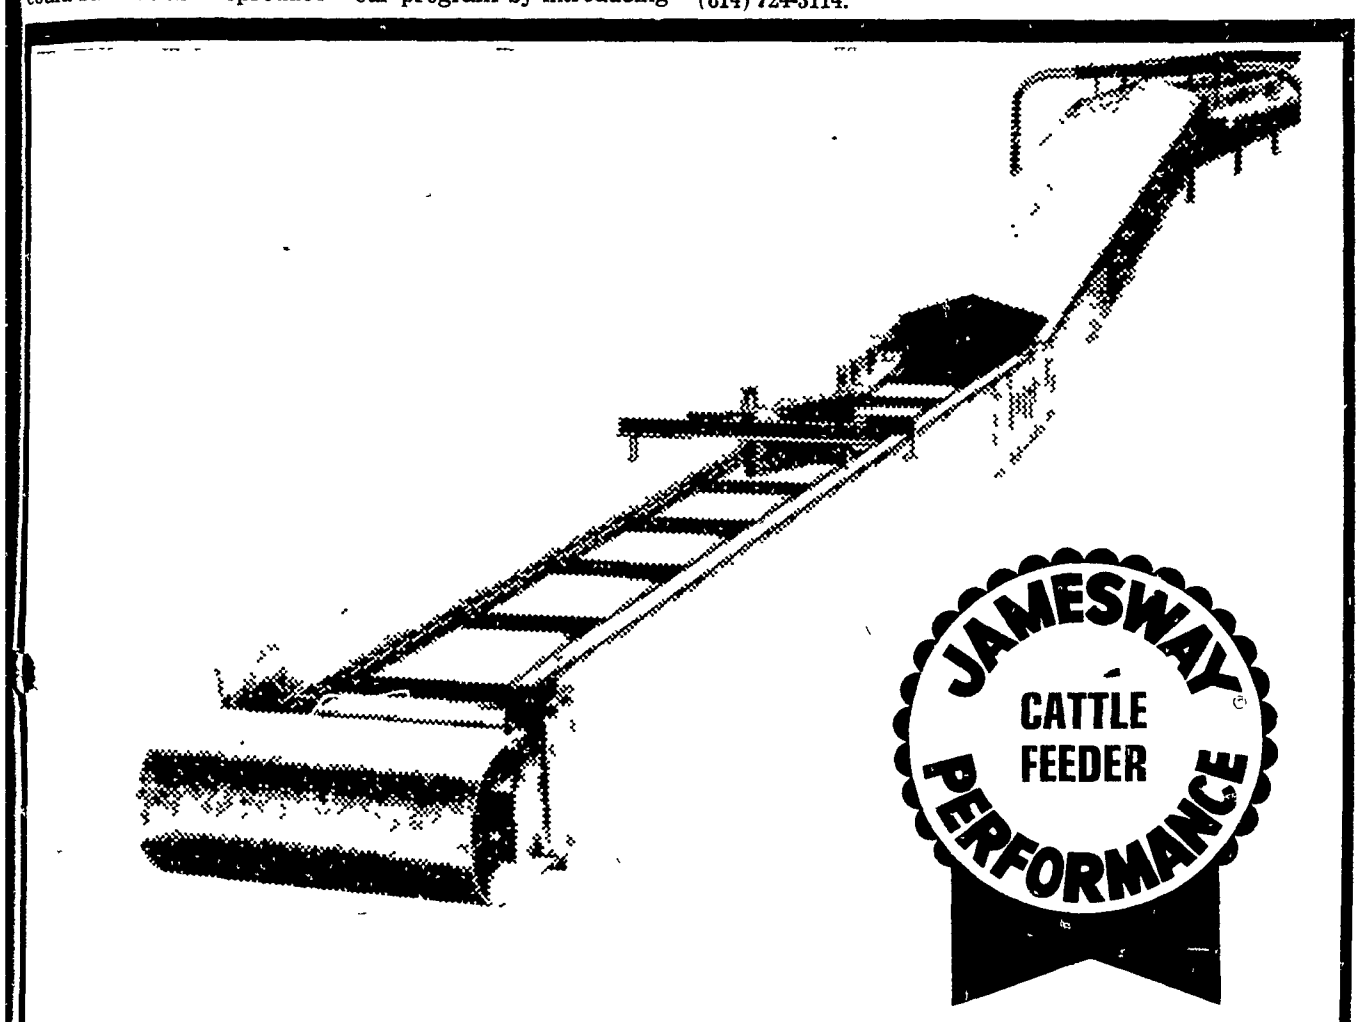
The random GAP survey of 25 counties in California, Georgia, Kansas, Missouri and Oklahoma found that foreigners owner 44,700 acres – 0.3 per cent – of the total farm land in these places. "This is a very small sampling," Scott said. "Many prime farming areas were not surveyed such as in Illinois, Iowa and Nebraska. Foregin purchases in any part of a state have an escalating effect on land values in that state and more information is needed before any action is taken," said Scott.

The national farm leader said the Grange will support legislation recommended by GAO to provide for a nationwide registration system for foreign landowners similar to the alien registration system now used by the Immigration and Naturalization Service. "In addition," Scott said, "we will support the recommendations by Senator Talmadge to have the Library of Congress prepare a paper on the constitutional, international treaty and other legal questions that might arise over legislation from Congress or state legislatures pertaining to foreign ownership of farm land and the necessary funding of USDA to carry out the investigation necessary to determine the magnitude of the problem we face.

Grain program closes

READING – The 1978 Wheat & Feed Grain Program enrollment has closed with 251 farmers enrolled in Berks County. As the enrolled farmers get their crops planted, it is suggested they report them at the County ASCS office to avoid a last minute rush near the July 15 deadline.

All farmers are also being asked to report their 1978 crops for use in future agricultural programs.



CONVEYS AND FEEDS

Jamesway Convey-N-Feed cattle feeder, two machines in one, is "loaded" at silo end for straight-out conveying and feeding. Adjustable incline and decline add flexibility. Feeds silage fast.

We also install silage distributing-unloading, ventilating, and manure-handling systems.

Over the years, one thing about Mol-Mix never changed.

Quality.

From the first day that Mol-Mix® was made, the people at National Molasses made it with quality ingredients because they knew a better-quality supplement would mean **more net profit** for the cattlemen who used it

Today, instead of decreasing or eliminating these quality ingredients because of shortages and higher costs, Mol-Mix has maintained the same level of quality that has made it the liquid leader.

BUFFERED RELEASE IS JUST PART OF OUR QUALITY STORY

Occasionally, somebody finds out about one of our unique features and gets really excited about it For example, our **buffered release of urea ammonia,** heralded by other supplements as a brand-new innovation, **has been in Mol-Mix for years** to improve its protein-building efficiency And our performance-proven ingredients, like corn distillers solubles, condensed fermented corn extractives, phosphoric acid, and ammonium polyphosphate, have yet to be included in most other supplements!

Stop in soon We would like to demonstrate the dramatic results that Mol-Mix can bring to your herd in terms of performance and profits. We're not talking about something that will only add to your supplement costs . we're talking about the bottom line.

Pa. water quality management approved

HARRISBURG – Pennsylvania's approach to applying the best management practices in problem areas to improve the water quality of specific streams or lakes has met with the approval of representatives of the U.S. Environmental Protection Agency.

During a recent joint meeting of the Erosion and Sedimentation Control Work Group of the Agricultural Advisory Committee of the Department of Environmental Resources, and the Rural Clean Water Program Task Group, it was explained that the approach will begin by gathering total information on agricultural lands, political boundaries and public lands, the 20 subbasins and 104 watersheds identified in the Pennsylvania Water Resources Plan.

Agricultural areas identified by watersheds and political areas are expected to reduce the area of the state which will have to be examined, and these areas can be further reduced with the removal of public lands, watersheds that have other restricting pollutants such as mine drainage and those watersheds that have no pollution problems and have designated high quality streams.

The remaining agricultural areas will then be studied for erodible soils, steep topography, livestock operations and cropping practices to identify high pollution potential areas. This date will then be balanced against stream uses and conditions, lake and reservoir pollution, watershed size and landowner cooperation to establish a priority rating for project areas and recommendations for cost-share funding.

Afton Schadel, Task Group Coordinator, presided when Tom Koons, Task Force member, both representing DER, explained the agricultural non-point source pollution control plan now under development.

The program deals with the control of various pollutants associated with farming activities. Areas of concern, said Koons, are erosion and sedimentation control, nutrient losses, manure management, pesticide application, rural sewage disposal and stream bank protection.

A plan is being finalized outlining the methods that are being used in Pennsylvania to implement the programs and DER has the authority to establish standards and guidelines for controlling the pollutants and voluntary programs to manage and protect the resources.

Per cent days in milk are important

ITHACA, N.Y. – Harry Ainslee, Extension Dairyman at Cornell University, says that there is a definite relationship between milk production and per cent days in milk. Several studies have shown that there is a positive correlation between herd average production and per cent days in milk. Some work has shown that a one per cent change in days in milk will be reflected by a 100 pound change in the milk average.

Per cent days in milk are affected by: (1) an automatic correlation with yield level because high producers dry off later than low producing cows, (2) herds with low conception rates tend to have longer dry periods on their cows, (3) dairymen will differ on their "drying off" policies.

Data in the table from 3308 New York State Holstein herds show that production per cow is closely associated with per cent days in milk.

% Days in Milk	Ave. Age Days Dry	Milk per Cow	$ Income Over Feed Cost/Cow	Grain #'s Fed/Cow
89	56	15446	915	5689
87	61	15067	887	5574
85	66	14038	795	5262
83	73	13414	746	5061

Not all of the difference in production per cow can be attributed to per cent days in milk since the higher producing herds feed more grain. But the herds with 2000 pounds more milk per cow fed only 600 pounds more grain/cow than the lowest herds.

A daughter of Paclamar Bootmaker EX-94 GM

CHRIS was bred for production, but his pedigree is loaded with type. His Dam and her Maternal sister were Honorable Mention All-America Produce of Dam in 1971. The Maternal sister produced over 32,000 pounds of milk!

CHRIS's pedigree is a good one. His maternal grandam was Excellent 91 and Gold Medal. She was a daughter of Thonyma Royal Prince with over 25,000 lbs. milk.

Early information shows CHRIS siring tall daughters with wide rear udders, good center supports, wide level rumps, and correct rear leg set.

A CHRIS daughter in the Fred Rau herd, Fresno, California, as a two year old produced 31,586 pounds of milk and over 1,000 pounds of butterfat in 305 days. She also has scored Very Good 88 first time classified!

Order your CHRIS semen from your AMERICAN BREEDERS SERVICE REPRESENTATIVE now!

THE SYSTEM

Tool up here for a great future in the hog business

Producers planning to stay in the hog business are tooling up to squeeze more pork from their feed and their labor

If you're one of them, chances are you ll appreciate the built-in feed and labor efficiency of AGSTAR equipment

Sensible feed saving design features — like preci sion TIP TOP feed flow adjustment on AGSTAR feeders

Great labor saving ideas — like self cleaning watering cups with smooth Porcelainized Steel surface, and fully automatic feeding and ventilation equipment

We think you'll also appreciate the ruggedness and durability of every piece of AGSTAR equipment

You can buy AGSTAR equipment and install it in your own buildings Or you can get it already installed and ready to use in one of our new factory built modular hog production buildings for sows pigs or finishing hogs

The equipment samples in the photo are arranged to demonstrate as many of our 40 types of hog equip ment as possible For full details on this and our other equipment for confinement, open lot, or pasture — as well as cattle sheep, or horse equipment — contact your AGSTAR dealer

A. Modular 24-ft. wide farrowing & finishing buildings.
B. Modular 12-ft. wide farrowing & nursery buildings.
C. Lot or pasture fountains.
D. Hog lot gates & partitions.
E. Heavy duty hog & cattle waterers.
F. Big capacity feeders.
G. Ventilation equipment.
H. Round feeders.
I. Feed delivery systems.
J. Galvanized vertical pen partitions.
K. Hog troughs.
L. Porcelainized Steel slats.
M. Rotary feeders.
N. Porcelainized watering cups.
O. Baby pig feeders.
P. Farrowing stalls & pens.
Q. Pig heaters.
R. Nipple waterers.
S. Space-saver nursery feeders.
T. Flex auger systems & feed bins.

National summit to explore problems of farm economy

WASHINGTON, D.C. – Plans for a National farm summit to bring together the "broadest possible spectrum of leadership," representing all segments of agriculture, consumers, business and labor, was announced jointly by Texas A&M University and the Agriculture Council of America.

The purpose of the summit is to provide a national forum to identify, evaluate and move toward agreement on solutions to current and long-range economic problems facing U.S. agriculture.

The effort will begin with five top-level task forces that will address specific major issue areas. Membership on the task forces will come from general farm and commodity organizations, from companies that sell directly to the farmer, and from consumer and labor groups. A project leader who is an acknowledge expert will be assigned to each task force. These groups will begin in early Summer to develop a comprehensive report which will form the basis for discussion at the national summit meeting scheduled for December 4 to 6, 1978, at Texas A&M University in College Station, Texas.

Dr. Jarvis Miller, president of Texas A&M University, emphasized that the purpose of the summit is "to pinpoint and clarify practical things which can be done to improve the long-range economic outlook for U.S. agriculture. The first step is to get as many leaders from all affected groups and interests working together in a constructive and positive environment.

"We hope and believe that the Summit will clearly establish the fact that the areas of agreement within the agricultural community far overshadow the areas of disagrement. Farmers are living on borrowed money and borrowed time. It is absolutely critical that we identify what realistically can be done to ensure that our temendous capabilities in the critical area of food and fiber are not further eroded. One of our basic objectives will be to appeal to the urban majority for support."

Major issue areas to be addressed in the project task forces are: 1. Farm commodity prices and income, international agricultural trade, resource allocation and production costs, nutrition, product quality and safety, and agriculture's role in government decisions.

Dr. Miller emphasized that "in terms of agricultural policy, I think we are at the most critical juncture since the early 1930's." And he concluded, "that is why we are putting such priority on this activity – hoping to make a substantive contribution to better understanding of the basic issues.

Texas A&M is the land grant university of Texas. The Agriculture Council of America is a non-profit, non-legislative organization formed in 1973. ACA's membership is comprised of individual farmers and ranchers, farm and commodity groups and companies that supply the farmer. Its purpose is to improve communications between farmers and urban consumers. ACA also provides a means by which all segments of agriculture can collectively address the American public on key issues.

Teresa Ann Wolfskill wears Berks County dairy crown

By LAUREL SCHAEFFER
Staff Correspondent

WYOMISSING – For Teresa Ann Wolfskill, the excitement and activities of Dairy Week did not end on June 17th, but will continue until next year when she will relinquish the crown of the Berks County Dairy Princess to her successor, as Sandy Miller did for her, during the coronation banquet held last Saturday evening.

Catching her breath after the exciting announcement that she was selected as the 1978 Berks County Dairy Princess, Teresa told the very large audience just where she stood on the milk promotion issue. "You better drink milk," she warned, "because I'm going to make you!"

Teresa, the 18 year old, 5 foot 5, blue eyed brunette is the daughter of Mr. and Mrs. Mark Wolfskill, Robesonia R1. She has been dreaming of this event since last year when she attended the pageant for the first time. "I've been planning on entering the contest for a year," she told **Lancaster Farming** with a convincing smile. "And now I'm excited about the state contest," she quickly added.

Berks County's new dairy princess lists cows as her first interest. At home she is responsible for raising the calves, and most of the herd management, including selecting the matings for rebreeding. Presently the Wolfskills are milking 50 head. This Summer she plans to continue to work at home but will start to attend Lebanon Valley College in the Fall to major in chemistry.

Teresa plans to return to the farm after finishing college since she enjoys working with the dairy herd so much. She is a recent graduate of Conrad Weiser High School were she was class historian, graduating third in her class. Teresa belongs to the National Honor Society and enjoys playing the organ and singing.

Looking ahead to her year as reigning princess, Teresa remarked that she is very enthused about visiting elementary schools and attending various banquets where she will meet other people. "This is great." she added with zealous excitement in her voice.

Just as happy and excited as Teresa was Mary Ann Weyer, Berks County's new Alternate Dairy Princess. Mary Ann is the daughter of Mr. and Mrs. Ronald Weyer, Hamburg R2. She too is 18 years old and loves working with dairy cows.

Teresa Ann Wolfskill is Berks County's new dairy princess.

Presently this five foot, blue eyed, brunette is employed at Quakermaid Kitchens but helps out on the farm whenever possible. She belongs to the Northern Berks Dairy Club, enjoys showing cattle and participating in many various sports. She raises a few Jersey cows and especially likes to show them even though her family maintains a herd of Holsteins.

Berks Countians can be certain of seeing much more of this young lady, since she will be assisting Teresa in her many activities and public appearances which include appearing at fairs, parades, being interviewed on local radio, TV, and newspapers, visiting schools, clubs, and various organizations as spokesmen for the Berks County dairy industry.

These talented girls competed with five other contestants entered in the pageant on Saturday, June 17. Final judging took place during a large banquet held in their honor during the evening at the Sheraton Berkshire Inn, Wyomissing. Judging the contestants were Gary Conover, executive vice-president Nicholson Bank; Mrs. Chris Jones, former Powers model, and Vernon Cox, dairy farmer.

During the program, Sandy Miller, State Dairy Princess gave her farewell remarks as the retiring county princess. Other remarks were made by A. Wayne Readinger, toastmaster; Mary Kirkhoff, pageant committee chairman; Marilyn Althouse, coordinator; and Donald Duncan, president Berks County Dairy Association.

Nursery school enrolling now

NEFFSVILLE – The Neffsville Christian Nursery School, sponsored by Long Memorial United Methodist Church, Neffsville, is now taking applications for the next year. Classes are conducted for children ages 2½ to 5 years. The school offers a three day program, Monday, Wednesday and Friday, for four and five year olds; a two day program, Tuesday and Thursday & Monday and Wednesday, for four and five or three year olds; and a one day program on Fridays for 2½ year olds. Classes are held from 9:30 a.m. until Noon and 1 p.m. to 3:30 p.m. No afternoon classes on Tuesday and Thursday.

The purpose of this school is to prove for children in a Christian atmosphere the basic educational training and group experience preparatory to entering kindergarten, and to enable them to grow in Christian habits, attitudes and ideals.

Registration information may be obtained by telephoning the church office at 569-2931.

Eastern names officers; proposes cheese plant

SYRACUSE, N.Y. -- Reorganization of officers of Eastern Milk Producers Cooperative for the 1978-1979 fiscal year took place at the organization's office in Syracuse, N.Y. on June 8, following the Co-op's two-day annual meeting.

Those elected to serve a one year term were: Arden Tewksbury, Meshoppen, Pa., president; David E. Clements, Jr., Frankfort, N.Y., vice-president; Franklin G. Wagner, Sr., Hummelstown, Pa. secretary; and Max Lonstein, So New Berlin, N.Y., Treasurer.

The Executive Committee elected comprises of Charles Shoop, Halifax, Pa.; Stanley Korona, Amsterdam, N.Y.; George Stambaugh, Newville, Pa.; Messrs. Tewksbury and Lonstein. Their terms are also for one year as committee members.

Leo J. Connor of Bridport, Vermont was seated as a new member of Eastern's Board of Directors. He replaces the retiring Director from District 5, Stanley K. James, Jr. of Middlebury, Vermont. Connor is a former Assistant Commissioner of Agriculture of the Green Mountain State and operates a 550 acre farm with a herd of 150 registered Holsteins. He also serves on the Agricultural Advisory Committee for U.S. Senator Patrick Leahy.

Plans to build a 10 million dollar milk processing plant somewhere in Central New York State of Northern Pennsylvania were approved by the delegate body of Eastern Milk Producers Cooperative on June 7, at annual meeting. The proposed plant, described as ultra-modern and the largest of its kind in the world, is expected to employ between 150 and 200 workers.

Also, a 1.5 million dollar renovation of the Horseheads, N.Y. manufacturing facility, currently being leased and operated by Eastern from Dairylea as a butter-powder plant, is expected to commence soon. This will be Phase 1 of the two-phase mozarella cheese plant construction program.

Arden Tewksbury

The plants will be purchased or built by Eastern and leased for twenty years to Leprino Cheese Company of Denver, Colorado to operate, explained Tewksbury.

Both plants combined will be designed to handle up to 700 million pounds of surplus milk per year, tighten milk supplies, increase the net income of Eastern members and benefit the entire dairy industry in the Northeast.

Work is scheduled to commence upon completion of financial arrangements.

Other action taken by Eastern's 200-member delegate body included the adoption of a policy encouraging the availability of fluid milk for purchase by consumers during all store hours.

The following awards were presented during the cooperative's banquet on the evening of June 7: Media Award to "Country Folks", a weekly newspaper published by Lee Newspapers, Inc of Palatine Bridge, N.Y., Member-of-the-Year Award to Eugene Gayman, a leading state agriculturist from Chambersburg, Pa and Distinguished Service Award to Burgess C. Outdoor life programs offered

LANCASTER – A series of programs on outdoor life will be presented at the Otter Creek and Pequea Creek campgrounds at Lake Aldred this summer.

All programs are free and open to the public, according to Ben Moyer, seasonal naturalist for Pennsylvania Power & Light Co. at Lake Aldred.

Lou Hoffman, wildlife education specialist with the Pennsylvania Game Commission, will present a slide show on "Wild Things and Places in Pennylsvania" June 30 at 8:30 p.m. at Pequea Creek Campground.

On July 2 at 2 p.m. at Otter Creek Campground, Curt Harvey, former curator of reptiles at the Central Florida Zoological Park, will speak on "Reptiles of the World."

Management of waterfowl resources in southeastern Pennsylvania will be the subject of a slide show by Charlie Strouphar, waterfowl management assistant with the Pennsylvania Game Commission, July 21 at 8:30 p.m. at Pequea Creek Campground.

Mike Ondik, director of white-tailed deer research at Penn State, will present a slide show titled "Hawk Country" on August 5 at 8:30 p.m. at Pequea Creek Campground.

On Saturday, September 9, a hunter safety course will be offered at 2 p.m. in the auditorium of the Holtwood Post Office Building.

In addition to these programs, Moyer will conduct educational nature-related walks, talks, and workshops each Saturday and Sunday through the Summer months at both campgrounds.

The campgrounds, adjacent to Lake Aldred on the Susquehanna River, are operated by PP&L in conjunction with the Holtwood Hydroelectric project. Pequea Creek Campground is located off Route 324 near the village of Pequea, while Otter Creek is accessbile from Route 425 on the west bank of the Susquehanna River.

ALL AIR-COOLED DIESEL ENGINES ARE NOT CREATED EQUAL.

It s easier to call an engine heavy duty than it is to build it that way Superior performance and long life are the result of special alloy heads integral lube coolers oil-cooled pistons and the Deutz highly efficient axial flow cooling blowers These features plus 100% direct air-cooling result in substantial fuel savings — 20 to 40% according to users — and far less pollutants Deutz air cooled diesels — 5 to 500 bhp

DEUTZ®

Kempton Fair draws crowds for fun

By LAUREL SCHAEFFER
Staff Correspondent

KEMPTON – The Small Berks County community of Kempton drew large crowds of people last weekend as the 24th Annual Kempton Country Fair was in progress June 16th to 18th. Featured during the three day event were entertainment by country western singers, a fashion show, baking contest, tractor pulls, and more.

Sunday evening, the most exciting to many, featured the crowning of "Das Lieblichste Maedel," while the afternoon featured a Fireman's Water Hose Competition a new event for the fair. Also held during the fair was a jeep rodeo, along with the many other attractions such as rides and exhibits.

Results for the cooking contest follow:

Tips given for Summer salad care

ST. LOUIS, Mo. – "A little extra time and care will go a long way towards helping to prevent spoilage or even food poisoning when preparing certain types of salads for your summer picnics and barbeques," says Cynthia Keller, a food scientist and microbioligst with Monsanto Company of St. Louis.

"There is no reason for ham, egg, tuna, chicken, macaroni salads or coleslaw to be spoiled by bacterial growth if the food is properly prepared and stored," she explained. "Actually, homemade salads are generally safe because they are most often eaten right after they're made. The problem of food poisoning, which is caused by bacteria, can arise when salads are held for a period of hours at warm temperatures before they're eaten."

Certain conditions must exist before the mayonnaise-based salads and cole slaws become food poisoning hazards.

The salad can be contaminated with a type of food poisoning bacteria – via ingredients, utensils, containers, or people. Also, the salad must have a low acid content that can support the growth of food poisoning bacteria. Finally, the salad must remain at a temperature conducive to the growth of such bacteria.

There are a number of precautions that can be taken to prevent the growth of bacteria in homemade salads:

"Don't leave any of these types of foods above refrigeration temperature for several hours at a time", the Monsanto scientist said. "If bacteria are present, they can multiply and reach harmful levels in a matter of hours under improper storage conditions."

Most commercially prepared salads, Ms. Keller explained, are usually formulated so that the product's high acid content prevents the growth of food poisoning bacteria. The chemical preservatives used in these salads are aimed primarily at inhibiting the growth of yeasts and mold – micro-organisms which can grow in a high-acid environment and at lower temperatues than bacteria.

"Common sense is the best tool of all," she said. "Use clean utensils, containers, and food preparation areas."

"Make sure you use good quality ingredients. In fact, use plenty of good quality mayonnaise or salad dressing in the salads Despite what many people may think, mayonnaise and salad dressings do not increase the potential of spoilage or health hazards Instead, because of their high-acid content, these ingredients retard the growth of spoilage organisms and food poisoning bacteria".

DHIA cows must be properly identified

UNIVERSITY PARK – The National DHIA rules state that every cow in the herd must be positively identified on the DHIA reports. Registered cows must have registration numbers and grade cows must have eartags of the uniform series such as 23 WAC 3742 (two digits, three letters and four digits), adopted by the national organization for permanent identification. Everyone needs to be reminded from time to time that this area must be kept up-to-date, says Larry Specht, Penn State Extension dairy specialist.

Another area of identification that needs constant attention is the individual herd numbering system. It is the responsibility of the herd owner to maintain an accurate and legible numbering system to aid in the positive identification of animals at the time of the monthly test.

Herd numbers should be clearly visible to the tester to insure an efficient and accurate test. No one wants to slow down the milking operation on test day. Remember, it takes a more readable system when cows are moving rapidly through a milking parlor than when being milked in a stall barn.

Cow identification seems to be an area that is taken for granted. Eartags are lost and some are difficult to read Neck chains also have problems; numbers are not easily read, some are missing and some chains are so tight that the tag is tucked into a position where it's hard to see. Things will go more smoothly on test day (and later on at the processing center) if quick and accurate identification is available on all cows.

Facts for Dairymen

By Alan Bair
Assoc. County Agent
Lancaster, Pa.

Have you ever walked into the barn on a hot afternoon and been tempted to take a quick dunking in the watering trough? That clean cool water can be really inviting. On the other hand, have you ever hesitated in putting your hand into a water bowl to make an adjustment because it was so filthy? We pamper ourselves by demanding that our food and water be almost sterile. Consider the food and water you are providing for the cows that are producing natures most nearly perfect food.

Dirty or contaminated feed and water can be a major contributor to lowered production and increased disease problems in a dairy herd. Stall barns with in-barn feeding and loose housing with bunk feeding both have potential dirty water and feed probelms.

The most serious problems generally occur in loose housing systems because more animals are using the same facilities. A badly fouled community watering device does not affect just one cow, but the whole herd. Watering troughs and fountains must be checked daily for function and contamination. They should be properly protected with curbing and railings to cut down on fecal contamination.

Feed managers and silage bunks that are not kept clean can hurt feed consumption, lower milk quality and add to your fly problems. When bunks and managers are constructed, some thought should be given to how they are to be cleaned. Since daily cleaning is a necessity, bunk construction should make the job as easy as possible.

Silage and water are not the only concerns. Grain and feed bins should be inspected and cleaned thoroughly when they are empty. Masses of moldy feed in bulk grain handling facilities facilitate growth of molds. This mold not only affects palatability, but actually can produce toxicity in the feed.

Chianina awards set

BLUE SPRINGS, Mo. – Premiums of $1,000 will be awarded to both the grand champion Full blood/American purebred Chianaina heifer and percentage Chianina heifer at the American Chianina Association's National Junior Heifer Show, November 15, 1978 in Louisville, Kentucky.

Only junior members of the American Chianina Association will be able to nominate their registrable Chianina heifers to this first-time show. Applications for junior membership into the American Chianina Association can be obtained from the American Chianina Association, Box 159, Blue Springs, Mo. 64015.

Nomination deadline for the ACA National Junior Heifer Show is August 15, 1978. Nomination forms are available from the American Chianina Association. Any registered Chianina heifer calved on or after January 1, 1977 and before May 1, 1978 may be nominated.

Dr. Gary Minish, Blacksburg, Va., will make the official placings at the ACA National Junior Heifer Show.

Let's give our cows the same consideration we demand ourselves, clean feed and water served in clean containers.

xxx

Okay, you wanted one, you worked hard, you spend lots of money and you finally got one – now what are you going to do with her? That's right, "her". What are you going to do with the newly choosen dairy princess in your county?

You say, what's the big deal! The "big deal" is that through the proper use of your county dairy princess you can go a long way in promoting dairy products. On the other hand, she is a lost resource if you don't give some thought and planning to her career as dairy princess.

All dairymen do have a stake in what these girls do during their reign as dairy princess. My advice is to be sure you use this resource wisely - working with non-farm groups and not wasting their time talking to dairymen.

June may be Dairy Month, but you need milk promotion all year long. Put your dairy princess to work in a constructive way.

Devotion

Somebody once observed that behind every successful man stands a devoted wife — and a surprised mother-in-law

4-H'ers reminded of show requirements

UNIVERSITY PARK – Each year there are some disappointed 4-H'ers and some unhappy and frustrated parents when registration certificates and/or health papers are not adequate at show time. This can be avoided with some effort taken now. First of all, make sure you know all the rules concerning ownership and health. They are included in the Pennsylvania Junior Dairy Show booklet for 1978, says Penn State's W.P. Anderson.

Health papers for show purposes can be good for 180 days. That's six months, so there is no reason to wait until the week before the show to have the necessary tests made and papers prepared. Do it now. Then there will be time to recover if a mistake happens in the process. One common discrepancy is incorrect or no identity on health papers. Double check the registration and ear tag numbers on health papers. Don't forget, animals must be identified on the shipping fever report too. If they come back wrong from the veterinarian or Bureau of Animal Industry, get them corrected before the show. Mistakes can be corrected, but it takes a little time Allow for it, Anderson advises.

Mistakes occur on registration certificates too. Check them when they come from the association See that the sketch or tattoo matches the animal. Is the birth date correct? And check the ownership or transfer date if you purchased the animal. Does it meet the requirements in the rules? If mistakes are found in time, they can be corrected. Avoid a lot of frustration and disappointment, check these items now, Anderson concludes.

May milk price to be $9.55

NEW YORK, N.Y. – Dairy farmers supplying milk plants regulated under the New York - New Jersey marketing orders during May will be paid on the basis of a uniform price of $9.55 per hundred pounds or 20.5 cents per quart. Market Administrator Thomas A. Wilson, who announced May's price, also stated that the uniform farm price was $9.60 per hundredweight in April 1978 and $8 98 per hundredweight in May 1977. The uniform price is a marketwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

The seasonal incentive fund (Louisville Plan) removed a total of $3,735,434.03 or $.40 per hundredweight from the dairy farmers' uniform price for May. Deductions for this fund will continue through June and will be returned in the August through November uniform price calculations.

The total amount of milk received from the 18,374 dairy farmers supplying the New York - New Jersey Marketing Area was 933,858,507 pounds during May 1978. This was less than 17.6 million pounds above last year. The gross value to dairy farmers for milk deliveries was $90,723,130.68. Wilson explained that this included differentials required to be paid to dairy farmers but not voluntary premiums or deductions authorized by the farmers.

Regulated milk dealers (handlers) utilized 415,184,607 pounds or 44.5 per cent of the total amount of milk for Class I. The Class I milk is used for fluid milk products such as homogenized, flavored, low-test and skim milks. For May 1978, handlers paid $11.34 per hundredweight, or 24.2 cents per quart, for the milk used in Class I products compared with $10.71 a year ago.

The balance of the milk, 55.5 per cent, was used to manufacture Class II products including butter, cheese, ice cream and yogurt. For this milk the handlers paid $9.13 per hundredweight.

The uniform price is based on milk containing 3.5 per cent butterfat. For May 1978, a differential of 12.3 cents was applied to the price for each one-tenth of one per cent that the milk tested above or below the 3.5 per cent standard.

All prices quoted are for bulk tank milk received within the 201-210 mile zone from New York City.

4-H club meets

READING-The Eastern Berks 4-H Dairy Club recently held a meeting at the home of LaVerne Moser. During the meeting, teen leaders discussed and demonstrated how to lead and break a calf. The club also judged a class of heifers.

The next meeting of the group will be held on July 6 at the home of David Hauseman. The topics of discussion will be clipping, washing, and hoof trimming the animals.

Pa. crop growth still behind schedule

HARRISBURG – Pennsylvania Secretary of Agriculture Kent D. Shelhamer said field activities and crop development in the commonwealth are still a week or more behind the 1977 progress.

Shelhamer said the Pennsylvania Crop Reporting Service's weekly crop and weather roundup for the week ending June 12, 1978 showed four days suitable for fieldwork.

Soil moisture levels increased, with three-quarters of reporters indicating adequate and the remainder surplus. Northern counties reported mostly adequate soil moisture.

At 92 per cent complete, corn planting is eight days from completion a year ago. The crop is 91 per cent planted in the north and 93 per cent in both central and southern counties. Statewide the crop is four inches high, about a week behind the seven inch height a year ago. Northern counties record three inches, central stands at four inches while the crop has reached five inches in the south. Where emerged, the crop is generally in good condition.

Soybeans are now 69 per cent planted, still nine days behind the 82 per cent planted a year ago. Central counties are 85 per cent planted, with northern and southern areas at 62 and 61 per cent planted respectively.

Tobacco transplanting is 41 per cent complete A year ago it was nearly two-thirds done. Growers blame slow growth of plants in the beds.

At 77 per cent headed and six per cent turning yellow, barley lags the 38 per cent turning last year by about 12 days. Northern and Central areas report five per cent turning with the south at eight per cent. Wheat is 59 per cent headed, 10 days behind the 85 per cent of a year ago Heading is 29 per cent in the north, 69 per cent in central and 81 per cent along in southern counties A small amount is reportedly turning in the south. Oats are five per cent headed, about five days behind one-fifth headed in 1977. Nearly all the heading is in southern counties.

Haymaking is about two weeks behind last year's progress. Alfalfa first cut is 26 per cent done with clo-tim at 12 per cent. The quality of hay made last week was mostly good. Pastures are providing an average amount of feed.

Strawberries are available in light volume but about 10 days late. Peaches have a good set and are developing well. Apples are sizing well but weather is less than ideal for spraying.

Beef 4-H meets

CHAMPERSURG – The Franklin County 4-H Baby Beef Club recently attended a fitting and showing demonstration at Steve and Brenton Upperman's home. Twenty-seven members, their parents, and county agent Bill Reagan, Jr. were present.

Steve Upperman explained how to clean and how to clip a steer in preparation for showing. He then demonstrated the proper ways to show a steer.

Refreshments were served by the Uppermans.

Next month's meeting to be held July 13, will be a tour to all members homes to inspect project steers.

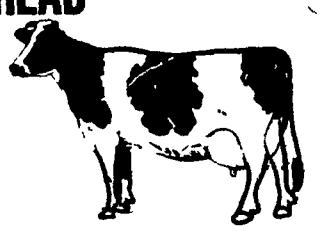
2 COMPLETE HOLSTEIN DISPERSALS



1 REGISTERED HERD — 1 GRADE HERD
THURSDAY, JUNE 29, 1978
8:00 P.M. Sharp DST

At Smoketown Quality Dairy Sales. Smoketown, Pa. (Rt. 340) 5 Mi. East of Lancaster, 5 Mi. West of Intercourse.

ELVIN W. GROFF

50 Cows, 10 Heifers, 5 Open Heifers ready to breed, 5 bred heifers due Oct. and Nov. Two Red & White Cows. Several cows fresh March and April. Several due Aug. and Sept. There are Summer and Fall Cows in this dairy. Mr. Groff shipped 2300 lbs. of milk every two days. Several cows now milking 65 to 80 lbs. per day. Base milk was 1256 lbs. per day. All animals checked for pregnancy. These cows are bred to a Registered Holstein Bull, Howacres Style Master Prince. Dams record 3 yrs. 3 mos. 14,344M, 554F, 3.8 test. Grdam 1 rec. over 17,000M, 1 c. over 18,000M.

New York State complete Holstein Dispersal — 39 head in all. 29 Reg. cows and heifers and 10 grades. There are 4 Reg. heifers and 1 grade ready to breed in this herd. 1 Reg. Holstein Bull in the herd. One reg. heifer springing. This is a young herd of cows. The oldest cow in this herd is 9 years old, and the rest are from 2 yrs. to 5 yrs. old. They are averaging 50 lbs. of milk per day. From May 15 to June 15 made over 45,000 lbs of milk with a 3.8 and 3.9 test. These cows are not on test but a good herd to make records. There are 3 top reg Ayrshires in this dispersal that are made like Holsteins. Two are full sisters — born 8-25-75, 10-8-74. Sires are Betty Grand-daughters. Heifer is due July or Aug and the other 2 are milking between 65-70 lbs. per day Cows in this dispersal have the potential to milk 15,000 to 20,000 of milk if they get the right feed and attention. These cows were never pushed. Sires in this herd include: 1 fancy 5 yr. old Reg. Astronaut, milking 35 lbs due in July, could classify Ex. in years to come. 1 fancy 4 yr. old Reg. Paclamar Bootmaker milking heavy, due beginning of Dec. 1 reg. 4 yr. old Duke Kenndale Centurion due Dec. 1. 4 yr. old Reg. Penn State Ivanhoe Star due Oct. 27 (show heifer). 1 3 yr. old Reg Haysen Craftman, just bred and milking 80 lbs. Her half sister was sold for $3750 at a dispersal. 1 Duncrarin Royal Successor. 1 Sterk Millie Astro. 1 Gar-Bar Dale Burke Kate. 3 Minuteman Robbie. 5 yr. old Penn - Octo Floyd, two 4 yr. old Honeydale Rag Apple Graphite, 3 yr old Honeydale Rag Apple Primus, two 4 yr. old Willowland Kingpin Prestige that are half sisters. 3 open Heifers ready to breed, 2 by Bootmaker grddtrs., 1 by Elevation grddtr. Dams are not on test but the granddams have records up to 21,540 milk, 875 fat. Nowerland Elevation Rocky, born 12-9-76. 2 - Wy-Ro Sunrise Bootmaker, born 12-7-77 and 11-6-76. Most of this herd is due this Summer and Fall: 3 Fresh, 2 due July, 5 due Aug., 3 due Sept., 2 due Oct. and 12 due from Nov. to Jan. 5 cows just recently bred milking between 70 & 80 lbs. per day. This is a good young herd and good uddered cows. This is a good opportunity to get milk — bloodline and foundation cows. These cows have potentials for high classification. We do not misrepresent any cows in either of these herds. The registered herd can be seen from Thursday on. Also 1 load of top fancy cows & heifers from one herd.

T B. Blood Tested. within 30 days.

Cows milked at regular times.

Cash or Good Check night of sale.

INTRODUCING: NEW . . . UNIQUE! PURIDINE™

(Patent pending)

- No other product available can be used for **both** teat dipping and udder washing.
- One percent iodophor Highly effective against spread of organisms which may cause mastitis.
- Controlled viscosity provides better control of mastitis-producing organisms.

- Emollients help keep teats soft, reduce chapping and irritation.
- Controlled PH (4.0 to 4.4) helps prevent irritation.
- Convenient sizes for either small or large herds.

The only combination teat dip and udder wash in America.

Cash Rebates Up To $20.00

PURIDINE REBATE SCHEDULE:

$2.00 rebate per 2½-gal. jug
$4.00 rebate per case (2-2½-gal. jugs)
$20.00 rebate per 30-gal. drum
